

Nexstim

Nexstim has placed an NBT® System with SmartFocus® technology to Stanford University Medical Center

Press Release, Helsinki, 14 October 2019 at 3.00 pm (EET)

Nexstim Plc (NXTMH:HEX, NXTMS:STO) ("Nexstim" or "Company") – the company developing and marketing a unique brain stimulation technology for personalized treatment of major depressive disorder (MDD) – announces that it has placed an NBT® system with SmartFocus® TMS technology to Stanford University Medical Center, US.

Stanford University Medical Center uses the NBT® system for treatment of hospitalized patients suffering from treatment resistant depression. The first patient has already completed the SmartFocus® TMS therapy period there.

Martin Jamieson, Chairman and CEO of Nexstim, said: *"We are happy that such a prominent university hospital has started to use our NBT® system with the unique SmartFocus® technology and has successfully completed the treatment series for the first patient. This cooperation strengthens our position in the US market, where there seems to be a clear demand for the novel, personalized TMS therapy that our SmartFocus® technology is able to deliver."*

About Nexstim Plc

Nexstim is a Finnish, globally operating medical technology company. Our mission is to enable personalized and effective therapies and diagnostics for challenging brain diseases and disorders.

Nexstim has developed a world-leading non-invasive brain stimulation technology called SmartFocus®. It is a navigated transcranial magnetic stimulation (nTMS) technology with highly sophisticated 3D navigation providing accurate and personalized targeting of the TMS to the specific area of the brain.

SmartFocus® technology is used in Nexstim's proprietary Navigated Brain Therapy (NBT®) system, which is FDA cleared for marketing and commercial distribution for the treatment of major depressive disorder (MDD) in the United States. In Europe, the NBT® system is CE marked for the treatment of major depression and chronic neuropathic pain.

In addition, Nexstim is commercializing its SmartFocus® based Navigated Brain Stimulation (NBS) system for diagnostic applications. The NBS system is the only FDA cleared and CE marked navigated TMS system for pre-surgical mapping of the speech and motor cortices of the brain. Nexstim shares are listed on the Nasdaq First North Growth Market Finland and Nasdaq First North Growth Market Sweden.
