# Statement of Corporate Governance

# **Corporate Governance Statement**

### 1. SKEL's Corporate Governance Environment

The Board of Directors and management of SKEL fjárfestingafélag hf. ("SKEL") place great emphasis on the observance of good governance. Good corporate governance, in the view of the Board of Directors and management, is the foundation for both trust and management accountability, both of which contribute to good decision making and good relations among the Board members, employees and other stakeholders of the Company.

SKEL's governance is in compliance with laws and rules that apply to the Company's business activities, including Act No. 2/1995 on limited liability companies, the EU Market Abuse Regulation, cf. Act No. 60/2021 on measures against market abuse, Act No. 115/2021 on markets for financial instruments, Act No. 20/2021 on the disclosure requirements of issuers and flagging obligations and Act No. 140/2018 on measures against money laundering and terrorist financing.

SKEL has listed securities in the Icelandic Stock Exchange (Nasdaq Iceland hf.)¹ and is therefore also required to observe the guidelines on corporate governance issued by the Iceland Chamber of Commerce, Nasdaq Iceland hf,. and the Confederation of Icelandic Employers, 6th edition, 2021. The Guidelines are accessible on the website of the Iceland Chamber of Commerce.²

SKEL's governance is also in compliance with the Company's internal rules, which are posted on the Company's website, <a href="https://www.skel.is.3">www.skel.is.3</a>

### 2. Principal activities of the Board of Directors over the operating year

### 2.1. SKEL's business strategy

This past year was SKEL's first year of operation following the division of the earlier Skeljungur hf. The division served to sharpen the points of focus of the Company's operation with the establishment of three independent operating companies to take over operations which had previously been i) the Company's retail operations, ii) corporate services, and iii) the operation of depots.

Orkan IS ehf. took over operations involving services to individuals, including the operation of Orkan's service stations, Extra, 10-11, the Löður car wash stations, the Lyfjaval pharmacies and Íslenska vetnisfélagið, as well as the Gló restaurants. Skeljungur ehf. took over operations involving sales of goods and services to corporations, distribution, procurement and wholesale of fuel, lubrication oils, cleaning and chemical products and sales of fertiliser and other goods and services to corporations and farmers. Sales of goods and services to large-scale customers in fisheries, airline operations and contracting also form a part of the operations. Gallon ehf. took over the Company's depots and is responsible for their operation.

Financial summary of SKEL fjárfestingafélag hf. 2022

<sup>&</sup>lt;sup>2</sup> https://leidbeiningar.is/leidbeiningar

<sup>&</sup>lt;sup>3</sup> http://skel.is/stjornarhaettir/stefnur-og-reglur

Naturally, the work of the Board of Directors early in the year to a large extent featured projects connected with setting up these operating companies and establishing their respective strategies. The members of the Board of Directors of SKEL took on the task of serving on the boards of directors of the three operating companies early in the year, as the Board felt it was important to participate in an active manner and possess a clear oversight of the operation and strategic planning of the companies in their first months of operation. Around mid-year all the members of the Board of Directors of SKEL, apart from the Chairman of the Board, resigned from the boards of the operating companies, to be replaced by the CFO and CEO of SKEL. Subsequently, at year-end 2022, the Chairman of the Board of Directors of SKEL resigned from the boards of directors of the operating companies. Members of the current Board of Directors of SKEL therefore no longer serve on the boards of Orkan, Skeljungur or Gallon.

SKEL operates as an investment company with the objective of creating value for shareholders, subsidiaries and associated companies, as well as other stakeholders. The Company aims to create value by developing its asset portfolio, targeting long-term value creation with the objective of reducing the weight of fossil fuel in its operations by increasing the number of its sources of income and investments. SKEL aims to be a strategic investor and thereby to provide support and assistance to the companies, management teams and entrepreneurs in which the Company decides to invest from time to time. SKEL's staff and management will therefore support its partners in taking full advantage of all the opportunities of the enterprises that they operate, whether in the case of deep-rooted operating companies or good business ideas.

### 2.2. Review of organisation and governance

Following the division of SKEL, the establishment of its operating companies and the change in the Company's objects the organisation and governance at the group level have been under review with the goal of enhancing and strengthening good governance. Policies have variously been simplified, updated or abandoned to improve consistency with the Company in its current form.

In the course of the year the following policies and rules have been reviewed:

- Rules of procedure of the Board of Directors updated
- Chief Executive Officer's job description updated
- SKEL's rules on the Company signature approved
- Sustainability policy adopted.

The intention is that the policies and rules of SKEL should not apply at the Group level. The operating companies owned by SKEL have adopted their own policies and rules of governance in their business activities as applicable. The Board of Directors, in consultation with management, will continue to review the Company's internal rules in the light of the Company's new objects and update them as appropriate.

### 3. Internal control and risk management

### 3.1. Internal control

It is the role of the Board of Directors, together with the CEO, to take the lead in strategic planning, setting goals and defining risk parameters for the Company, both for the short and long term, and to establish an efficient system of internal controls. Among other things, the arrangement of internal controls needs to be formal and documented, and its effectiveness needs to be verified regularly. The purpose of internal control is to ensure to

the extent possible efficiency in the Company's business activities, reliable information and compliance with laws and regulations. The Company does not have an internal auditor; instead, the Company's external auditors conduct focused audits of specific processes.

A Compliance Officer, appointed by the Board of Directors, is responsible for supervision of compliance with rules on inside information and insider trading. The Compliance Officer in the first half of the year was Stefán Orri Stefánsson, attorney at law at Lex Law Firm. The current compliance officer is Árni Gestsson, attorney at law, and his deputy is Guðrún Nielsen. In addition, Lex Law Firm provides expert consultancy on compliance matters.

Auditors are elected for a term of one year at annual general meetings. The Company's annual financial statement is audited in accordance with international standards on auditing. The Board of Directors annually receives an audit report from the Company's auditors containing their principal comments regarding internal control.

The Audit Committee is responsible for the supervision of work processes in the preparation of financial statements and the arrangement and efficiency of internal control and risk management. Among other things, the Audit Committee reviews the principal aspects of the internal control and risk management system with regard to the financial reporting process. The Committee is entrusted with the task of reviewing the Company's financial accounts, among other things in order to verify the existence of effective internal control in the preparation of financial statements.

### 3.2. Risk Management

The Board of Directors and management of SKEL endeavour to maintain a sound control environment using documented policies, rules and procedures. This ensures efficiency in the work of the Company, reliability of information and compliance with law. The CEO and CFO are responsible for analysing and assessing the Company's financial and operational risk. They also play an active role in shaping the Company's risk strategy and risk appetite. The Company has no dedicated risk manager. Monthly meetings are held with the Board of Directors where Board members are kept abreast of the principal risk factors in the Company's business operation at any time. This enables the Board and management to respond in a timely manner to impending risks.

An Audit Committee is responsible for ascertaining whether risk management is in line with the Company's policies and that control procedures cover risks in the Company's operation. Risk management is reviewed annually to take account of any changes in the principal risk factors in the Company's business.

### 4. Administrative structure

SKEL's Articles of Association do not provide for the election of a supervisory board, which under paragraph 3 of Article 73 of the Companies Act shall, if established, monitor the Board of Directors' and CEO's management of the Company's affairs and submit a recommendation to the Company's Annual General Meeting as to whether the annual financial statement should be approved and the proposals of the Board of Directors regarding the disposition of retained earnings accepted. No such committee has been established in the Company.

### 4.1. Board of Directors of SKEL

Each year, SKEL's annual general meeting elects five members to serve on the Board of Directors of the Company. According to article 24 of the Company's Articles of Association, the Board of Directors is the Company's supreme authority between shareholders' meetings and shall oversee all the affairs of the Company, take responsibility for them and ensure that the organisation and operation of the Company are at all times in good and proper order. Furthermore, the Board of Directors shall oversee that the Company's accounting and use the Company's funds are under proper control.

The principal elements of the work of the Board of Directors over the operating year are discussed in Chapter 2 above.

### 4.2. Board performance evaluation

The Board evaluates the performance of the Company as a whole each year, and also its own functions, composition, and practices, as well as the work of sub-committees and the performance of the CEO and other day-to-day management. The Board also regularly evaluates the progress made by the Company over the year to ensure that the progress is consistent with the Company's established goals. The performance evaluation was carried out in December 2022 and the conclusions were presented to the Board of Directors of SKEL with the results reviewed with the participation of the Nomination Committee in January 2023. Overall, the results of the evaluation were favourable.

### 4.3. Information concerning Board members

Board of Directors of SKEL hf.:

JÓN ÁSGEIR JÓHANNESSON, CHAIRMAN OF THE BOARD OF DIRECTORS, FIRST TOOK A SEAT ON THE BOARD IN 2019

*Year of birth:* 1968

Holdings in SKEL: Thórarinn holds 100% of the shares in the company Loran ehf. Loran ehf.

holds 50% of the shares in IREF ehf. IREF ehf. holds a 20% share in Strengur Holding ehf. which holds 100% of the shares in Strengur hf.. Strengur hf. owns 969,152,089 shares in SKEL, corresponding to 50.06% of voting shares.

Posts for SKEL: Member of the Board of Directors of SKEL. Member of the Nomination

Committee and Audit Committee of SKEL. Former member of the boards of

Orkan IS ehf., Skeljungur ehf. and Gallon ehf.

Relevant affiliations: Loran ehf. owns a 50% share in IREF ehf., which owns a 20% share in Strengur

Holding ehf.

In the opinion of the SKEL Nomination Committee Thórarinn Arnar Sævarsson is independent of the Company, and its day-to, day management, but not independent of large shareholders in the Company, according to the definition of independence in the ICC Corporate Governance Guidelines.

### 4.4. Policies of the Board of Directors

According to the rules of procedure of the Board of Directors, the Chairman of the Board is the spokesman for the Board and represents the Board in the affairs of the Company, e.g. vis-à-vis the CEO, employees and shareholders pursuant to further applicable rules. According to the Company's recently approved Sustainability Policy, the Company focuses on good relations with stakeholders.

Formal relations between the Board and shareholders take place at shareholders' meetings. However, shareholders can at any time submit their views and questions to the Board by e-mailing <a href="mailto:stjorn@skel.is">stjorn@skel.is</a>; the mailbox is monitored by the Board's secretary, who notifies the Board of all suggestions or questions from shareholders. The Board of Directors is responsible for supervising the Company's responses to such notices and queries. Prior to the annual general meeting, the largest shareholders in the Company (shareholders holding 1% or more in the Company) are invited to attend a formal meeting with the Chairman and Vice-chairman of the Board of Directors.

Investors can at any time send comments and questions to the Board of Directors using the e-mail address <u>fjarfestar@skel.is</u>. The CEO takes delivery of e-mail messages sent to this address and communicates to the Board any messages that fall within the purview of the Board of Directors.

### 4.5. Meetings of the Board of Directors and minutes

Minutes of meetings of the Board are kept in compliance with guidelines on corporate governance. In all minutes a declaration is entered from those attending the meetings regarding the qualification of the Board and CEO to discuss and address items on the agenda of the meeting. However, the secretary of the Board of Directors shall nonetheless review the register of Board members' interests prior to calling meetings of the Board of Directors and making documents available in the Board's portal. In instances where there may be interests of Board members with links to items on the agenda of a meeting, the Board member in question leaves the meeting and has no access to documents relating to the matter until, as applicable, the matter has been closed as further decided by the Board of Directors.

The Board of Directors filled a quorum in the meetings of the year, except with regard to SKEL's holdings in VÍS hf. It was decided that the Board member Guðbjörg Heiða Guðmundsdóttir was not qualified to participate because of a possible conflict of interests after she announced to the Board of Directors her intention to accept the post of CEO of Vörður Insurance Company. After she took the post she received no information on the matter and no access to its relevant documents.

The number of meetings and attendance by Board members and members of sub-committees at meetings over the operating year were as follows:

The Board of Directors of SKEL hf. held 23 meetings from the annual general meeting of 2022 up to and including 15 February 2023, when the annual financial statement of the Company was approved. All the meetings were fully attended.

SKEL's Audit Committee met 6 times from its appointment after the annual general meeting of 2022 up to and including 15 February 2023. Guðbjörg Heiða Guðmundsdóttir was absent for one meeting. In other respects all meetings were fully attended.

SKEL's Remuneration Committee met 5 times from its appointment after the annual general meeting of 2022 up to and including 15 February 2023. All the meetings were fully attended.

The table below shows the attendance at meetings of the Board of Directors and sub-committees of the Board of Directors.

Board member	Period	Board	Audit Committee	Remuneration Committee
Jón Ásgeir Jóhannesson	10.3.2022-15.2.2023	23		5
Guðbjörg Heiða Guðmundsdóttir	10.3.2022-15.2.2023	23	5	
Nanna Björk Ásgrímsdóttir	10.3.2022-15.2.2023	23		5
Sigurður Kristinn Egilsson	10.3.2022-15.2.2023	23		5
Þórarinn Arnar Sævarsson	10.3.2022-15.2.2023	23	6	

### 4.6. Sub-committees

In the last operating year there were two sub-committees of the Board of Directors at work: an Audit Committee and a Remuneration Committee, in addition to one shareholders' sub-committee, the Nomination Committee.

### **4.6.1.** Nomination Committee

The role of the Nomination Committee is to nominate candidates for SKEL's Board of Directors. According to its rules of procedure its aim is to establish a transparent and clear procedure for the nomination of Board members at the Company's Annual General Meeting. The procedure is intended to enable shareholders to make an informed decision regarding the election of candidates to the Board of Directors. Two external and independent persons, one with experience of recruitment and the other versed in the law, shall be elected annually by shareholders at the AGM to serve on the Committee for a term of one year. The third Committee member is nominated by the Board of Directors.

At the 2022 annual general meeting shareholders elected the following candidates to the Committee: Katrín S. Ólafsdóttr, CEO of Hagvangur, and Sigurður Kári Árnason, Head of Department at the Icelandic Ministry of Health. In addition, the Board of SKEL appointed Thórarinn Arnar Sævarsson, Board member, to serve on the Committee. Katrín and Sigurður are both independent of the Company, its day-to-day management and large shareholders in the Company, according to the definition of independence in corporate governance guidelines. Thórarinn is independent of the Company and its day-to-day management, but not its major shareholders.

At the first meeting of the Committee, Sigurður Kári was elected as the chairman. At the time of confirmation of this Corporate Governance Statement, the Committee has met six times in order to prepare a proposal for the Annual General Meeting in 2023, normally without the presence of the Board member. All meetings were fully attended by the external members, but the member appointed by the Board attended only the first meeting of the Committee. The Committee has met both with members of the Board of Directors of the Company, the CEO and shareholders. The Nomination Committee holds meetings with candidates for membership of the Board of

Directors following the adoption of this Corporate Governance Statement. The rules of procedure of the Committee can be accessed on SKEL's website.<sup>4</sup>

### 4.6.2. Audit Committee

The Audit Committee is a subcommittee of the Board of Directors of SKEL and is, as such, appointed by the Board for a term of one year at the first Board meeting following the annual general meeting. According to its rules of procedure, its objective is to seek to ensure the quality of financial statements and other financial information, and the independence of auditors. The Audit Committee is required to function in accordance with Icelandic laws and regulations and good corporate governance. The functions of the Audit Committee are the following:

- a) supervision of work processes in the preparation of financial statements;
- b) supervision of the arrangement and effectiveness of the Company's internal control and other supervisory functions;
- c) supervision of the auditing of the annual financial statement and consolidated financial statement;
- d) submission of a recommendation to the Board of Directors on the choice of auditor or auditing firm;
- e) assessment of the independence of the auditors or auditing firm and supervision of other tasks of the auditors or auditing firm.

The Audit Committee is also responsible for reviewing and assessing the quality of financial information and the arrangement of reporting information by management and auditors. The Committee annually reviews the Auditor's report on his/her work and independence and any material matters that may have emerged in the course of the audit. The Committee shall also follow up on the implementation of the recommendations contained in the auditor's report.

The Audit Committee also reviews the risk policy, risk appetite, risk criteria and the organisation and effectiveness of risk management in accordance with the Company's risk policy, and submits recommendations to the Board of Directors regarding changes, where warranted.

In 2022-2023, the Committee was composed of the Board members Guðbjörg Heiða Guðmundsdóttir and Pórarinn Arnar Sævarsson, together with Sigrún Guðmundsdóttir, certified public accountant. Sigrún was elected chairman of the Committee. The Committee members are independent of the Company, its day-to-day management and auditor; however, Þórarinn Arnar alone is not regarded as independent of large shareholders in the Company.<sup>5</sup>

### 4.6.3. Remuneration Committee

The Remuneration Committee is also a subcommittee of the Board of Directors of SKEL and is, as such, appointed by the Board for a term of one year at the first Board meeting following the AGM. According to its rules of procedure, the Committee's aim is to increase efficiency, establish clear procedures and improve the governance of the Board of Directors regarding remuneration matters in the Company.

The functions of the Remuneration Committee are the following:

- Review of the Remuneration Policy
- · Preparation of reports and proposals to the AGM regarding the Remuneration Policy
- Conclusion of contracts with the CEO and other management that reports to the Board
- Monitoring of the implementation of, and deviations from, the Remuneration Policy

<sup>&</sup>lt;sup>4</sup> https://www.skel.is/undirnefndir

<sup>&</sup>lt;sup>5</sup> See link above.

- Risk management in relation employment terms
- Evaluation of own work
- Review of workplace analyses

In the operating year of 2022-2023 the Committee was composed of Jón Ásgeir Jóhannesson, Sigurður Kristinn Egilsson and Nanna Björk Ásgrímsdóttir. Sigurður is independent of the Company, its day-to-day management, and major shareholders. Jón Ásgeir is independent of the Company and its day-to-day management, but not its major shareholders. Nanna Björk Ásgrímsdóttir is independent of the Company and its day-to-day management, but is not independent of its major shareholders. Jón Ásgeir was elected chairman of the Committee. The Committee held five meetings in the course of the year. All the meetings of the Committee were fully attended. The rules of procedure of the Committee can be accessed on SKEL's website.<sup>6</sup>

### 4.7. Executive Board

The CEO has charge of the day-to-day operation of the Company, and in this respect he or she shall observe the policy and instructions of the Board of Directors. The role, responsibility and authority of the CEO are further specified in the job description approved by the CEO and the Board of Directors in November 2022.

Ásgeir Helgi Reykfjörð Gylfason, CEO, was born in 1982. Ásgeir was appointed CEO of SKEL in April 2022, but took the post on 13 July 2022. Ásgeir also serves on the boards of companies owned by SKEL, *inter alia*, as chairman of the boards of Kaldalón, Orkan, Skeljungur and Gallon. Ásgeir has a BA and ML degree in law from Reykjavík University and is licensed to practice law. Ásgeir formerly held the post of Deputy CEO of Arion Bank. He has previously held the position of Head of Corporate Banking at Kvika Bank hf., Chief Legal Counsel at MP Bank, attorney at law at LOGOS Legal Services in Reykjavík and London, and before that served at Straumur Investment Bank in 2004-2009. Ásgeir was a member of the government's Working Group on the Removal of Capital Controls in 2015, which completed its work with the conclusion of a stability agreement that year. Ásgeir was an adjunct at Reykjavík University for a number of years, teaching securities market law etc.

Ólafur Þór Jóhannesson was Chief Financial Officer from 2019 to February 2022, was appointed Chief Executive Officer from February 2022, but left that post on 13 July 2022.

Árni Pétur Jónsson was Chief Executive Officer from August 2019, but left that post on 4 February 2022.

### 5. Policy on diversity

SKEL has not established a specific policy on diversity with regard to the Board of Directors or management, but the Company's current sustainability policy lays down the Company's points of focus regarding diversity. The Company emphasises diversity of qualifications and views among management and employees. This serves to create an attractive and fair working environment that contributes to the welfare of all staff.

SKEL's sustainability policy includes the following passage regarding the Company's policy on diversity:

"The Company welcomes diversity in society and among its employees and will not condone discrimination, harassment or bullying of any kind. The ambition of the Company is for the workplace to be safe in every regard. SKEL emphasises the sharing by the Company's partners of its fundamental

<sup>&</sup>lt;sup>6</sup> See link above.

values and endeavours to ensure that the Company does not engage in business with entities that do not respect human rights."

In its sustainability policy the Company has also set itself a policy on gender equality and bullying:

"Equality, where competence and performance are key, is an integral part of the Company's culture.

All employees of SKEL have the right to be treated with respect. Bullying, gender-related or sexual harassment will not be tolerated. Management is required to manage incidents in an appropriate manner where they arise and rigorously observe rules of procedure on the resolution of such incidents.

Work-related decisions shall be based on appropriate skills, merit and other work-related factors. In the determination of wages it shall be ensured that there is no discrimination based on gender. Employees shall be paid equal wages for work of equal value."

SKEL also has in place a Nomination Committee with the role and task of ensuring that the Company's Board of Directors is sufficiently diverse as regards capabilities, experience and knowledge. Among the viewpoints that the Committee is required to observe in assessing proposals for candidates for the Board of Directors is the need to assemble Board members with diverse points of emphasis and viewpoints.

Finally, the rules of procedure of the Board of Directors provide for a performance evaluation which extends, among other things, to the composition of the Board; and in December 2022 the Board carried out a detailed performance evaluation, which included a review of its composition.

See further the means by which the Company supports diversity in its disclosure of information on sustainability (non-financial information ) in its Annual Financial Report; the rules of procedure of the Board of Directors can be accessed on the Company's website.<sup>7</sup>

### 6. Decisions and judgments that concern SKEL

Over the past five years, the Company has been involved in two judicial proceedings and two administrative decisions:

On 15 December 2020, the Data Protection Authority issued a ruling in Case no. 2020010702 to the effect that SKEL's handling of an electronic mail box at the end of employment with the Company had not been in compliance with Act No. 90/2018 on personal privacy and the processing of personal data and Rules No. 837/2006 on electronic surveillance.

On 19 November 2021 a district court judgment was pronounced in Tromsö in Norway, where a claim made by Marine Supply AS regarding the joint liability of former managers of P/F Magn and SKEL, and the companies themselves, regarding an alleged violation of a declaration of confidentiality was upheld. The judgment was appealed. The court of appeal dismissed the case from court and sent it back to the District Court for due process. A new hearing on the case is scheduled for March 2023.

On 15 September Decision No. 30/2021 was published by the Competition Authority with the conclusion that SKEL had violated the provisions of Act No. 57/2005 on the surveillance of unfair business practices and market

<sup>&</sup>lt;sup>7</sup> See link above.

transparency by posting the statement "lowest prices and cheapest fuel prices". SKEL has responded to the Competition Authority's Decision and the case has been closed in the Authority's case file.

On 20 May 2022 the Court of Appeals, in case no. 189/2021, returned a judgment to the effect that the State of Iceland was required to reimburse to SKEL overpaid transport cost equalisation taxes for the years 2016-2019.

So approved by the Board of Directors of SKEL hf. 15 February 2023.

# Non-financial Information

# **Non-Financial Information**

### 1. About SKEL

SKEL Investment company hf. (hereinafter "SKEL" or the "Company") is a limited liability company listed on Nasdaq Nordic Iceland. This past year was SKEL's first year of operation following the division of the earlier Skeljungur hf. The division served to sharpen the points of focus of the Company's operation with the establishment of three independent operating companies, who took over operations which had previously been i) the Company's retail operations, ii) corporate services, and iii) the operation of depots. SKEL's operations and investments are conducted primarily in Iceland, but also in the Faroe Islands.

Orkan IS ehf. took over operations involving services to retail customers, including the operation of Orkan's service stations, Extra, 10-11, the Löður car wash stations, the Lyfjaval pharmacies and Íslenska vetnisfélagið, as well as the Gló restaurants. Skeljungur ehf. took over operations involving sales of goods and services to corporations, distribution, procurement and wholesale of fuel, lubricants, cleaning and chemical products and sales of fertiliser and other goods and services to corporations and farmers. Sales of goods and services to large-scale customers in fisheries, airline operations and contracting also form a part of the operations. Gallon ehf. took over the Company's depots and is responsible for their operation.

The year 2022 was marked to a significant extent by the process of dividing up the Company, as splitting up a company with a long history involves a number of challenges. Following the division the organisation and governance at the group level has been under review with the goal of enhancing and strengthening its corporate governance. Policies have variously been simplified, updated or abandoned to improve consistency with the Company in its current form. The policies and rules referred to in this disclosure have been approved by SKEL's Board of Directors. The Company's policies and rules can be accessed on its website.<sup>1</sup>

SKEL operates as an investment company with the objective of creating value for shareholders, subsidiaries and associated companies, as well as other stakeholders. The Company aims to create value by developing its asset portfolio, targeting long-term value creation with the objective of reducing the weight of fossil fuel in its operations by increasing the number of its sources of income and investments. SKEL aims to be a strategic investor and thereby to provide support and assistance to the companies, management teams and entrepreneurs in which the Company decides to invest. SKEL's staff and management will therefore support its partners in taking full advantage of all the opportunities of the enterprises that they operate, whether in the case of deep-rooted operating companies or good business ideas.

The values of SKEL Investment Company are:

- **Collaboration**: The strength of the team consists in combined experience, expert knowledge and mutual confidence. This teamwork idea extends also to the investment assets and other partners where participants work together to achieve goals.
- **Transparency**: Through transparency emphasis is placed on disclosures and discussions of SKEL, investments and future plans. SKEL emphasises transparency in all relations between employees, partners, regulators and the media.
- Accountability: Accountability consists in emphasising the professionalism of management and employees, who are held to account for their actions, words and results. Managers of investment assets are accountable for their own operations.

### 1.2. Asset portfolio

SKEL's strategy in its investments is to develop its current asset portfolio, targeting long-term value creation with the additional objective of reducing the weight of fossil fuel in its operations by increasing the number of its sources of income and investments. SKEL thus takes targeted actions to develop options within its asset portfolio that offer customers more environmentally sound options. At the same time, the Company strives to increase its positive impact on society and thereby create common value for the Company itself, society and the environment.

SKEL's asset portfolio is divided into the following five categories: consumer market, corporate market, infrastructure, real estate and financial markets.

### 1.2.1. Consumer market

- Orkan IS ehf. (100%) is the only company in Iceland that offers all energy supplies. Orkan operates 70 petrol stations, two hydrogen stations and one methane station, in addition to offering charging stations for electric vehicles. Orkan also operates nine retail outlets under the Orkan brand, 10-11 and Extra. In addition, Orkan manages holdings in the following companies: Löður (100%), Gló (100%), Íslenska Vetnisfélagið (90%), Lyfjaval (58%), Brauð og co. (38%), Straumlind (34%) and Clippers (23%). HERE is a link to Orkan's policies regarding sustainability.<sup>2</sup>
- Wedo ehf. (33%) Heimkaup (Wedo ehf.) is a progressive Icelandic online store and one of the largest in the country. Heimkaup's mission is to facilitate customers' shopping for the home and the workplace. The company offers a wide selection of goods, with alcoholic beverages as the most recent offering.

### 1.2.2. The Corporate Market

Skeljungur ehf. (100%) — Skeljungur's business primarily involves sales of goods and services to
corporations, distribution, procurement and wholesale of fuel, lubrication oils, cleaning and chemical
products and sales of fertiliser and other goods and services to corporations and farmers. Sales of goods
and services to large-scale customers in fisheries, airline operations and contracting also form a part of

-

<sup>&</sup>lt;sup>2</sup> https://www.orkan.is/um-orkuna/

- the operations. Skeljungur is also an agent for Shell in Iceland, in addition to managing holdings in Barkur (67%), EAK (33%), Fjölver and Ecomar (67%). HERE is a link to Skeljungur's sustainability website.<sup>3</sup>
- Sp/f Orkufelagið (48.3%) Orkufelagið is a holding company of shares in P/F Magn, which operates in the Faroe Islands. P/F Magn is one of the Faroe Islands' largest companies. Its business activities mostly involve wholesale, services, storage and distribution of fuel and retail operations. SKEL has accepted an offer from a Faroese company for all SKEL's shares in P/F Orkufelagið, 48.3%

### 1.2.3. Infrastructure

Gallon ehf. (100%) - Gallon is an infrastructure company based in Iceland. Its principal business activity
consists in receiving and delivering fuel from depots around Iceland. Gallon operates a total of six
depots, with the terminals all well situated along the shoreline. Gallon owns a total of 36 depot tanks.
Of these, the terminal in Örfirisey (Reykjavik) is by far the largest; other terminals are located in Akureyri,
Eskifjörður, Reyðarfjörður and the Vestmanna Islands.

### 1.2.4. Real estate

- Kaldalón hf (12.68 %) Kaldalón is a real estate company with a diverse portfolio of real properties
  distributed around the metropolitan area of the capital. The company leases out business premises,
  such as hotels, storage and industrial premises, retail and services premises and offices. Here is a link to
  Kaldalón's sustainability policy.
- Reir þróun ehf. (50%) Reir þróun was founded in 2022 by Fasti and SKEL who hold equal shares. The company holds development assets at various stages of development, focusing on residential properties
- Other assets Real properties in Litlatún 1 in Garðabaer and Austurströnd 7 in Seltjarnarnes. The real estate development companies Helgafellsásar, Öxl and Sp/f OMP.

### 1.2.5. Financial markets

• VÍS hf (8.97%) - VÍS is one of Iceland's largest insurance companies, with deep roots in Icelandic society. Its strong brand, solid history and extensive customer base represent significant value. Here is a link to VÍS's sustainability policy.

### 2. Principal risks relating to non-financial factors

Following the splitting up of the Company and after the Company's objects were changed to investment, the Company has a small overhead, which means that the direct risk of environmental, social and human resource matters in the Company's operations is limited. The risk is primarily concentrated in the Company's investments. The risk resulting from environmental changes is diverse. The Company's largest investments are in companies that import, store and sell fossil fuels to retail and corporate customers. For reasons of climate change and government targets regarding energy transition it is foreseeable that sales of fossil fuels will not be as significant as before in the vehicle fuel market. SKEL is therefore stressing the importance of its companies' developing their respective business operations in line with the changing times.

Companies in the fisheries sector are large customers of SKEL, and the biosystem of the sea is interlinked with the interests of the fisheries companies. Acidification of the oceans is therefore a climate change that could have a significant impact on the operation of these companies in the long term. To meet this risk the companies are constantly endeavouring to reduce their environmental impact and to support the government's energy transition targets. To give an example, Skeljungur and Gallon have signed the first memorandum of understanding on the sale and distribution of electrofuel in Iceland, which will be an important factor in the energy transition in fisheries and maritime transport. At the same time that environmental changes are occurring as a result of global warming extensive social and technological changes are also taking place. There is a growing emphasis on green energy

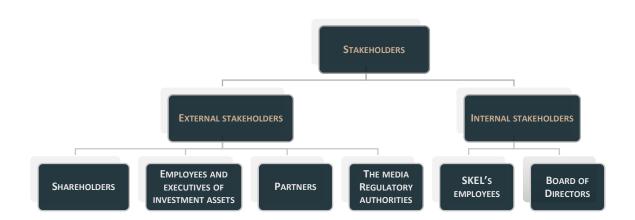

<sup>&</sup>lt;sup>3</sup> https://www.skeljungur.is/sjalfbaerni

sources and much progress has been made in the development of electric vehicles, which have grown significantly in number in recent years. This may result in reputation risk arising from the business activities of companies that sell fossil fuels. In order to respond to this risk the Company's investments in enterprises that sell fossil fuels have been adding green energy sources to their product offerings, e.g. in the form of hydrogen, electricity, biodiesel, more environment-friendly lubricants and tar removers. Also, investments in the company Klettur have been finalised, bringing SKEL into active participation in the infrastructure development that will be needed for the targets of the government regarding energy transition to be met.

Following the splitting up of SKEL's business operation there are no precise reference figures available to enable emission targets to be set for the operating companies held by SKEL. The year 2022 will be the first year of operation of the companies in their current form, and so that year will be used as a reference year. All the companies use Klappir's systems to monitor emissions of greenhouse gasses and energy consumption, and SKEL has issued recommendations to its companies to establish targets on reducing their emissions.

### 3. Stakeholders

Stakeholders have been defined as individuals, groups or legal persons who are impacted by and can have an impact on the operation of organisations. A distinction is made between external stakeholders and internal stakeholders. Information on the business activities of SKEL shall be accessible and easily understandable so that stakeholders have a clear insight into the Company's business activities and understand the reasoning underlying decisions made.

### 3.1. External stakeholders

Shareholders: We emphasise detailed and timely disclosure of information to enable shareholders and market players to acquire a deep knowledge of the operation and performance of the Company. We endeavour to explain SKEL's strategy and future vision, challenges and opportunities and the overall development of the Company. We are accountable to other shareholders in investment assets where SKEL has a controlling interest.

Employees and executives of investment assets: SKEL emphasises support for the managers of the companies in which SKEL invests and helping them to develop competitive enterprises that are favourably positioned to achieve results in their respective sectors. SKEL encourages the companies to offer an attractive and stimulating working environment where good work is rewarded.

Partners: SKEL's principal partners are banks, brokers and analysts.

The media and regulatory bodies: The media disseminate information about the Company to the public and can therefore have a significant impact on the Company's reputation and image.

Regulatory bodies play an important role for society, and SKEL follows a policy of responding to all queries within set time limits in a clear and detailed manner.

### 3.2. Internal stakeholders

Employees: Interactions in the workplace are characterised by openness and integrity. SKEL offers a competitive and flexible working environment that supports career development.

Board of Directors: The Board of Directors makes strategic decisions for the Company and is ultimately responsible for its business operations.

### 4. Environmental factors

SKEL is working on reducing the environmental impact that the business activities of the Company and its investments may entail, e.g. by monitoring developments in environmental affairs and incorporating innovations into its operations. The Company complies with legal and regulatory requirements that apply to environmental matters.

SKEL uses Klappir's system in calculating and keeping records of the Company's carbon footprint in Scopes 1, 2 and 3. At year-end 2021, Skeljungur hf.'s consolidated operation was split up into four companies: SKEL Investment Company hf., Skeljungur ehf., Orkan IS ehf. and Gallon ehf. Previously, Klappir's system had kept records of the combined carbon footprints of all the companies, but in 2022 work was started on splitting up the records.

The Company's carbon footprint in Scopes 1 and 2 is 43,1 tCO<sub>2</sub>. Since SKEL is an investment company with a limited overhead it was foreseeable that the Company's carbon footprint in Scopes 1 and 2 would be small. The Company's carbon footprint in Scope 3 was not available when the financial statements where published but will be completed when the investment assets have delivered year end actual data for the year 2022.

In 2019 it was announced that the Company intended to reduce the weight of fossil fuels in its asset portfolio (see <a href="here">here</a>). In pursuance of this strategy SKEL has increased the weight of sustainable energy in its investments over the year. The projects undertaken in 2022 that support the United Nations Sustainable Development Goals are the following:

- SKEL invested in the electricity supplier Straumlind, which offers the lowest prices of energy for domestic use in Iceland. The future vision of Straumlind is to make the electricity system "smarter". With the use of data science and artificial intelligence utilisation in the electricity system can be maximised, cost minimised and energy balance enhanced.
- In the course of the year an offer was accepted to buy the Company's entire holding in Sp/f Orkufelagid, an oil company in the Faroe Islands. This was in line with the Company's target of reducing the weight of fossil fuel in its portfolio.
- Skeljungur and Gallon have entered into memorandums of understanding with the Danish CI Energy Transition Fund I on exploring the possibilities of the two companies buying electrofuel from the Fund for distribution and sale, e.g. to Icelandic users. CI Energy Transition Fund I is a new fund owned by Copenhagen Infrastructure Partners (CIP) and the world's largest fund dedicated to investment in projects relating to green electrofuel. The government's target of achieving energy transition in the fisheries sector will only be achieved if shipping companies and fisheries operators can substitute fossil fuels with other more environment-friendly energy sources. CIP, Skeljungur and Gallon are of the opinion that electrofuel is the way to put an end to the release of carbon dioxide in maritime operations.
- From the outset Orkan has carbon neutralised all its operations in Iceland through the Wetland Fund
  and the company offers its environment-conscious customers the option of doing the same. Users of
  Orkan's Orkulykill tag for fuel purchases can use part of their discount to carbon neutralise their fuel
  purchases through the Wetland Fund.

One project that started in 2022 and supports the United Nations Sustainable Development Goal on decent work and economic growth and innovation and development is the acquisition of the company Kletttur og þjónusta ehf.,

which was finalised at the start of 2023. Klettur engages in importation and maintenance services of heavy machinery and will play an important role in the maintenance and development of Iceland's infrastructure in the coming years.

SKEL will continue to seek investment opportunities in sustainable energy sources that represent a good fit with the Company's current investment portfolio and to exert influence within its current portfolio. See further here.

### 5. Social factors

SKEL has the interests of its employees at heart and respects all job-related rights of its employees in conformity with the lawful rights of wage earners. SKEL promotes equality in the workplace and objective and fair relations. Bullying and other harassment is not tolerated. Equality, where competence and performance are key, is an integral part of the Company's culture.

SKEL's objective is to have in its ranks enthusiastic, qualified employees who exhibit initiative and ambition in their work and play an active role in continually improving the Company. SKEL's employees participate in shaping and improving the Company's business operation.

SKEL seeks to offer its employees a quality working environment. The Company promotes a good balance between work and private life with respect for the family conditions of employees. Support from management, motivation and regular management feedback are a part of shaping a good working environment, in combination with mutual support among employees.

The Company is also resolved to promote opportunities for employees to acquire added knowledge and education that contribute to the advancement of their careers.

On average there were seven employees working for the Company in the course of the year, three women and four men. At year-end 2022 the Company had seven employees, two women and five men. Since the Company's employees are so few, all engaged in different and specialised work, it was not considered efficient to obtain equal pay certification.

Over the year 2022 there has been a considerable turnover in staff in the Company, largely as a result of the division of the Company referred to earlier. The average number of full-time employees over the year was seven, but three employees left the Company in the course of the year, one woman and two men, putting the staff turnover at 43%.

SKEL resolves to comply with the requirements of law, rules and ethical criteria that apply to human rights. The Company welcomes diversity in society and among its employees and will not condone discrimination, harassment or bullying of any kind. The ambition of the Company is for the workplace to be safe in every regard.

SKEL emphasises the sharing by the Company's partners and investments of its fundamental values and endeavours to ensure that the Company does not engage in business with entities that do not respect human rights. See further details of SKEL's policy <a href="https://example.com/here">here</a>.

### 6. Governance

The Board of Directors and management of SKEL Investment company hf.: ("SKEL") place great emphasis on the observance of good governance. Good corporate governance, in the view of the Board of Directors and management, is the foundation for both trust and management accountability, both of which contribute to good decision making and good relations among the Board, employees and other stakeholders of the Company,

SKEL's governance is in compliance with laws and rules that apply to the Company's business activities. SKEL has listed securities in the Icelandic Stock Exchange (Nasdaq Iceland hf.) and is therefore also required to observe the guidelines on corporate governance issued by the Iceland Chamber of Commerce, Nasdaq Iceland hf. And the Confederation of Icelandic Employers, 6<sup>th</sup> edition, 2021. The Guidelines are accessible on the website of the Iceland Chamber of Commerce. SKEL's governance is also in compliance with the Company's internal rules, which are posted on the Company's website, www.skel.is.

The Board of Directors of the Company is composed of a diverse group of people possessing a wide range of skills, experience and expertise. A Nomination Committee works in the service of the Company with the objective of implementing a transparent and clear arrangement of nominating candidates for membership of the Board. The Board of Directors is composed of two women and three men,.

Following the division of SKEL, the establishment of its operating companies and the change in the Company's objects, the organisation and governance at the group level has been under review with the goal of enhancing and strengthening good governance. Policies have variously been simplified, updated or abandoned to improve consistency with the Company in its current form.

Further details of the Company's Corporate Governance Statement, the rules of procedure of the Board of Directors and the Nomination Committee can be accessed <a href="here">here</a> and in an annex to the annual financial statement.

### 6.1. Sustainability Policy and actions against corruption and bribery

SKEL conducts its business activities with integrity and resolves to comply with law, rules and general criteria regarding business integrity and observe the rules established by the Company at any time. SKEL will not accept or contribute anything that could be categorised as bribery, nor will it do business with persons where there is any suspicion of money laundering. All business activities conducted by the Company shall be specified in the Company's accounts in line with accepted rules of procedure and subject to auditing. SKEL will avoid any conflicts between the interests of employees and those of the Company.

### 7. Reliability of non-financial disclosures

The summarized figures on non-financial information for 2022 were prepared in co-operation with Klappir Green Solutions hf. The key performance indicators used by Klappir reflect the environmental, social and governance (ESG) factors in SKEL's business operation. The guidelines issued by Nasdaq in Iceland and the Nordic Countries in March 2019 are used for reference. Reference is also made to the relevant criteria of the GRI Standard (Global Reporting Initiative, GRI100-400) and the Reporting Principles of the United Nations Global Compact (UNGC, P1-10).

	550	<u>=====</u>
Environmental (E)	Social (S)	Corporate Governance (G)
E1. GHG Emissions	S1. CEO Pay Ratio	G1. Board Diversity
E2. Emissions Intensity	S2. Gender Pay Ratio	G2. Board Independence
E3. Energy Usage	S3. Employee Turnover	G3. Incentivized Pay
E4. Energy Intensity	S4. Gender Diversity	G4. Collective Bargaining
E5. Energy Mix	S5. Temporary Worker Ratio	G5. Supplier Code of Conduct
E6. Water Usage	S6. Non-Discrimination	G6. Ethics & Anti-Corruption
E7. Environmental Operations	S7. Injury Rate	G7. Data Privacy
E8. Climate Oversight / Board	S8. Global Health & Safety	G8. ESG Reporting
E9. Climate Oversight / Management	S9. Child & Forced Labor	G9. Disclosure Practices
E10. Climate Risk Mitigation	S10. Human Rights	G10. External Assurance

Klappir's environment software maintains records of calculations of the Company's carbon footprint, Scopes 1, 2 And 3, based on the GHG Protocol.

Klappir's Sustainability Platform is used to ensure traceability, transparency and efficiency in collecting and disseminating ESG information. Information on the use of fuel and electricity, hot water and cold water is collected automatically from suppliers.

Information on social factors and governance are recorded manually by SKEL's employees. The origin of data can be traced from the Klappir information system.

Reitun ehf. analyses and assesses the situation of the Company as regards risks relating to environmental, social and governance matters. The Company has thereby obtained a third-party assessment of its situation regarding the ESG policy area.

This Annex containing information on ESG factors was prepared by the appropriate responsible parties within SKEL. The Annex has not been audited by a third party, but was reviewed by SKEL's Audit Committee and Board of Directors. The disclosures on non-financial factors are in compliance with Act No. 3/2006 on annual accounts, Article 66 (d), which lays down the provisions on non-financial disclosure.
