

Stellantis Announces Groundbreaking, Small and Affordable E-Car Project

- **Production of E-Car planned to start in 2028 at the Pomigliano d'Arco plant in Italy**

AMSTERDAM, May 19, 2026 – Stellantis announces the launch of its groundbreaking, small and affordable E-Car project; the first E-Cars are expected to roll off the production line in 2028.

The “E” in E-Car stands for European, Emotion, Electric and Environmental friendliness. This high potential segment, to be produced in Europe for Europeans, has been recognized by the European Commission for its potential to boost European design and manufacturing jobs while playing a vital role in supporting the wider adoption of full electric vehicles for convenient, everyday, city-centric mobility.

The E-Car is a small, innovative, affordable and fully electric vehicle that is being developed in the true tradition of European ‘people’s mobility’ – addressing the unprecedented contraction of the small affordable car segment in Europe in recent years. It is the perfect expression of Stellantis’ purpose to “Move people with brands and products that they love and trust”.

Stellantis CEO Antonio Filosa commented: “The E-Car is a concept that finds its natural match in the small car success that runs deep in our European Stellantis DNA. Our customers are calling for a revival of small, stylish vehicles, proudly produced in Europe, which are also affordable and environmentally friendly. Stellantis is answering their

call with exciting new models for multiple brands. Production is expected to start in 2028 in our Pomigliano (Italy) plant.”

With the assignment of the E-Car to Pomigliano – and the potential of significant production volumes – Stellantis is tapping into the plant’s long history of producing some of Europe’s most iconic and affordable cars, including the much-loved Fiat Panda.

Stellantis’ E-Car models will feature cutting-edge design and will be powered by world-class BEV technologies to be developed with selected partners to boost affordability and achieve an accelerated time-to-market.

Stellantis Forward-Looking Statements

This communication contains forward-looking statements. In particular, statements regarding future events and anticipated results of operations, business strategies, the anticipated benefits of the proposed transaction, future financial and operating results, the anticipated closing date for the proposed transaction and other anticipated aspects of our operations or operating results are forward-looking statements. These statements may include terms such as “may”, “will”, “expect”, “could”, “should”, “intend”, “estimate”, “anticipate”, “believe”, “remain”, “on track”, “design”, “target”, “objective”, “goal”, “forecast”, “projection”, “outlook”, “prospects”, “plan”, or similar terms. Forward-looking statements are not guarantees of future performance. Rather, they are based on Stellantis’ current state of knowledge, future expectations and projections about future events and are by their nature, subject to inherent risks and uncertainties. They relate to events and depend on circumstances that may or may not occur or exist in the future and, as such, undue reliance should not be placed on them. There can be no assurance that the contemplated transactions will be completed or that the expected scope or timing will be achieved.

Actual results may differ materially from those expressed in forward-looking statements as a result of a variety of factors, including: the ability of Stellantis to launch new products successfully and to maintain vehicle shipment volumes; changes in the global financial markets, general economic environment and changes in demand for automotive products, which is subject to cyclical; Stellantis’ ability to successfully manage the industry-wide transition from internal combustion engines to full electrification; Stellantis’ ability to offer innovative, attractive products and to develop, manufacture and sell vehicles with advanced features including enhanced electrification, connectivity and autonomous-driving characteristics; Stellantis’ ability to produce or procure electric batteries with competitive performance, cost and at required volumes; Stellantis’ ability to successfully launch new businesses and integrate acquisitions; a significant malfunction, disruption or security breach compromising information technology systems or the electronic control systems contained in Stellantis’ vehicles; exchange rate fluctuations, interest rate changes, credit risk and other market risks; increases in costs, disruptions of supply or shortages of raw materials, parts, components and systems used in Stellantis’ vehicles; changes in local economic and political conditions; changes in trade policy, the imposition of global and regional tariffs or tariffs targeted to the automotive industry, the enactment of tax reforms or other changes in tax laws and regulations; the level of governmental economic incentives available to support the adoption of battery electric vehicles; the impact of increasingly stringent regulations regarding fuel efficiency requirements and reduced greenhouse gas and tailpipe emissions; various types of claims, lawsuits, governmental investigations and other contingencies, including product liability and warranty claims and environmental claims, investigations and lawsuits; material operating expenditures in relation to compliance with environmental, health and safety regulations; the level of competition in the automotive industry, which may increase due to consolidation and new entrants; Stellantis’ ability to attract and retain experienced management and employees; exposure to shortfalls in the funding of Stellantis’ defined benefit pension plans; Stellantis’ ability to provide or arrange for access to adequate financing for dealers and retail customers and associated risks related to the operations of financial services companies; Stellantis’ ability to access funding to execute its business plan; Stellantis’ ability to realize anticipated benefits from joint venture arrangements; disruptions arising from political, social and economic instability; risks associated with Stellantis’ relationships with employees, dealers and suppliers; Stellantis’ ability to maintain effective internal controls over financial reporting; developments in labor and industrial relations and developments in applicable labor laws; earthquakes or other disasters; risks and other items described in Stellantis’ Annual Report on Form 20-F for the year ended December 31, 2025 and Current Reports on Form 6-K and amendments thereto filed with the SEC; and other risks and uncertainties.

Any forward-looking statements contained in this communication speak only as of the date of this document and Stellantis disclaims any obligation to update or revise publicly forward-looking statements.

Further information concerning Stellantis and its businesses, including factors that could materially affect Stellantis' financial results, is included in Stellantis' reports and filings with the U.S. Securities and Exchange Commission and AFM.
