Comments from the CEO

The activity level in Q1 was high although we did not close as many deals as we had planned for. The focus was on transitioning to a Software as a Service business model, working with our largest customers, finalizing documentation and going through risk assessments and security reviews. Enterprises can now utilize Azure Active Directory services to authenticate users within their domain and users will be automatically logged in to Hoylu Connected Workspaces™, creating a seamless experience that company IT organizations can easily implement and manage. Our ability to meet strict security requirements is a prerequisite for larger scale enterprise deployments and also a competitive advantage.

Holland America Line released the Navigator app in February. This project has leveraged our software within the organization for planning, engineering documentation and marketing and has proved to be a valuable use case for enterprise and consumer level deployments of our collaboration software. The release of the mobile application is designed to provide value to an estimated 1.5m users over the next twelve months, as well as provide management capabilities and ROI to thousands of crew members.

We received repeat orders from customers Walbridge and Suffolk within construction, a market vertical where visual and spatial collaboration is gaining momentum and where we see a large potential to replace paper Post-it notes and existing tools for planning and project management.

Our reseller community continued to grow and we signed with new partners in France, Germany, Australia and the US.

Hoylu's Connected Workspaces™ is fundamentally different from other software solutions in the market in that all the team's information is brought together in one place. Since information is spread out across many different tools people spend too much time searching through each tool's silo of information. Hoylu's Connected Workspaces™ allows for real-time synchronization, alignment and connectivity to all the other tools and specialist applications that the team uses. The workspace is accessible from any browser or device and does not require any special hardware or proprietary platform to work. Our product portfolio is continuously improving, and customers use our products daily for planning, process flows, mind maps, document reviews, brainstorming, scheduling, and more. We have expanded our reach with connection from nearly every web-enabled device: from large scale projection walls to laptops to smartphones, all combined to activate anytime collaboration on a large selection of languages for a personalized experience.

FUTURE OUTLOOK

We continue to build a stronger relationship to our large enterprise customers to understand their challenges and adapt our products to their business needs and workflow. We have large opportunities in market verticals such as construction, government, automotive, manufacturing, pharmaceutical, and education. We continue to

COMMENTS FROM THE CEO

expand our network and market reach as we transition to a Software as a Service business model and partner with more hardware providers, system integrators and resellers. We are very pleased to see continuous repeat orders from our customers and how they expand the use of Hoylu products in their daily work.

EVENTS AFTER THE END OF THE PERIOD

- Received order from Walbridge, a global, full-service construction firm headquartered in Detroit, MI. The order represented an expansion of Hoylu's business within the construction industry with high-end architectural design and delivery for a client in the US Automotive industry. The order had a deal value of SEK 700,000 in product and software revenue.
- Expanded its reseller network with the signing of 4 new partners: (i) SHI International Corp, headquarter in New Jersey, US, is ranked as the 8th largest IT solution providers in the US with more than 4000 employees and 30 offices worldwide; (ii) LINX Multimedia, is a technology integrator specializing in the design, installation and support of network cabling, multimedia, security and wireless systems; (iii) Exaprobe SAS, headquarter in France is a subsidiary and system integrator of Econocom Group who develops, integrates and operates digital services and infrastructure for all network, security, unified and audiovisual communication needs; and (iv) Kadsoft Computer GmbH is a medium sized IT solutions provider with headquarter in Freital, Germany.
- Received an order from a new customer in the pharma sector, Foundation Medicine. The deal value is SEK 400,000 in software and product revenue.
- Received order from Shorelight Education. The order is for expansion into China, India and Middle East and represents a deal value of SEK 330,000 in software and product revenue.
- Raised SEK 5M in a directed issue of convertible loan notes and warrants.
