## **Sdiptech AB (publ) acquires Cryptify AB in Sweden**

As of today, Sdiptech has acquired all shares in Cryptify AB.

Cryptify is a Swedish based software product company offering solutions for secure mobile communication in primarily Sweden and the UK. Current net sales trading is approximately SEK 18 million with good profitability.

### **Jakob Holm, CEO Sdiptech, comments:**

"Cryptify develops software products for secure end-to-end mobile communication. The customers are primarily found in Government & Defence with so-called restricted security classification where the need for secure and ease-of-use communication is growing. Cryptify is well positioned in this market and will be included in the business area Special Infrastructure Solutions (and the sub-segment Safety and Security).

We welcome the founders Johan Wagné (Managing Director) and Micael Berg (Sales Director) and the team to the Sdiptech Group and look forward to continue developing the company together with them."

### **Johan Wagné, MD of Cryptify, comments:**

"Cryptify's solutions have been developed over several years together with customers with high requirements on security classification and product certification. Our products are device independent and enable the user organisation to enjoy absolute and exclusive control of all cryptographic material. With Sdiptech as long-term owners, Cryptify will gain good opportunities for further development in order to meet our customers' future needs."
