Madrid, 26 September 2019

Vestas closes 88 MW contract in Greece

Vestas has won an undisclosed order for an 88 MW wind park in Greece with a 20-year Active Output Management 4000 (AOM 4000) service agreement.

For this order, Vestas has developed a solution that includes the supply and installation of 21 V136-4.2 MW turbines equipped with Vestas Anti-Icing System to optimise performance in the sites' specific climatic conditions. This solution will minimise the risk of icing on the turbine blades, maximising energy production in cold climate conditions.

Turbine delivery is planned for the second quarter of 2020, whilst commissioning is planned for the second half of the same year.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 105 GW of wind turbines in 80 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 86 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 24,500 employees are bringing the world sustainable energy solutions to power a bright future.
