II. OVERVIEW

Boussard & Gavaudan Holding Limited ("BGHL") is a Guernsey closed-ended investment company and is registered with the Dutch Authority for the Financial Markets as a collective investment scheme under article 1:107 of the Dutch Financial Markets Supervision Act. BGHL invests its assets in order to provide exposure to multiple alternative investment strategies managed by the Investment Manager. The investment objective is to produce long-term appreciation of its assets. BGHL seeks to achieve this by investing in BG Fund ("the Fund"). In addition, a proportion of the net assets of BGHL may, at the discretion of the Investment Manager, be invested in other hedge funds and financial assets selected by the Investment Manager. BGHL aims to generate a target NAV annualized return of Eonia capitalized + 400/600 bps over the business cycle, net of all fees.

V. BGHL COMPOSITION

BGHL is invested in BG Fund (net of an amount retained by BGHL for working capital and other requirements).

As of 2 August 2021, 99.70% of BGHL net asset value is invested in BG Fund. BGHL has a maximum exposure limit to BG Fund of 110%. The remained BGHL net asset value is made up of direct investment and cash.

A. BG FUND

European markets were slightly positive in July with the Eurostoxx 50® up +0.7%. The iTraxx Crossover® (S35) finished July at 236bps from 232bps at the end of June. Implied volatility increased slightly with VStoxx® ending the month at 20.9% from 18.2%.

BG Fund delivered 0.43% (USD A estimate) for the month. Small losses in equity strategies were more than offset by positive returns in credit special situations and trading strategies.

COMMENTARY

Volatility strategies

Mandatory convertible bond arbitrage

Mandatory convertible bond arbitrage lost -1bp in July, mainly due to small repricings. There was no primary market activity this month in Europe.

Convertible bond arbitrage

The contribution of convertible bonds (excl. mandatories) to the performance of the fund was +3bps in July.

In Europe, secondary market activity was quiet. While a summer lull is typical, the quarterly earnings season, which normally influences the market to some extent, barely impacted volumes or valuations.

European primary activity was also muted as is expected over the summer months.

US	19.75	20.27	0.52
Europe	19.05	21.40	2.35

Volatility trading was flat in July. Risk sentiment has remained largely positive this month despite some renewed concerns about the resurgence of Covid, particularly the more infectious variants. In this context, markets moved

slightly higher and evolved in a tight range with increased realised volatility. As such, we managed to offset most of our theta spend.

Flows-wise, we continued to see purchasing of downside protection which pushed index volatility and skew slightly higher. We took advantage of this to marginally increase our dispersion positions at improved entry levels.

Warrant arbitrage

Warrant and SPAC arbitrage contributed -4bps in July.

Equity strategies

In July Equity strategies suffered a loss of -39bps.

Part of the loss was caused by a specific risk-arb position on the acquisition of the insurance broker Willis Towers Watson by its competitor AON. The position was impacted by the news that the two companies had mutually decided to terminate the merger agreement. This decision followed last month's move by the DoJ to file an antitrust lawsuit against the merger. Despite Willis and AON moving forward with litigation to tackle the antitrust head-on and at the same time engaging in settlement talks with the DoJ they could not find a compelling solution.

The breaking of this deal had an industry-wide impact on other risk-arb positions, and the consequent mark-to-market moves resulted in a general widening of spreads and number of funds having to partially de-lever.

Despite losses in Willis and the widening of spreads, several other risk-arb positions generated positive returns as deals came to fruition. These situations included the acquisition of Alexion by AstraZeneca, the acquisition of Slack Technologies by Salesforce.com, and the privatisation of Brookfield Property Partners by Brookfield Asset Management.

In addition, the fund benefited from the announcement by Valmet Corporation of the acquisition of Neles Oy. Last year, Valmet had blocked the acquisition of Neles by Alfa Laval, and clearly signalled its intention to buy the company itself. We had positioned in anticipation of the acquisition moving forward and the all-share deal was announced early July.

Playtech was another notable detractor to performance this month - the stock finished down 13% in July as skepticsim remained around the sales process of Finalto, its CFD trading arm. Uncertainty persists as one acquirer has signed an agreement at a price deemed disappointing by the market, while another suitor has emerged with a potentially higher bid price, but also a lot of uncertainty around their bid.

Credit strategies

Capital Structure Arbitrage

Capital structure arbitrage was flat in July.

Credit long / short

The contribution of Credit Long / Short to the fund was slightly negative in July (-1bp). Credit indices in High Yield and Financials ended the month as tight as they began it, despite a degree of widening mid-month. CGG issued a profit warning, revising its full guidance downwards. The bonds lost 3.5 points but remain above par.

Credit special situations

Credit performance mostly came from special situations which contributed +20bps to the performance of the fund in July. Pizza Express refinanced its post-reorganization reinstated debt with a new HY bond issue, which led to its equity rising by 25%.

Trading

Trading strategies contributed strongly for the month delivering +65bps.

The Equity Quantitative Strategy was a major contributor to performance in July as US 10Y yields decreased further and equity markets rose overall, despite suffering several risk-off sessions on the back of renewed Covid concerns and Chinese regulatory intervention. In Europe, there was an outperformance of growth stocks and small cap companies. It is interesting to note that the Equity quantitative strategy exhibited a larger negative beta than earlier in the year and delivered strong profits during risk-off days.

In July, Systematic Trend Following, delivered a slightly positive performance. Having been short the Treasury market for a few months, the strategy reversed its position and was able to gain from the continued appreciation of Treasuries in the wake of the market bottom last May. Overall, indices and currencies detracted while Treasuries, commodities (base metals and coffee) and the momentum stock strategy were positive contributors to performance.

B. DIRECT INVESTMENTS OTHER THAN BG FUND

On top of its investment in BG Fund, BGHL has other investments. As of 31 July 2021, the net asset value of these investments represents less than 1.00% of the net asset value of BGHL.

Rasaland Investors ("RLI")

Rasaland Investors ("RLI") RLI is a Malta-based holding company structured as a private equity fund in terms of fees and organisation and managed by BK Partners. RLI is dedicated to land, hotels and high-end resort developments in Mexico. RLI's main asset is a majority interest in ACTUR, a private company owning the land developing assets. ACTUR's other shareholders are Mexican public institutions.

In July 2020, RLI made a cash tender offer to buy back its own shares, for a price per share of US\$0.12270. The valuation of BGHL's investment in RLI shares was marked down on 31 August 2020, using the US\$0.12270 per share price as the estimated fair value of the RLI shares. This price represents a circa 80% discount to the latest published NAV per share.

Hedge Funds Liquidation Stress Tests

Stress tests' scenarios have been improved in order to take into account liquidity issues. This scenario aims at reflecting, to some extent, how the fund would react in distressed market environment (as was the case in late 2008). These stress tests combine the three following adjustments:

• Small, Mid and Large caps adjustment

In certain market conditions, beta may become much higher than its level in normal market conditions and thus the hedging of such positions may not be effective. To address this kind of circumstance we apply a corrective factor to the beta of small, mid and large caps respectively. Since April 2019, the corrective factors have been calibrated on the amplitude of the stresses by looking at worst historical scenario since 1987.

	-5%	-10%	-20%	-30%
Small (<1bn)	2.00	1.75	1.50	1.30
Mid (1bn-5bn)	1.50	1.50	1.25	1.20
Large (5bn-20bn)	1.20	1.15	1.10	1.05
Mega (>20bn)	1.00	1.00	1.00	1.00

• Risk arbitrage adjustment

The risk of risk arbitrage positions is taken into account differently in case the market drops by more than 10%. We consider that one third of risk arbitrage positions will collapse.

Liquidity adjustment

An average discount (realized in 2008) is applied to bond, convertible bond (including mandatory convertible bond) and loan prices in case credit spreads widen by more than 25%.

Mandatories: Adj. price = Max(Shifted Price - 5% * Max(Credit spread shift - 25%, 0), Parity)
Others: Adj. price = Max(Shifted Price - 5% * Max(Credit spread shift - 25%, 0), 0)

Annex 8: AIFMD disclosure to investor

In compliance with AIFMD, BGIM will report in the newsletter the information hereafter:

• The percentage of assets which are subject to special arrangements arising from their illiquid nature:

Nothing to report

Any new arrangements for managing the liquidity of the AIF:

Nothing to report

• The current risk profile of the AIF and a description of the risk management systems employed by BGIM to manage market risk, liquidity risk, counterparty risk and other risks, including operational risk:

Please refer to this newsletter for the current risk profile of the Fund.

The backbone of the portfolio and risk management systems at BGIM relies on several components all interfaced together to ensure a full Straight Through Processing. The main system is FusionInvest provided by Misys used for position keeping and risk management. FusionInvest is interfaced to a real time market data vendor for real time P&L and risk calculation. Another key system is Trade Smart, the Execution Management System provided by Trading Screen that is interfaced to an in-house implemented Order Management System, itself connected in real time to FusionInvest. All figures used for qualitative and quantitative risk management are produced out of FusionInvest.

• The gross investment exposure of the Company at any time may represent a maximum of 2 times the Net Asset Value at the time of investment.
