Order for a new production machine in Asia

Bezons, November 16, 2021 – 8:00am – RIBER, a global market leader for the semiconductor industry equipment, is announcing an order for a MBE 6000 production system in Asia for a total amount of several million euros.

A new Asian industrial client has just ordered a MBE 6000 machine, intended to produce electronic and optoelectronic devices.

The MBE 6000 is the benchmark MBE machine for the mass-production of electronic components used in terrestrial telecommunications (4G, 5G) and fiber optic networks.

This new order will be delivered in 2022.

About RIBER

RIBER is the global market leader for MBE - molecular beam epitaxy - equipment. It designs and produces MBE systems and evaporators for the semiconductor industry. It also provides technical and scientific support for its clients, maintaining their equipment and optimizing their performance and output levels. Through its high-tech equipment, RIBER performs an essential role in the development of advanced semiconductor systems that are used in numerous consumer applications, from information technologies to 5G telecommunications networks, OLED screens and next-generation solar cells.

RIBER is a BPI France-approved innovative company and is listed on the Euronext Growth Paris market (ISIN: FR0000075954).
