Tariff Update

Assessment of Potential Tariff Impact

NB has reached out to underlying lead sponsors across NBPE's portfolio to determine the expected impact of tariffs. We believe that ~14% of the portfolio's fair value could be directly impacted by tariffs (and only ~1% of fair value meaningfully impacted)

POTENTIAL TARIFF IMPACT

% of fair value

Potential Tariff Impact

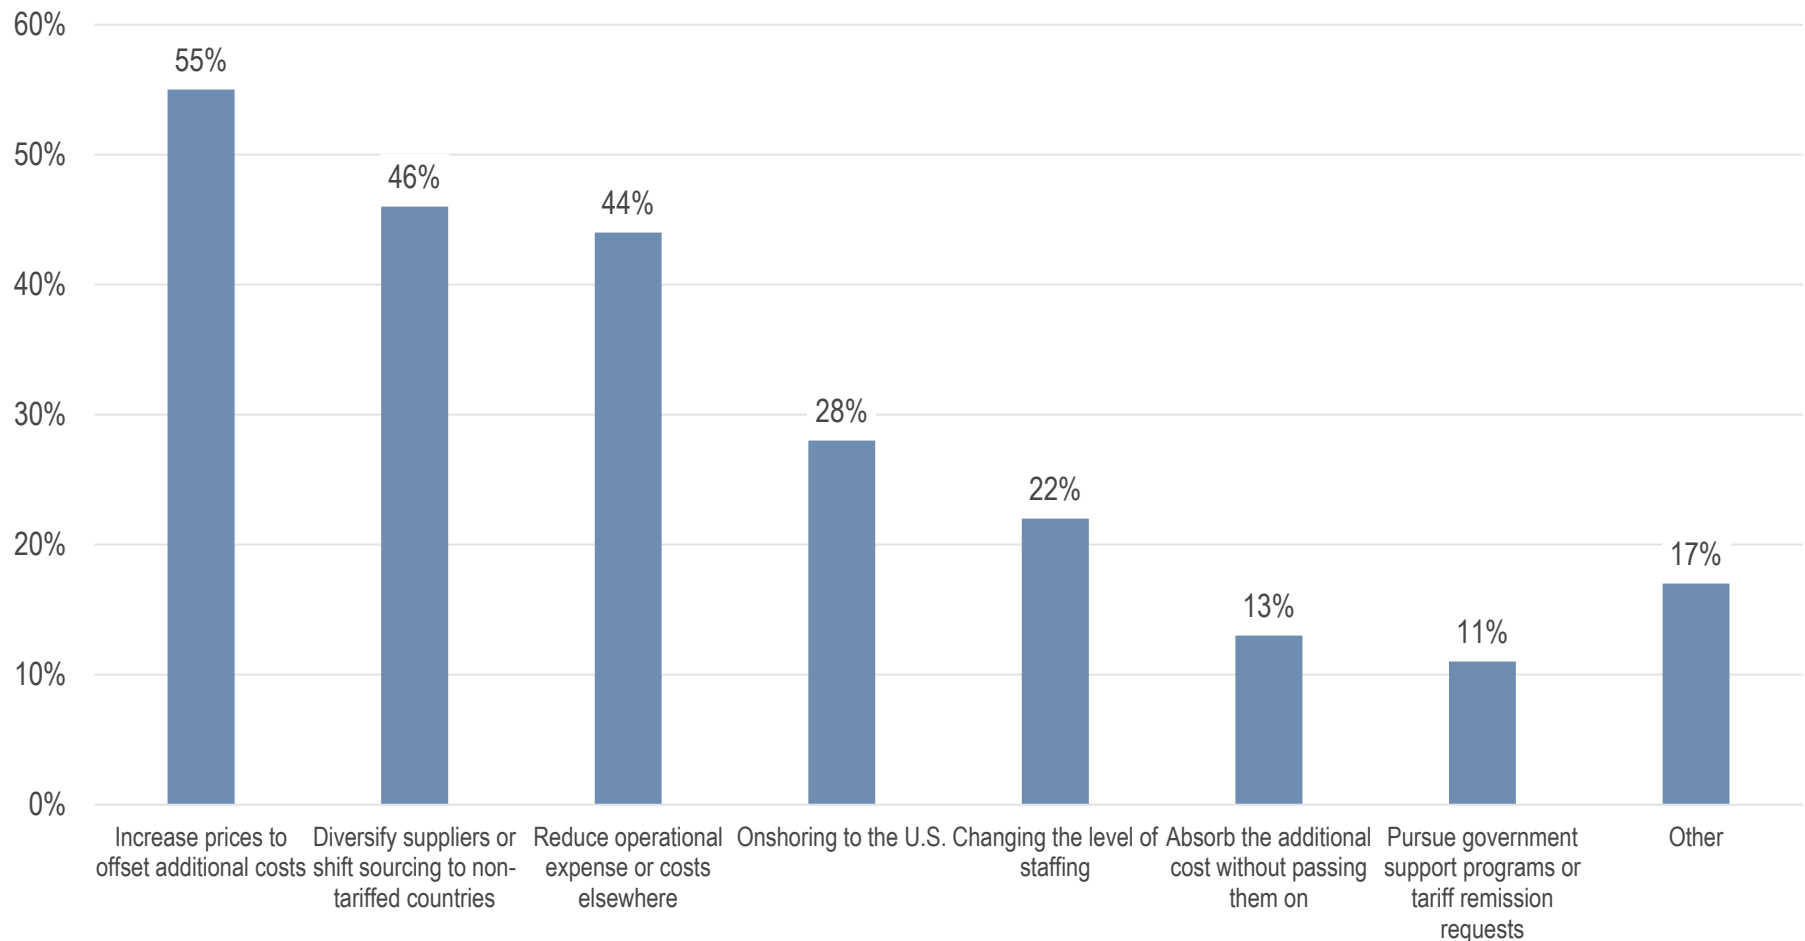

- Expect little to no direct impact on the vast majority of the portfolio from tariffs
 - Services businesses not directly impacted by tariffs
 - Certain companies may have the ability to pass through higher costs but the degree of this will vary
- Expect ~14% of the portfolio (by fair value) to be affected to some degree by tariffs
 - However, we believe ~1% of the portfolio fair value could be meaningfully impacted
- Analysis only considers the direct impact from tariffs and not second-order impacts resulting from any potential economic slowdown
- We believe the portfolio's emphasis on companies with lower expected cyclicality and/or long-term secular growth drivers, alongside reasonable leverage, generally positions it well
- The companies in NBPE's portfolio generally maintain strong capital positions, and more specifically the top 30 positions, have no near-term maturities; ~91% of the top 30 companies have cov lite debt or low levels of leverage

Note: data based on fair value as of March 31, 2025. Data excludes escrow balances, Italian mid-market buyout portfolio and NB Renaissance Program investments, which represent ~2% of direct equity fair value. The co-investments included in the above analysis represent approximately 94% of the total private equity portfolio fair value. Potential tariff impact based on impact assessments of individual portfolio companies by underlying GPs and NB analysis.

Capital Structure of NBPE's Largest 30 Companies

The top 30 positions in the portfolio are well-positioned with ~91% of the fair value of the top 30 positions invested in companies with covenant lite debt or low leverage, and the portfolio has minimal debt maturities in 2025 and 2026

Awards Disclosures

European Pensions Awards 2020, 2024 – Private Equity Manager of the Year: European Pensions, a leading publication for pension funds across Europe, launched these awards to give recognition to and honor the investment firms, consultancies and pension providers across Europe that have set the professional standards in order to best service European pension funds over the past year. Judging is undertaken by a group of judges with expertise across the European pension fund space. Each judge reviews submitted entry material and then scores the entries out of a total of score of 10 providing their reasoning as to why they have submitted that score. Two judges analyze each category and the firm with the highest overall score wins that category. Votes are verified by the European Pensions' editorial team. The award does not constitute an investment recommendation. NB Private Equity did not pay a fee to participate. Awards and ratings referenced do not reflect the experiences of any Neuberger Berman client and readers should not view such information as representative of any particular client's experience or assume that they will have a similar investment experience as any previous or existing client. Awards and ratings are not indicative of the past or future performance of any Neuberger Berman product or service.

Private Equity Wire 2021 – Best Fund of Funds Manager: Private Equity Wire, a specialist industry publication in Europe launched these awards to showcase excellence among industry participants. The publication partnered with Bloomberg to create a clearly defined methodology for selecting the award winners. Shortlists were created by Bloomberg from a fund manager universe including all funds managed by European-domiciled GPs with a minimum fund size of \$100 million. Asset band grouping thresholds were based on individual fund sizes – not overall GP assets under management in a category. Funds were grouped according to category and vintages from 2013 to 2018 and ranked on the basis of their net IRR. GPs with more than one fund ranked among the top performers across multiple vintages within any category were shortlisted. Winners from each category were then decided by majority vote from the publication's readers. The award does not constitute an investment recommendation. NB Private Equity did not pay a fee to participate. Awards and ratings referenced do not reflect the experiences of any Neuberger Berman client and readers should not view such information as representative of any particular client's experience or assume that they will have a similar investment experience as any previous or existing client. Chief Investment Officer's 2022 Industry Innovation Awards: The Chief Investment Officer (CIO) Industry Innovation Awards is split into two general categories: asset management/servicing and asset owners. With input from CIO's awards advisory board, as well as applicable surveys and data, the CIO editorial team is the final arbiter of finalists and eventual winners. Neuberger Berman did not pay a fee to participate, and awards, ratings or rankings referenced, do not reflect the experience of any Neuberger Berman client and should not be viewed as representative of any particular client's experience. It should not be assumed that any investor will have a similar investment experience. Awards, ratings or rankings is not indicative of the past or future performance of any Neuberger Berman product or service. Chief Investment Officer's mission is to provide context and insight on the investment and operational issues affecting the world's largest institutional investors via news, opinions and research, and to establish a community for dialogue between and among these asset owners through various forums, events and awards programs. Each year, CIO asks its digital audience, newsletter subscribers, previous award winners and other industry professionals to help us identify asset managers/service providers that have truly and reliably enhanced the portfolios of their clients. Nominations are collected online. After a simple review of the nomination form, nominees are notified and invited to submit an application for the award in the nominated category. Judging is completed by members of the CIO editorial team and select corporate and public CIOs. All judges sign NDAs and are not allowed to judge their own company submissions, if applicable.

Endnotes

1. As of 31 March 2025. Uplift analysis includes 12 IPOs/stock receipts and 23 full direct equity investment exits over the trailing five years. For portfolio companies which completed an IPO or where a portfolio company received stock consideration as part of a sale, the value is based on the closing share price on the closing date of the IPO/sale; however, NBPE remains subject to customary lockup restrictions. Returns are presented on a "gross" basis (i.e. they do not reflect the management fees, carried interest, transaction costs and other expenses that may be paid by investors, which may be significant and will lower returns). Past performance is not a guarantee of future returns. Multiple calculation includes full exits only. Excludes partial exits, recapitalisations and IPOs until the stock is fully exited. Year represents the year of final exit. Exit year for public companies determined by the date of the final cash flow. Proceeds include funds that are currently in escrow, but are expected to be received.
2. The MSCI World Index captures large and mid-cap representation across 23 Developed Markets (DM) countries. With 1,352 constituents as of 31 March 2025, the index covers approximately 85% of the free float-adjusted market capitalisation in each country (MSCI World Factsheet, 31 March 2025, the latest available). The benchmark performance is presented for illustrative purposes only to show general trends in the market for the relevant periods shown. The investment objectives and strategies in the benchmark may be different than the investment objectives and strategies of NBPE and may have different risk and reward profiles. A variety of factors may cause this comparison to be an inaccurate benchmark for any particular fund and the benchmarks do not necessarily represent the actual investment strategy of a fund. It should not be assumed that any correlations to the benchmark based on historical returns would persist in the future. Indexes are unmanaged and are not available for direct investment. Investing entails risks, including possible loss of principal. Past performance is no guarantee of future results.
3. Valuation & Leverage: Past performance is no guarantee of future results. Fair value as of 31 December 2024 and subject to the following adjustments. 1) Excludes public companies, Marquee Brands and other investments not valued on a multiple of EBITDA. 2) Based on 55 private companies which are valued based on EV/EBITDA metrics 3) The private companies included in the data represents 80% of direct equity investment fair value. 4) Companies not valued on multiples of trailing EBITDA are excluded from valuation statistics. 5) Leverage statistics exclude companies with net cash position and leverage data represents 80% of direct equity investment fair value. Portfolio company operating metrics are based on the most recently available (unaudited) financial information for each company and are as reported by the lead private equity sponsor to the Manager as of 24 April 2025, based on reporting periods as of 31 December 2024 and 30 September 2024. EV and leverage data is weighted by fair value. LTM EBITDA used by underlying GPs for valuation purposes may differ from EBITDA used to calculate growth rates due to pro forma or other adjustments and therefore the two data sets are not directly comparable.
4. Revenue & EBITDA Growth: Past performance is no guarantee of future results. Fair value as of 31 December 2024 and the data is subject to the following adjustments: 1) Excludes public companies, Marquee Brands and other investments not valued on multiples of EBITDA. 2) Analysis based on 66 private companies. 3) The private companies included in the data represent approximately 89% of the total direct equity portfolio. 4) The following exclusions to the data were made: a) growth of one company (\$5 million of value) was excluded from the data as the Manager believed the EBITDA growth rate was an outlier due to an extraordinary percentage change c) four companies (8% of direct equity fair value) were held less than one year and excluded from the growth rates d) three companies (1% of direct equity fair value) were excluded with non-comparable time frames of LTM revenue and/or LTM EBITDA data or insufficient information to calculate a growth rate. Portfolio company operating metrics are based on the most recently available (unaudited) financial information for each company and based on as reported by the lead private equity sponsor to the Manager as of 24 April 2025. Where necessary, estimates were used, which include pro forma adjusted EBITDA and other EBITDA adjustments, pro forma revenue adjustments, run-rate adjustments for acquisitions, and annualised quarterly operating metrics. LTM periods as of 31/12/24 and 30/9/24 and 31/12/23 and 30/9/23. LTM revenue and LTM EBITDA growth rates are weighted by fair value. Growth rate data is based on 66 companies and subject to the aforementioned exclusions; underlying EBITDA reported by the GPs may include pro forma or other adjustments to LTM EBITDA in one or both periods and this reported EBITDA used to calculate growth rates may not be the same EBITDA for valuation purposes by underlying GPs. As a result, growth and valuation multiple data are not directly comparable.
5. Debt Maturity: Past performance is no guarantee of future results. Based on 31 December 2024 fair value and with investment fair values weighted by the company's debt to total capitalization ratio. Fair value is also subject to the following adjustments: 1) Excludes public companies. 2) Analysis based on top 30 private companies. 3) The private companies included in the data represent approximately 73% of the total direct equity portfolio. Portfolio company debt details are based on the most recently available (unaudited) financial information (as of 31/12/24, 30/09/24 and 30/06/24) for each company as reported by the lead private equity sponsor to the Manager as of 24 April 2025.
6. Debt Covenant Statistics: Past performance is no guarantee of future results. Fair value as of 31 December 2024 and subject to the following adjustments. 1) Excludes public companies. 2) Analysis based on 30 private companies. 3) The private companies included in the data represent approximately 73% of the total direct equity portfolio. Debt covenant analysis does not consider springing debt covenants which may apply to certain draw percentages of underlying company revolvers. Portfolio company debt details are based on the most recently available (unaudited) financial information (as of 31/12/24, 30/09/24 and 30/06/24) for each company as reported by the lead private equity sponsor to the Manager as of 24 April 2025.
7. The FTSE All-Share Index represents the performance of all eligible companies listed on the London Stock Exchange's (LSE) main market, which pass screening for size and liquidity. The index captures 98% of the UK's market capitalisation (FTSE All Share Factsheet, 31 March 2025, the latest data available). The benchmark performance is presented for illustrative purposes only to show general trends in the market for the relevant periods shown. The investment objectives and strategies in the benchmark may be different than the investment objectives and strategies of NBPE and may have different risk and reward profiles. A variety of factors may cause this comparison to be an inaccurate benchmark for any particular fund and the benchmarks do not necessarily represent the actual investment strategy of a fund. It should not be assumed that any correlations to the benchmark based on historical returns would persist in the future. Indexes are unmanaged and are not available for direct investment. Investing entails risks, including possible loss of principal. Past performance is no guarantee of future results.
