

ATLANTIC PETROLEUM

P/F ATLANTIC PETROLEUM

CONDENSED CONSOLIDATED INTERIM REPORT

FOR THE 9 MONTHS ENDED 30th SEPTEMBER 2018

3RD QUARTER MAINTAINANCE OF

In line with plans reported previously, the Company's priority in the third quarter of 2018, like in the previous two, has remained focussed removing residual liabilities and cost management consistent with the available financial support to ensure the Company's future is not burdened by un-necessary liabilities.

The London Oil and Gas facility has allowed Atlantic Petroleum to continue strategy and look at new opportunities, review of which is an ongoing process. Nevertheless, the Board and management considered that to ensure sufficient financial headroom for potential Badger (P2112) license activity and to fully settle Ettrick and Blackbird obligations and license exit there is a need for moderate upward adjustment to the facility.

In respect of achieving a settlement agreement by end 2018 with Partners on the Blackbird and Ettrick licenses the Company can happily report that all agreements and guarantees – including financial guarantees from LOG – are concluded. Signature and completion will occur before year end so enabling associated accounting liabilities to be adjusted in year-end numbers and so achieving a major delivery promise by Atlantic's management and board.

The Company and LOG are in progress of defining a variation to the agreement in parallel with Blackbird and Ettrick license withdrawal.

Orlando continues to progress with Decipher Energy confirming repeatedly that the field is on track to deliver first production by the year end of this year leaving Atlantic Petroleum with no reason to adjust associated revenue forecast position reported previously.

The Partners on the Aurora (P2126) license are intending an exploration and drilling programme for 2019. Whilst Atlantic Petroleum, as a 10% partner, has little ability to influence the majority partners decision it does have obligation to contribute 10% of costs. It is estimated that the costs associated with an exploration programme will be high as will the and risk of success not certain. The Company considers in these circumstances that the prudent action is to withdraw from the license on a no liability basis with all outstanding costs settled.

License P2112 (Badger field) is again under further technical evaluation to determine if there is a more optimal location for an appraisal/development well. This work will be used to pursue a further license extension from the OGA in order for that work to be finalised and budget with funding determined by end second quarter of 2019.

Accordingly, Atlantic Petroleum's general outlook as previously reported remains unchanged.

LICENSE PORTFOLIO 30TH SEPTEMBER 2018

STATUS

In 2018 Atlantic Petroleum holds, (excluding Blackbird and Ettrick), 3 oil & gas licences at report publication date. These are in the UK North Sea and Irish Celtic Sea.

Where Atlantic Petroleum is required to contribute to licence costs these are met from the London Oil and Gas loan facility so ensuring the Company meets its fiduciary obligations.

A summary of licenses and works ongoing is as follows:

UNITED KINGDOM

BADGER (33.3%) - UK License P2112 – Appraisal and Development.

Work has progressed identifying better or more optimal appraisal/development well location within the acreage. The Partners consider there may be potential for an upside gas reserve, however proving this requires additional seismic interpretation work that will last into the first half of 2019. The OGA will be advised on or before 20th November 2018 that a final and short extension is needed before final technical and commercial appraisal and development plans are set or a decision to drop the license is made.

AURORA (10%) – UK License P2126 – Appraisal and Development.

Atlantic Petroleum is considering options to withdraw from this license due to cost and technical risk. If so, the last quarter of 2018 could see Atlantic Petroleum and the partners agree terms for the Company's full and final exit from this play.

IRELAND

ARDMORE, HOOK, HELVICK and DUNMORE (18.33%) – Celtic Sea Licence - Development.

These licences continue being appraised by the Partners (Provident Resources) to evaluate low cost production solutions to allow 6.9mm BOE reserve recovery. Work will progress throughout 2018 and further updates will be provided.
