ABOUT IMMUNICUM AB (PUBL)

Immunicum is establishing a unique immuno-oncology approach through the development of allogeneic, off-the-shelf cell-based therapies. Our goal is to improve survival outcomes and quality of life by priming the patient's own immune system to fight cancer. The Company's lead product ilixadencel, consisting of pro-inflammatory allogeneic dendritic cells, has the potential to become a backbone component of modern cancer combination treatments in a variety of solid tumor indications. Immunicum has evaluated ilixadencel in several clinical trials including the recently completed exploratory Phase II MERECA study in kidney cancer and the Company is moving towards late-stage clinical development. Founded and based in Sweden, Immunicum is publicly traded on the Nasdaq Stockholm. www.immunicum.com

ABOUT DCPRIME

DCprime is the front-runner in the field of relapse vaccines, a new class of oncology vaccines administered after or in conjunction with standard of care therapy to delay or prevent disease

recurrence. DCprime's product is a whole-cell-based vaccine addressing blood cancers with a high risk of relapse. DCprime is pursuing similar vaccination approaches for solid tumors. DCprime believes relapse vaccines will improve survival by putting the patient's immune system back in control. For more information, please visit: <https://dcprime.com/>
