VINCI awarded the contract to build 738 km of high-voltage electricity transmission lines in Brazil

- Design and construction of 738 km of electricity transmission lines connecting three Brazilian states
- A contract worth around €150 million

Engie Brasil has awarded Cobra Brasil (Cobra IS) the design-build contract for seven high-voltage electricity transmission lines (525 kV and 345 kV) covering a distance of 738 km.

Located in the states of Minas Gerais, Paraná and Santa Catarina, they will boost the capacity of Brazil's electricity networks which are under heavy pressure from growing volume of renewable energies. This project will create more than 2,200 jobs.

With this new contract, Cobra Brasil is currently in charge of building a total of 2,400 km of high-voltage lines in several Brazilian states.

Over the last twenty years, Cobra IS has built more than 30,000 km of high-voltage lines in Brazil under public-private partnerships.

About VINCI

VINCI is a world leader in concessions, energy services and construction, employing 285,000 people in more than 120 countries. We design, finance, build and operate infrastructure and facilities that help improve daily life and mobility for all. Because we believe in all-round performance, above and beyond economic and financial results, we are committed to operating in an environmentally and socially responsible manner. And because our projects are in the public interest, we consider that reaching out to all our stakeholders and engaging in dialogue with them is essential in the conduct of our business activities. VINCI's ambition is to create long-term value for its customers, shareholders, employees, partners and society in general. www.vinci.com
