

## Appendix to the Prospectus - Storebrand Indeks – Alle Markeder

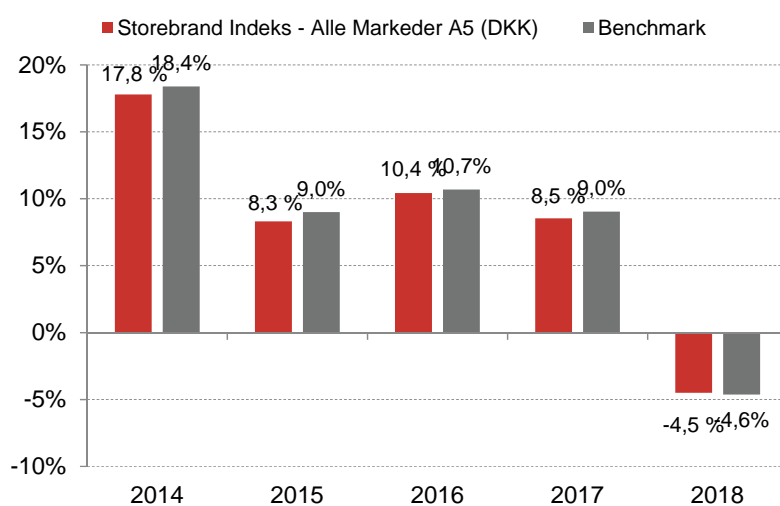

*This is an appendix to the fund's prospectus with supplemental information to investors trading the fund at Nasdaq Copenhagen. An application has been filed with the stock exchange and the first day of trading is expected to be on 5 April 2019.*

---

Fund name and share class: Storebrand Indeks – Alle Markeder A5 (DKK)  
 ISIN: NO0010841588  
 Trading/settlement currency: DKK  
 Fund type: UCITS  
 Domicile: Norway

---

### Historic performance

The performance is based on the fund's NOK share class which was launched on 17 June 2011.

The fund returns is calculated net of management fees of 0.3 percent p.a. Historical returns are no guarantee for future returns. Future returns will depend on market developments, the fund manager's skill, the fund's risk profile, ongoing charges and transaction costs. The return may become negative due to negative price developments. Further information about the fund can

be found at [www.storebrandfondene.dk](http://www.storebrandfondene.dk).

### Subscription and redemption for Danish investors

UCITS-shares of the fund are fully transferable and available for trading on Nasdaq Copenhagen. Jyske Bank is acting as market maker by offering bid and ask prices multiple times throughout any opening hours at Nasdaq Copenhagen.

The UCITS-shares are issued through VP Securities A / S, Weidekampsgade 14, DK-2300 Copenhagen S. The UCITS-shares are settled customarily two days after transaction, and at the same time as delivery or registration at VP Securities A / S. The UCITS-shares are registered by name in the association's books by VP Investor Services.

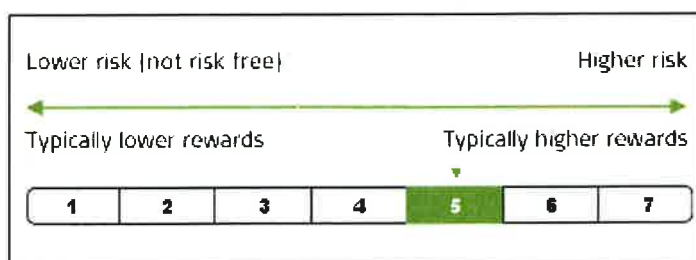

UCITS-shares purchased on Nasdaq Copenhagen cannot normally be sold directly back to the UCITS-shares. Investors trading UCITS-shares on an exchange may be required to pay fees in connection therewith. In addition, investors may pay more than the existing intrinsic value when they buy UCITS-shares, and receive less than the current intrinsic value when they sell them.

## Risk factors

The fund deliberately takes different forms of risk in order to increase the possibilities of returns. The value of the fund's investments is positively and negatively affected by the daily trend in the markets where the securities are traded (market risk).

The fund's risk is assessed on a scale of 1-7, where 1 is typically low risk, but not risk-free, and 7 is typically high risk. This fund is rated in risk class 5, which means that the units are normally subject to moderate to large price fluctuations. The fund's position on the scale is determined by the fund's price fluctuations over the past five years and / or representative data, where the fund has not had 5 years of history. Location of the fund on the risk indicator is not fixed. The categorization of the fund may change over time. This is due to the fact that historical data does not necessarily provide a precise picture of the fund's future risk profile.

The categorization listed in this appendix to the prospectus shows the categorization at the time of publication of the prospectus. Moderate to large risk funds (risk indicator 5-7) may be subject to significant price fluctuations, due to the composition of the portfolios or the portfolio management methods used. The categories in the scale can be converted into annual, average price fluctuations as shown in the table below:

Annual price fluctuations (standard deviation)		
Category	Equal or larger than	Less than
7	25 %	
6	15 %	25 %
5	10 %	15 %
4	5 %	10 %
3	2 %	5 %
2	0.5 %	2 %
1	0 %	0.5 %

Investors should be aware of the following risk factors (the list is not necessarily comprehensive):

### Operational risk

Operational failure in the markets where the fund invests due to inadequate internal processes, human resources or systems. This includes securing assets.

### Event Risk

Events that cannot be predicted, such as sudden devaluations, political events, etc.

### Industry risk

Investments in this fund are not concentrated in one or a few industries and therefore have a lower risk of price fluctuations than funds investing in one or a few industries. Storebrand Asset Management's policy for sustainability can, however, exclude companies within certain industries, which can give an increased risk of price fluctuations in the fund.

### Currency risk

The fund invests in different currencies, and there is therefore a risk of fluctuations due of changes in exchange rates.

### Credit risk

Risk of default from an issuer of debt instruments.

### Liquidity risk

In the event of market turmoil combined with large redemptions, the opportunities for divesting or rebalancing the fund's portfolio may be reduced.

## Counterparty risk

If the fund places funds in depository receipts or uses derivative financial instruments as part of the asset management, including futures, options, the conclusion of forward contracts, or makes securities lending in connection with the portfolio management, the risk may arise that the counterparty does not meet its obligations.

## Investment horizon

Due to the fund's risk profile, investors should be prepared for loss and/or have a sufficient time horizon for the investment in the fund. Normally, a time horizon of five years, or more, is recommended for equity funds.

## Essential agreements

### Delegation of marketing and distribution

Storebrand Asset Management AS has sub-delegated marketing and distribution to SKAGEN Denmark, a branch of SKAGEN AS.

SKAGEN Denmark, a branch of SKAGEN AS, Norway, is under the obligation to deliver marketing and investment advice on the Storebrand Funds in Denmark.

The agreement can be terminated by both parties at 90 days notice. Storebrand Asset Management can, however, terminate the agreement with immediate notice if the interests of the investors or the Danish Financial Supervisory Authority so require.

### Market maker agreement

Storebrand Asset Management AS has entered into an agreement with Jyske Bank AS that the bank in Nasdaq Copenhagen A / S 'trading systems, each trading day - subject to special situations - will place prices on the Storebrand Funds with the aim of promoting liquidity in trading the funds. The quotation must be made with both purchase and sales prices and on the basis of current emission and redemption prices.

The Market Making Agreement may be terminated by the parties at 6 months' notice.

### Agreement for calculating internal values

Storebrand Asset Management AS has with Solactive AG, Guiollettstr. 54, 60325 Frankfurt am Main, Germany agreed that Solactive AG calculates and distributes intrinsic values to Nasdaq Copenhagen A / S and to Jyske Banks A / S for use in ongoing price quotation in Nasdaq Copenhagen A / S 'trading systems.

### Agreement with VP SECURITIES

Storebrand Asset Management AS has entered into an agreement with VP SECURITIES on the keeping of owner books and the issue of shares. The agreement involves the listing of all investors. Norwegian taxpayers must not act as unit holders in VP SECURITIES.

### Paying Agent

The management company has entered into a paying agent agreement with SKAGEN AS, Danish Branch, organization number 29934851, Bredgade 25A, 1260 København. The Paying Agent can assist Danish investors with providing information about the funds, with bringing forward complaints to the management company, with particular enquiries, or regarding the general contact with the management company.

## Notice of termination of important agreements

In line with NASDAQ Copenhagen's rules for issuers of UCITS, Storebrand Asset Management AS will publish notification of termination of significant agreements or any significant amendments to the same.

## Declaration

The Board of Directors at Storebrand Asset Management AS is responsible for this prospectus supplement, and the undersigned members of the Board hereby confirm that

1. to the best knowledge of the Board of Directors, the information in the prospectus is correct and that the impression that the prospectus intends to give has not been distorted due to omissions, and
2. to the best knowledge of the Board of Directors, the prospectus contains all relevant information that may be of importance to potential investors.

Lysaker, 22 March 2019

The Board of Directors at Storebrand Asset Management AS,

Odd Arild Grefstad  
*Chairman*
