# Significant organic growth during quarter boosted by our investment in Finland

Logent has grown +9% organically in quarter three and almost 30% including the strategically important acquisition of HUB Logistics in Finland. Net Sales amounted to 714 MSEK and adjusted EBITDA excluding IFRS 16 of 68 MSEK.

The logistics market is facing a period of recovery and moderate growth, driven by an improving economic environment, supply chain reconfigurations, and the continued strength of e-commerce. Our diverse sector coverage and broad offering generate increased demand for Logent's services.

The quarter has been characterized by continued ramp-up of operations for Volvo Cars in Ghent, Belgium. Logent's operations in Ghent entail both a Logistics Optimization Centre serving components to Volvo Cars' factory 24 hours every day, as well as the logistics terminal for packaging material and waste coming out from the car factory.

In Finland, the new combined organization of approximately 700 colleagues has been implemented and followed by several integration activities throughout the quarter with initial effects of both revenue and cost synergies.

New customers have been onboarded across all our business areas and the international collaboration between our businesses and countries has continued to evolve throughout the quarter. Intense focus on increased cross-service and cross-border sales

initiatives also starts to pay off in terms of cross-selling growth.

During this quarter we have signed several new customer contracts. The most notable are contract with Sata Shipbuilding for Logistics Operations in Finland that allows us to further expand our shipyard logistics business. Transport Management has signed contract with Sika specialty chemicals company with a globally leading position in the development and production of systems and products for bonding, sealing, damping, reinforcing, and protection in the building sector and industrial manufacturing. And for Customs we have signed a contract with Sports Group Denmark a sportswear company.

Logent has today a well-diversified customer portfolio across a broad range of end-markets, covering six countries, more than 40 operational units and 20 offices. By tirelessly continuing the focus on quality, investing in our capabilities and to sharpening our service offering, Logent will also increase value for the customer. Logent has today an extensive 3PL and 4PL service offering with strong focus on value creation across the complete supply chain to fully support customers and create long-lasting partnerships. The combined capabilities of Logent Group are constantly growing and the journey towards the position as contract logistics champion in Northern Europe continues.

Full speed ahead on our continued expansion journey with a razor-sharp focus on customer value!

# Significant risks and uncertainties

## Risks related to macroeconomic factors and cyclical demand

Through its various operating segments, the Group is active in the logistics market. Like other companies active in the logistics market, the Group is affected by the general financial and political situation at global, local and regional levels. The overall demand for logistics services usually follows the development of gross domestic product (GDP) and the levels of trade volumes within the geographical regions where the Group offers its logistics services. The Group is thus primarily dependent on the development of GDP and the related development in trade volumes in Sweden, Norway, Denmark, Finland, Netherlands and Belgium, as well as the development in the geographical regions and markets where the Group's customers operate, as the demand for the Group's logistics services is ultimately affected by the demand for its customers' products. In light of the above, there is a risk that such a decrease in demand for the Group's logistics services could affect operations, operating profit and the Group's financial position.

## Risk related to geopolitical situation

The ongoing conflicts in Ukraine and the Middle East have negatively impacted supply chains and the transport sector. Although the Group has not experienced any significant effects due to the war in Ukraine or the conflict in the Middle East, the Group's operations could be negatively affected in the future if the current geopolitical tensions and conflicts were to persist, which could affect, among others, the capital markets as well as global trade including the transport sector and supply chains.

Current geopolitical situation with uncertainty in the market mostly driven by the new American

administration might impact Logent's customers' businesses and how that will change their logistics flows in the future.

## Risks related to changes in inflation rates

Uncertainty in the world has increased over the past year as a result of high inflation and disruptions in supply chains. The high inflation has affected Logent through higher interest costs, energy costs and fuel costs. Logent works actively with mitigating measures and has so far managed these cost increases with contractual indexation to our customers.

The uncertainty and higher inflation have also affected the purchasing power of the population, which has generated lower volumes for some of Logent's customers.

Logent closely monitors these external factors as well as the resulting volume and cost increases and is ready to act if necessary.

### 1.2 Significant accounting estimates and judgements

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom correspond to the actual results. Estimates and assumptions that entail a significant risk of material adjustments to the carrying amounts of assets and liabilities in the next financial year are outlined below.

(a) Test of impairment of goodwill and trademarks

The Group tests each year whether any impairment requirement exists for goodwill and trademarks in accordance with the accounting policy described in the annual report 2024. The recoverable amounts for the cash-generating units were established by calculating the value in use. Certain assumptions must be made for these calculations, of which the most important assumptions are the discount rate and the long-term rate of growth. The carrying amount of goodwill amounted to SEK 1 239 260 thousand and the carrying amount of trademarks amounted to SEK 149 891 thousand as of 30 September 2025. An impairment test was performed on 31 December 2024, which showed that there was a need for impairment of Goodwill in business segment Ports based on change of operator in Port of Gothenburg in 2026. A depreciation of SEK 69 245 thousand was made in business segment Ports in December 2024.

### 1.3 Segment information

Three reportable segments, Logistics Operations and Logistics Services and Staffing, were identified in the Group:

Logistics Operations - Contract Logistics-solutions relating to dedicated warehouse solutions and ports.

Logistics Services - Contract Logistics-solutions relating to transport management and customs.

Staffing - Staffing solutions related to logistics built to manage volume fluctuations. Both external and internal staffing (e.g. to Contract Logistics) and for recruitment services.

Other - The item Other consist of costs and items that have not been allocated to the segments.

The Group CEO primarily uses a measure of adjusted earnings before interest, tax, depreciation and amortization (EBITDA, see below) to assess the performance of the operating segments excluding effect of IFRS 16 (see Note 6 and 7).
