The first multi-buyer Green CPPA in Europe

Ten companies, customers of LCL, will be able to accelerate their energy transition by directly accessing the green electricity produced by a new 56-megawatt photovoltaic power plant developed by Voltaia for this purpose

Ten companies are joining this innovative CPPA, designed jointly by Voltaia (Euronext Paris, ISIN code: FR0011995588), an international player in renewable energies, and LCL, the leading bank for small and medium-sized companies which is committed to the energy transition of its customers. Through this CPPA, these 10 companies, along with LCL, will share 100% of the electricity produced by a new photovoltaic power plant over the next 20 years. Voltaia will develop and operate this 56 megawatt power plant located in the south of France, which is also home to a pastoral activity that promotes local development. For its part, LCL will provide the guarantee mechanism and common rules to ensure the solvency and proper functioning of this grouping throughout the duration of the project.

At the end of 2020, LCL and Voltaia joined forces on an innovative project to enable large and medium-sized companies, among the most sensitive to the issues of transition and energy mix, to benefit from contracts securing their long-term supply of renewable electricity, produced in France and based on guaranteed capacities and prices.

One year later, LCL and Voltaia announce that 10 french companies, leaders in their sectors of activity, have adhered to the values of the project by subscribing to the first multi-buyer Green CPPA available on the market.

¹ Green CPPA (Corporate Power Purchase Agreement) : long-term electricity supply contract linking a renewable energy producer directly to one or more companies that consume it.

PRESS RELEASE

December 6, 2021

This initiative paves the way for new developments in corporate energy transition and independence at a time when these two factors are in the spotlight.

"This project was born of the desire to give our corporate customers direct and competitive access to green energy of guaranteed origin, volume and price. It was a daring challenge, but everyone's enthusiasm enabled us to overcome the obstacles and bring this first Green CPPA to life. Many thanks to the 10 participating companies who have demonstrated a first-rate environmental commitment and a remarkable forefront spirit. This CPPA is also further proof of LCL's commitment to provide concrete support to its corporate customers in their efforts to achieve the energy transition and sustainable economy, as supported by the LCL Smart-Business open-banking program", said Olivier Nicolas, Member of the Executive committee Corporates - Wealth - ESG.

"Voltalia is a company whose objective is to offer renewable and competitive energy to as many people as possible. This is why it is a pioneer in setting up a multi-buyer Green CPPA that is unprecedented in Europe, enabling companies of different sizes to become involved in the energy transition", said Sébastien Clerc, CEO of Voltalia.

More information

Benefits of the *Green CPPA*

Democratizing access to competitive green electricity...

Voltalia provides green electricity at a competitive price to the group's customers. The multi-buyer scheme allows for an economy of scale by pooling the needs of companies.

Get involved in a concrete and sustainable action in favor of the environment...

By opening up the possibility of consuming green energy to a larger number of economic players, Voltalia and LCL hope to trigger a virtuous circle of consumption among the bank's partners, regardless of their size or sector. In this way, the companies are confirming their commitment to CSR, by enabling the construction of an additional solar power plant on the national grid.

...Contribute to the local economy

The 56-megawatt photovoltaic power plant will be located in southern France. It will be home to an agricultural activity, adding a local co-development dimension to this project, in line with Voltalia's mission to "improve the global environment by promoting local development. Voltalia is responsible for the construction and operation of the plant.

The 10 partners

- **Air France**, national airline and international player in air transport;
- **Bonduelle**, international player in plant products preserved by natural processes;
- **Daco Bello**, company specialized in the food industry;
- **Groupe Fournier**, manufacture and distribution of kitchen and bathroom furniture and custom-made fittings;
- **Gerflor**, specialized in the design, manufacture and sale of floor coverings;
- **Isigny-Sainte-Mère**, cooperative specialized in the manufacture of dairy products;
