

Oncology Venture

## Press Release

# Oncology Venture draws down the first tranche under its Convertible note agreement with Negma Group LTD and Park Partners GB

**Hørsholm, Denmark, April 3<sup>rd</sup>, 2020 – Oncology Venture A/S (“Oncology Venture”) today announces that it has called upon the first tranche of SEK 10 million in line with the terms from the financing agreement communicated on March 31<sup>st</sup>, 2020. The transaction is carried out through a private placement of convertible notes. It is the first tranche out of a flexible financing agreement allowing Oncology Venture to request up to a total of SEK 100 million.**

This financing serves as a foundation to provide financial resources for the company’s continuing execution of its new, focused strategy, and it enables Oncology Venture to make further progress in developing its pipeline of three high-priority programs: Dovitinib, IXEMPRA®, and 2X-121.

Highlights about the transaction:

- 100 notes with a principal amount of SEK 100,000 per Note corresponding to in aggregate SEK 10 million
- The commitment fee payable of SEK 2.5 million is also converted into 25 Notes of SEK 100,000 each.
- Net proceeds to the Oncology Venture amount to SEK 10 million.
- There are no interest payments in relation to the convertible notes.
- Maturity of 12 months.
- Conversion price is 95% of the reference price. The reference price is the lowest closing volume weighted average (VWAP) share price of the 7 consecutive trading days prior the receipt of a conversion request, excluding trading days on which the Closing VWAP is lower than 90 % of the average Closing VWAP over the Pricing Period otherwise calculated.

For more information please see the press release regarding the financial agreement published March 31, 2020. The press release can be found on the company’s homepage:

**About Oncology Venture A/S**

Oncology Venture A/S (Nasdaq First North Growth Market Stockholm: OV.ST) develops drugs for personalized treatment of cancer guided by its proprietary drug response predictor technology, DRP®. The company has a mature portfolio of six drug candidates, including compounds in the pre-registration stage. The product portfolio includes: 2X-121, a PARP inhibitor in Phase 2 for Ovarian cancer; Dovitinib, a pan-TKI in post-Phase 3 for Renal Cell Carcinoma; IXEMPRA® (Ixabepilone), a microtubulin inhibitor approved in the U.S. for the treatment of breast cancer; LiPlaCis®, a liposomal formulation of cisplatin in Phase 2 trials for breast and prostate cancer; 2X-111, a liposomal formulation of doxorubicin under manufacturing for Phase 2 in breast cancer; and Irofulven, a DNA damaging agent in Phase 2 for prostate cancer.

### **About the Drug Response Predictor – DRP® Companion Diagnostic**

Oncology Venture uses its drug specific DRP® to select those patients who, by the genetic signature of their cancer, are found to have a high likelihood of responding to the specific drug. By screening patients before treatment the response rate can be significantly increased. The DRP® method builds on the comparison of sensitive vs. resistant human cancer cell lines, including genomic information from cell lines combined with clinical tumor biology and prior clinical trial outcomes. DRP® is based on messenger RNA from the patient's biopsies. DRP® has proven its ability to provide a statistically significant prediction of the clinical outcome from drug treatment in cancer patients in nearly 40 clinical studies that were examined, including an ongoing, prospective Phase 2 trial. The DRP® platform can be used in all cancer types and is patented for more than 70 anti-cancer drugs in the U.S.
