

Atos recognized as Supplier Engagement Leader by CDP for the 5th time

Paris, France – July 30, 2025 – Atos has been recognized for the fifth time by the Carbon Disclosure Project (CDP) by being included in the prestigious [Supplier Engagement Rating Leaderboard](#) for its leadership in corporate supply chain engagement on climate change and environmental issues. Only the top companies which disclosed information for the full CDP Climate questionnaire secured a place on the CDP Supplier Engagement Leaderboard.

Atos tackles its Scope 3 emissions, which represent the largest share (95.5%) of its GHG¹ footprint, by working closely with its suppliers to assess and improve their sustainability performance. In 2024, 75%² of Atos Group spend was made towards suppliers who had undergone a sustainability assessment. Atos suppliers can demonstrate their commitment to fight climate change by signing a dedicated contract clause with Atos whereby they are required to measure and report their emissions and commit to science-based climate targets. Atos also provides guidance and support to suppliers with lower sustainability maturity to help them initiate or improve their decarbonization journey.

Marie de Scorbiac, Head of Investor Relations and CSR, Atos Group, said : *"Atos' inclusion on the 2024 CDP Supplier Engagement Leaderboard is a reward for its long-standing commitment to sustainable procurement and its rigorous, transparent reporting practices for customers, investors, and regulators. This recognition acknowledges the importance of our approach to engaging our suppliers and stakeholders."*

Atos aims to continue engaging more suppliers on sustainability issues across its value chain and support them in their decarbonization journey to meet its GHG emission reduction targets and contribute to the fight against climate change.
