and information and information about objectives may be impacted by known or unknown risks, identified or unidentified uncertainties and other factors that may significantly alter the future results, performance and accomplishments planned or expected by SCOR.

In particular, it should be noted that the full impact of the Covid-19 crisis on SCOR's business and results cannot be accurately assessed, in particular given the uncertainty related to the evolution of the pandemic, to its effects on health and on the economy, and to the possible effects of future governmental actions or legal developments in this context.

In addition, the full impact of the Russian invasion and war in Ukraine on SCOR's business and results cannot be accurately assessed at this stage, given the uncertainty related both to the magnitude and duration of the conflict, and the consequential impacts.

Therefore, any assessments and any figures presented in this document will necessarily be estimates based on evolving analyses, and encompass a wide range of theoretical hypotheses, which are highly evolutive.

Information regarding risks and uncertainties that may affect SCOR's business is set forth in the 2021 Universal Registration Document filed on March 3, 2022, under number D.22-0067 with the French Autorité des marchés financiers (AMF) posted on SCOR's website www.scor.com.

In addition, such forward-looking statements are not "profit forecasts" within the meaning of Article 1 of Commission Delegated Regulation (EU) 2019/980.

SCOR has no intention and does not undertake to complete, update, revise or change these forward-looking statements and information, whether as a result of new information, future events or otherwise.
