Total

418 projects

Gross (total) portfolio

~ 38,000 MW

Probability weighted portfolio

~ 19,000 MW

We renew the way the world is powered

- **IEA:**

- Global renewable capacity will increase to 2.5 times its current level by 2030 under existing policies

- **Bloomberg NEF:**

- Annual growth rate for global solar, onshore, and offshore wind to increase further towards 2030

- **EU:**

- Proposed targets to boost renewable share to 65-75% of total energy consumed by end-users by 2040

- **Statkraft:**

- Targeting an annual development rate of 2.5-3 GW new capacity by 2025 and 4 GW by 2030

Key financial figures

Quarter

Strong results, but considerable drop from extraordinary levels in 2022

- Power prices significantly reduced
- Lower contribution from Markets
- Less hedging gains

Full year

Second highest EBIT for a year. Decrease driven by

- Drop in power prices
- Lower contribution from Markets
- Higher operating expenses

Net profit positively impacted by

- Value changes from embedded EUR derivatives
- Gain from divestments
- Reversal of impairments

8 * Underlying figures, see definition in alternative performance measures in financial reports

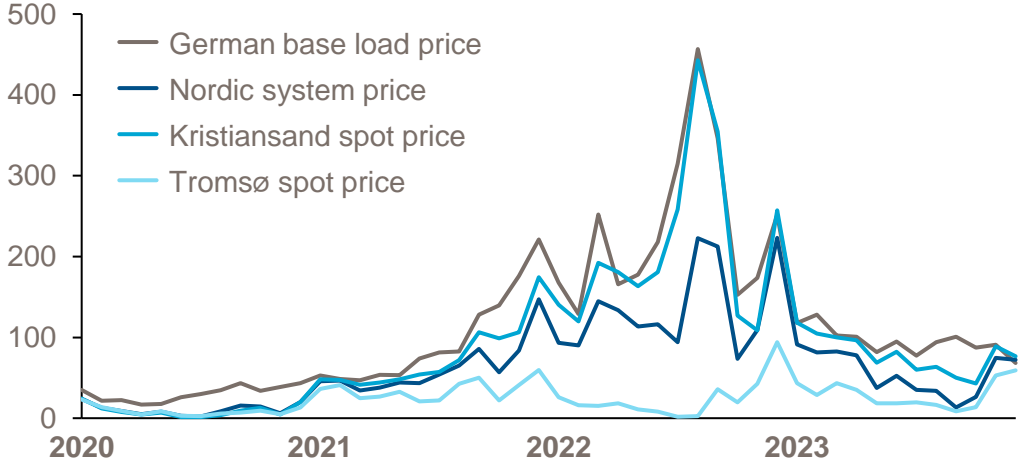

Drop in energy prices from 2022

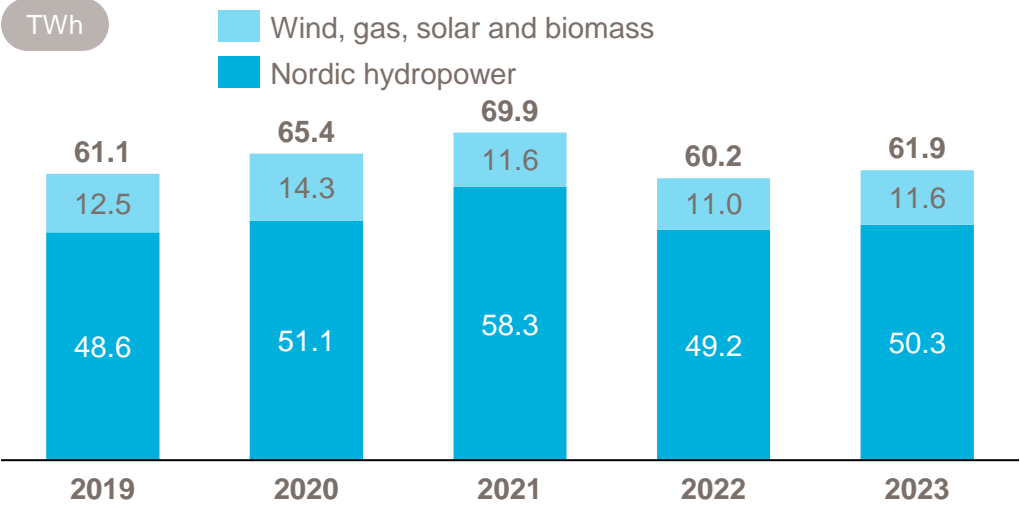

- Factors impacting power prices:
 - Gas, coal and CO₂ prices
 - Reservoir situation
- Reduced spread between Nordic price areas in 2023

Power prices – 2020-2023

¹ Nordic reservoir capacity in percent of median.
 Sources: Nord Pool, European Energy Exchange.

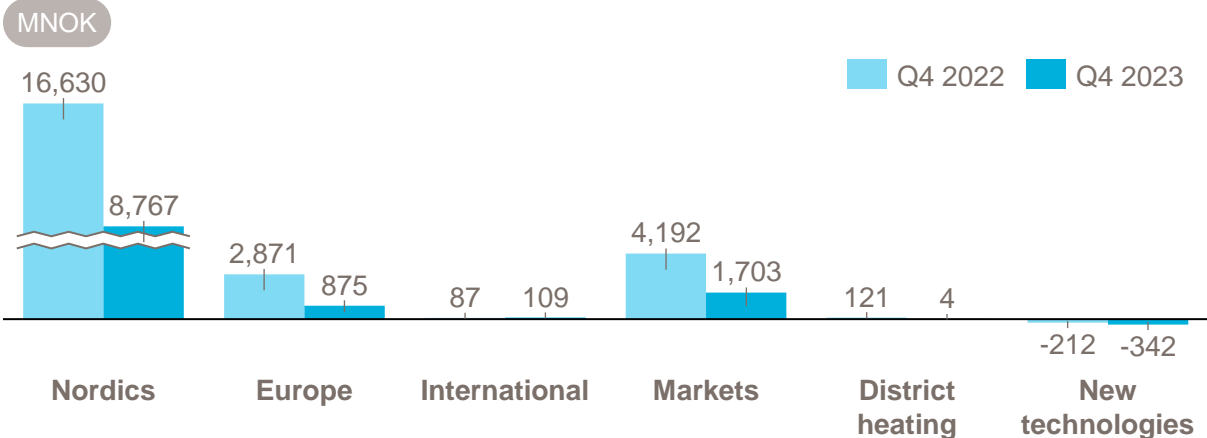

Power generation

- Q4 power generation up 19% from the same quarter in 2022
- 2023 power generation up 3% year-on-year
- Increase driven by higher Nordic hydropower generation

Underlying EBIT - Segments

Quarter

Nordics

- Down due to lower power prices and hedging effects

Europe

- Decrease related to financial hedging

Markets

- Drop related to trading and the discontinued dynamic asset management portfolios

Full year

Nordics

- Underlying EBIT - decrease related to lower power prices and embedded derivatives

Europe

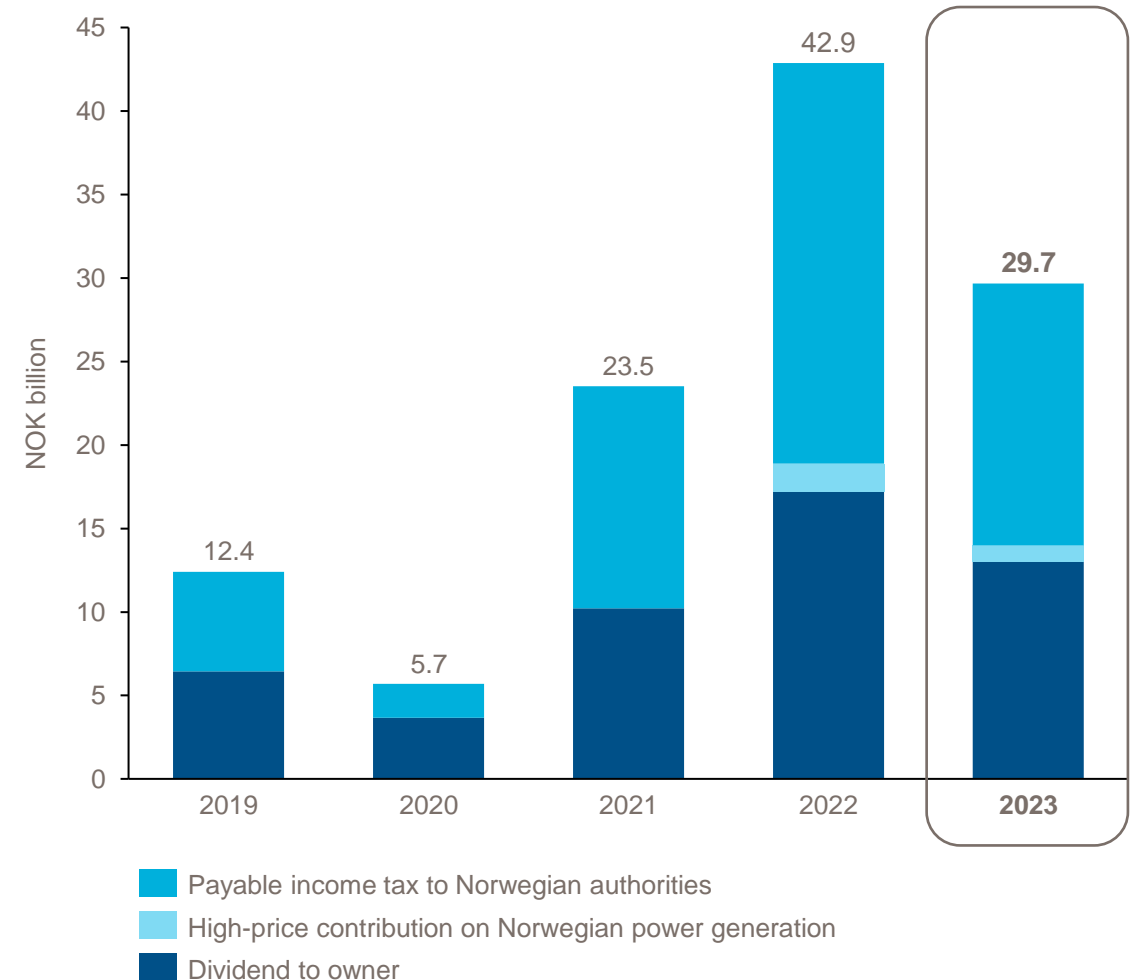

- Increase related to financial hedging

Markets

- Decline related to trading

Solid contribution to owner of NOK 29.7 billion*

- Proposed dividend of NOK 13.0 billion for 2023
- Payable income tax of NOK 15.7 billion
- High-price contribution of NOK 1.0 billion**
- Solid return on capital over time
 - ROACE of 29% in 2023
- Retained earnings of NOK 13.1 billion***
 - To be reinvested in profitable renewable energy projects

* Statkraft SF figures

12 ** Introduced from 28 September 2022. Lasted until 1 October 2023.

*** Net profit for Statkraft SF Group - Dividend

Investment program – 2023

New capacity investments – Business models:
 DS: Develop – Sell; DBS: Develop – Build – Sell; BOO: Build – Own – Operate

- Maintenance investments primarily related to Nordic hydropower
- New capacity primarily related to wind and hydropower projects in Brazil and Chile
- Other investments related to grid, district heating and EV charging
- Investments in shareholdings related to wind farms in Germany and France as well as remaining shares in Brazilian subsidiary

Cash flow – Q4

Cash flow from operations

- Positive working capital movements of NOK 1.8 billion
- Net cash outflow from margin calls of NOK 1.4 billion
- Taxes paid of NOK 8.9 billion

Investing activities

- Property, plants and equipment of NOK 2.6 billion
- Acquisition of a portfolio of operating wind farms in Brazil of NOK 2.1 billion

Financing activities

- Issuance of two EUR 0.5 billion bonds
- Issuance of commercial paper of NOK 2.8 billion

Summary

- Strong financial results despite lower power prices
- Strengthened position through acquisitions
- Robust financial position and solid foundation for further growth
