MARKET REBOUND - POSITIONING FOR 2021

HIGHLIGHTS

- Operating income of USD 43.3 million (Q3 2019: USD 31.7m)
- EBITDA of USD 5.9m (USD 8.1m)
- Net result of USD -4.2m (USD 0.3m)
- Net TCE per ship of USD 9 067 per day versus BSI index of USD 9 435 net per day
- 75 per cent of remaining ship days in 2020 are booked at USD 9 000 net per day
- All financing secured till May 2024 onwards after refinancing of SOFIE VICTORY
- Imabari newbuilding delivery amended from Q4 2020 to Q1 2021
- Belships regarded as leading within corporate governance by Danske Bank and on course for delivering emission cuts in line with industry ambitions for 2030
- Commercial platform expanded Lighthouse Navigation
- Modern fleet of 23 vessels with an average age of 5 years including newbuildings

Fleet status

Time charter earnings per ship in the quarter were recorded at USD 9 067 net per day versus BSI index of USD 9 435 net per day for the same period. Average net TCE per ship in the last twelve months amounted to USD 9 263 versus BSI index of USD 7 783 net per day for the same period, representing an outperformance of the BSI index of 19 per cent.

Our long-term outperformance of the BSI index is due to the portfolio of period charter coverage and outsized spot earnings earned by our subsidiary Lighthouse Navigation. The inherent lag in our business means that when the spot markets fall, our outperformance will tend to be higher. Oppositely, when the markets rise rapidly our performance will tend to lag on a short-term basis.

Approximately 30 per cent of remaining ship days in the next four quarters are booked at about USD 10 000 net per day. About 75 per cent of available days in Q4 have been booked at about USD 9 000 net per day.

BELINDA and BELNIPPON (time-chartered vessel) were drydocked in the quarter. The remaining fleet sailed without significant off-hire in the quarter.

BELFAST, an Ultramax newbuilding of 64 000 dwt currently under construction has been amended to deliver January/February 2021 instead of December 2020.

Belships' fleet modernisation is set to continue with the delivery of newbuildings BELFAST and BELMAR scheduled for delivery during 2021. Belships' fleet continues to increase and improve with only modest cash investments, signalling the competitive advantage Belships has in sourcing ship finance. Taking into consideration the recent nine acquisitions and two divested vessels at a net cash effect of about USD 3m. The Japanese Ultramax bulk carriers entering the fleet represent the highest quality and lowest fuel consumption available in the market today.

Commercial platform

Lighthouse Navigation has expanded its commercial platform with new offices established in Singapore, Melbourne and most recently Oslo. The aim of this expansion is to further enhance the vessels earning capability and to generate profits around cargo trading opportunities in the market. We expect this part of our business to expand further during 2021.

Sustainability

Belships is regarded as a market leader in corporate governance. Belships is also well placed and on course to deliver emission cuts in line with industry ambitions for 2030. A new carbon footprint study and review has been initiated with leading classification society DNVGL with the aim to monitor performance and identify areas for improvement. With continued fleet modernisation we expect to produce positive results.

Financial and corporate matters

At the end of the quarter, cash and cash equivalents was USD 35.5m, while mortgage debt was USD 142.7m. During the quarter, the loan agreement related to the vessel SOFIE VICTORY was amended in order to prolong the maturity and reduce the loan margin. The group's mortgage debt now comprises two loan facilities, both with a margin of 275 basis points above LIBOR and maturity in Q2 2024.

Net leasing obligation at the end of the quarter was USD 143.9m. Leasing liabilities have been calculated under the assumption that Belships will exercise its options to acquire all seven Ultramax bulk carriers on bareboat charter, whereas we have assumed that the company will not exercise the purchase options on time-chartered vessels BELNIPPON and BELFUJI. Belships has no contractual obligation to acquire any of its leased vessels.

At the end of the quarter, book value per share amounted to NOK 6.21 (USD 0.65), corresponding to an equity ratio of 32 per cent.

Market highlights

In the third quarter we observed a significant improvement in the spot rates with the Baltic Supramax 58 index averaging USD 9 435 net per day. This is compared to an average of USD 5 210 net per day in the second quarter evidencing a strong rebound since the outbreak of COVID-19.

As some economies began to reopen, demand rebounded from historical lows, with September being the first month showing positive year-on-year growth since the COVID-19 outbreak. Total Supramax shipment volumes came in at 261.3 million metric tons for the quarter, which marked a 9.6 per cent increase from 238.5 million metric tons in Q2. Of the main commodity groups, minor bulks and iron ore made the strongest recovery, growing by about 14 per cent. Seasonal grain shipments also increased markedly by 11 per cent, whereas steels grew by 2.2 per cent.

According to Fearnleys, new vessel deliveries dropped to 26 in Q3 from 43 in the previous quarter, which marked the lowest number of deliveries last two years. The orderbook delivery schedule for next year predict deliveries will be 25 per cent lower than this year, with 115 vessels scheduled for 2021 against 150 vessels this year. In 2022, just 28 vessels are currently scheduled for delivery, which would be the lowest number of deliveries since 2000. In relative terms, we are heading towards the lowest rate of supply growth in almost 30 years. The publicly quoted orderbook indicates fleet growth will drop to about 2 per cent by the end of next year (from currently 4.5 per cent) and in 2022 it will drop further to about 0.5 per cent. There will be changes to this outlook for fleet growth as the amount of newbuilding orders being placed over the next 6-9 months are uncertain and it is also normal that 10-20 per cent of the orderbook ends up being cancelled, deferred or simply incorrect.

However, we expect very few newbuilding orders as lack of conviction for fuel and propulsion systems will restrain ordering activity in the near term.

Outlook

The Baltic exchange Supramax index in October averaged USD 10 202 net per day. Freight Forward Agreements (FFA) currently indicate a market for Supramax and Ultramax of about USD 9 400 and 10 400 per day for the remaining part of the year. The softer sentiment in the market during the recent weeks can to some extent be attributed to weak demand outside China, reduced iron ore and coal demand towards the end of the year coupled with usual seasonal slowdown approaching in January and February.

As we mentioned in our previous report, whilst total volumes shipped has rebounded, the supply side has needed to adjust in order to sustain a recovery in rates. The publicly quoted orderbook for our segment now stands at 5 per cent – historically low – and we expect this to lay the foundation for a potentially strong market in 2021. Furthermore, the average sailing speeds have increased which will help the fleet reach higher utilisation levels in a stronger market. We are therefore more optimistic in terms of market prospects, with the main downside risks to our outlook being short term potential lockdowns and year-end import reductions. Belships has a significant part of the fleet contractually covered for the next two quarters.

Belships has a uniform and modern fleet of 23 Supramax/Ultramax bulk carriers whereof nine of our vessels are financed with purchase option agreements. This creates substantial upside and flexibility to capitalise on a potential recovery towards historical averages for vessel values in the future. We are focused on maintaining a solid balance sheet and liquidity position. Our strategy is to continue developing Belships as an owner and operator of geared bulk carriers, through quality of operations and target accretive growth opportunities.

DEFINITION OF NON-IFRS FINANCIAL MEASURES

The Group's financial information is prepared in accordance with international financial reporting standards ("IFRS") as adopted by the European Union. In addition, it is the management's intention to provide alternative performance measures that are regularly reviewed by management to enhance the understanding of the Group's performance, but not instead of, the financial statements prepared in accordance with IFRS. The alternative performance measures presented may be determined or calculated differently by other companies. Due to the recent establishment of the enlarged Group, Management is in the initial phase of assessing its external financial reporting and performance measures are therefore subject to change.

The alternative performance measures are intended to enhance comparability of the results and to give supplemental information to the users of the Group's external reporting.

- Time charter equivalent (TCE) is defined as freight revenues less voyage expenses divided by the number of available on-hire days
- Current ratio is defined as total current assets, divided by total current liabilities
- EBITDA is defined as operating result adjusted for depreciation and amortisation, other gains/(losses), interest
 income, interest expenses and other financial items
- EBIT is defined as operating result adjusted for interest income, interest expenses and other financial items
- Equity ratio is equal to shareholders' equity including non-controlling interest, divided by total assets
- Interest coverage ratio is equal to earnings before interest and taxes (EBIT), divided by interest expenses

NOTES TO THE CONSOLIDATED ACCOUNTS

The consolidated financial statements are presented in USD thousands unless otherwise indicated

Note 1 Accounting principles

These interim financial statements have been prepared in accordance with International Accounting Standard (IAS) 34, "Interim Financial Reporting". They do not include all of the information required for full annual financial reporting and should be read in conjunction with the consolidated financial statements of Belships for the year ended 31 December 2019.

EPS is calculated based on actual outstanding shares in Belships ASA.

This report was approved by the Board of Directors on 11 November 2020.

Note 3 Ships

At the end of each reporting period, the Company assesses whether there are any impairment indicators present. The Company has concluded that the ongoing COVID-19 outbreak is an impairment indicator pursuant to IAS 36. Consequently, Belships carried out an impairment test of ships owned or recognised as right-of-use assets at the end of the quarter.

The Company considers each ship as a separate cash-generating unit and has compared recoverable amounts against carrying amounts at the end of the quarter. Recoverable amounts are based on value-in-use and have been derived from calculation of present value of estimated cash flows over the useful life of the ship. Assumptions represent management's best estimate of the range of economic conditions that will exist over the remaining useful life of the ships. The value-in-use calculations are mainly sensitive to changes in revenue and cost of capital assumptions. Revenues have been based on current contracts and long-term historical rates for equivalent ships derived from the Baltic Supramax market index. OPEX and CAPEX estimates have been derived from the budgets approved by Board of Directors. Cash flows have been discounted using a cost of capital of 6.0 per cent.

At the end of Q2 2020, recoverable amounts were higher than carrying amounts for all ships, except for the four oldest vessels in the fleet. Consequently, Belships recorded an impairment loss of USD 4.9m in the second quarter.

At the end of Q3 2020, recoverable amounts were higher than carrying amounts for all ships and no impairments were recorded.

The Company has performed sensitivity tests on the assumptions used in the impairment tests. Reducing the long-term rate by 10 per cent per day would have led to an impairment recognition of USD 52.4m in total. At the end of the quarter, an increase of one percentage point cost of capital would have resulted in impairments of USD 2.8m in total.

Note 4 Mortgage debt

Belships entered into a new USD 140m loan facility in April 2019. The first tranche of USD 110m replaced previous loan arrangements. The loan has a margin of 275 basis points over LIBOR and matures in Q2 2024. Following a voluntary prepayment in January 2020, the next instalment on the first tranche is due in Q2 2021.

The second tranche of USD 30m was made available for fleet expansion and utilised to acquire BELCARGO, BELFRI and BELHAVEN. The second tranche has a margin of 275 basis points over LIBOR and semi-annual repayments of USD 1.2m.

The USD 14m loan acquired as part of the acquisition of shares in Sofie Victory AS was amended in Q3 2020. The margin was reduced to 275 basis points over LIBOR and the maturity was extended until Q2 2024, with semi-annual repayments of USD 0.5m.

Total mortgage debt at the end of the quarter amounted to USD 143.7m. Transaction costs related to the mortgage debt were initially recorded as a reduction of debt in the balance sheet and subsequently amortised over the loan period in accordance with the amortised cost principle.

Belships was in compliance with all covenants at the end of the quarter.

Note 5 Leasing

In January, newbuilding BELFUJI was delivered. The ship is leased on time charter for a period of 8 years and increased leasing liabilities at the end of the first quarter by USD 15.5m.

In January, newbuilding BELMOIRA was delivered. The ship is leased on bareboat charter for a period of 7 years and increased leasing liabilities at the end of the first quarter by USD 25.0m, including the USD 3.0m prepayment made in 2019.

In February, newbuilding BELAJA was delivered. The ship is leased on bareboat charter for a period of 7 years and increased leasing liabilities at the end of the first quarter by USD 25.0m, including the USD 3.0m prepayment made in 2019.

Leasing liabilities at the end of the quarter arising from bareboat obligations and long-term time charters were USD 143.9m. Corresponding right-of-use assets, including upfront payments relating to the purchase options, were recorded at USD 160.7m.

Belships has no obligation to purchase any of the leased vessels.

Note 6 Financial instruments

Forward Freight Agreements (FFA) are measured at fair value at the end of each reporting period. Net loss from unrealised fair value changes and realised positions amounting to USD 0.3m have been included in other gains and losses. At the end of the quarter, the remaining FFA portfolio comprised 900 days at an average rate of USD 9 600 per day.

Note 7 Subsequent events

No other material events have taken place after 30 September 2020.
