

Exploration well completed on the Polmak prospect in the southern Barents Sea

Lundin Energy AB announces that its wholly owned subsidiary Lundin Energy Norway AS (together Lundin Energy), has completed exploration well 7221/4-1, targeting the Polmak prospect in licences PL609 and PL1027, in the southern Barents Sea. The well was dry.

The main objective of the well was to prove hydrocarbons in Triassic aged sandstones within the Kobbe formation of the Polmak prospect. The well encountered indications of hydrocarbons in a 9 meter interval in poor quality reservoir in the targeted formation and the well was classified as dry.

The well was drilled 30 km east of the Johan Castberg discovery, by the West Bollsta semi-submersible drilling rig. Lundin Energy is the operator of Polmak with a 47.5¹ percent working interest. The partners are Wintershall DEA Norge AS with 25 percent, INPEX Norge AS with 10 percent, DNO Norge AS with 10 percent and Idemitsu Petroleum Norge AS with 7.5 percent working interests.

The West Bollsta rig will now proceed to drill the Lundin Energy operated (40 percent working interest), Bask prospect in PL533B. Well 7219/11-1 will target Paleocene aged sandstones, estimated to hold gross unrisked prospective resources of 250 MMbo. The partners are Aker BP with 35 percent and Wintershall DEA with 25 percent working interests.

Lundin Energy has grown from an oil and gas exploration company into an experienced Nordic energy developer and operator. We continue to explore new ideas, new concepts and new solutions to maintain our position as an industry leader in production efficiency, sustainability and decarbonisation. (Nasdaq Stockholm: LUNE). Forward-looking statements

Certain statements made and information contained herein constitute "forward-looking information" (within the meaning of applicable securities legislation). Such statements and information (together, "forward-looking statements") relate to future events, including Lundin Energy's future performance, business prospects or opportunities. Forward-looking statements include, but are not limited to, statements with respect to estimates of reserves and/or resources, future production levels, future capital expenditures and their allocation to exploration and development activities, future drilling and other exploration and development activities. Ultimate recovery of reserves or resources are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management.

All statements other than statements of historical fact may be forward-looking statements. Statements concerning proven and probable reserves and resource estimates may also be deemed to constitute forward-looking statements and reflect conclusions that are based on certain assumptions that the reserves and resources can be economically exploited. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar expressions) are not statements of historical fact and may be "forward-looking statements". Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. No assurance can be given that these expectations and assumptions will prove to be correct and such forward-looking statements should not be relied upon. These statements speak only as on the date of the information and Lundin Energy does not intend, and does not assume any obligation, to update these forwardlooking statements, except as required by applicable laws. These forward-looking statements involve risks and uncertainties relating to, among other things, operational risks (including exploration and development risks), productions costs, availability of drilling equipment, reliance on key personnel, reserve estimates, health, safety and environmental issues, legal risks and regulatory changes, competition, geopolitical risk, and financial risks. These risks and uncertainties are described in more detail under the heading "Risk management" and elsewhere in Lundin Energy's Annual Report. Readers are cautioned that the foregoing list of risk factors should not be construed as exhaustive. Actual results may differ materially from those expressed or implied by such forward-looking statements. Forward-looking statements are expressly qualified by this cautionary statement.
