

Sidertrade joins the Euronext Tech Leaders 2025

June 3, 2025 | Sidertrade, the global leader in AI-powered Order-to-Cash applications, announces its inclusion in the 2025 Euronext Tech Leaders Index, the pan-European initiative spotlighting the continent's most disruptive and high-growth tech companies.

Launched by Euronext in 2022, the **Tech Leaders** brings together the **110 most dynamic listed European tech companies**, providing them with enhanced visibility, targeted investor access, and exclusive participation in pan-European innovation forums. Sidertrade's inclusion reflects its alignment with the criteria of the index:

- A track record of building **technologies with transformative impact**,
- A market cap above €300 million,
- A CAGR (Compound Annual Growth Rate) above 20% over the last three years.

The Euronext Tech Leaders Index will be updated after markets close on Friday, 20 June 2025, with effect from Monday, 23 June 2025.

Delphine d'Amarzit, Euronext Paris Chairwoman and CEO, states: ***"Sidertrade's 20th anniversary of being listed coincides with the highest possible recognition of its stock market journey: its inclusion in the Euronext Tech Leaders, which brings together technology companies listed on Euronext that stand out for their growth and innovation. I am pleased that the stock exchange has fully played its role in supporting the growth of a company like Sidertrade, which now ranks among the most promising tech companies in Europe, thanks to the long-term vision of its founder, Olivier Novasque, and the work of its teams."***

Sidertrade's trajectory reflects a conviction that the future of enterprise finance lies in autonomous systems capable of acting intelligently in dynamic environments. Innovation is in the DNA of Sidertrade. From the outset, the company has approached AI not as a layer of enhancement, but as the engine driving systemic change.

Central to this transformation is Aimie, Sidertrade's agentic AI. Built to go beyond predictive analytics, Aimie is an autonomous agent that makes decisions, initiates actions, and adapts in real-time to optimize cash flow processes. From qualifying invoices to orchestrating engagement strategies and accelerating cash collections, Aimie scales behavior-based decision-making across a global network of over 40 million buyers. This intelligence is grounded in [Sidertrade's Data Lake](#), the world's richest behavioral dataset for B2B transactions, encompassing more than \$7.2 trillion in payment data. It is this combination of machine learning, behavioral modeling, and collaborative intelligence that positions Aimie as an operator that learns, acts, and evolves in the service of enterprise performance.

The inclusion in the Euronext Tech Leaders segment is also a tribute to Olivier Novasque's vision as founder and CEO of Sidertrade. Marking 25 years of innovation at Sidertrade, Novasque has championed a bold roadmap to move finance beyond automation and into real-time intelligent orchestration, transforming the CFO office from a reactive unit to a proactive command center.

"We are honored to join the Euronext Tech Leaders," said Olivier Novasque, CEO and founder at Sidertrade. ***"At Sidertrade, we've never followed the market. We've questioned its limits and investigated how technology should overcome them. In a financial world that is growing increasingly complex by the day, we believe the real breakthrough lies in augmenting human capacity. Our technology is designed to sharpen judgment, accelerate action, and foster resilience. When machines enhance talents, organizations unlock their full potential."***
