

CSG signs contracts with HSW worth over EUR 150 million to supply to Poland with hundreds of chassis for multipurpose tactical vehicles

Huta Stalowa Wola S.A. has placed orders with a total gross value of more than EUR 150 million for the delivery of several hundred chassis manufactured by CSG Group companies. Under the licensing rights granted, HSW will use them to produce complete Waran 4x4 and Heron 6x6 multipurpose tactical vehicles ordered by Poland's Armament Agency under contracts financed through the EU's SAFE programme.

CSG has received three orders from HSW S.A. Two of them concern deliveries of 4x4 chassis to Huta Stalowa Wola. The chassis covered by the agreements are manufactured by CSG Group companies. The deliveries will enable HSW to produce Waran 4x4 multipurpose tactical vehicles in various configurations, including a command vehicle for the Missile and Artillery Forces (WRiA).

The third order covers deliveries of 6x6 chassis, which HSW will use to produce Heron 6x6 armoured vehicles, including a command vehicle configuration for WRiA units equipped with multiple-launch rocket systems (Homar-A and Homar-K).

The total gross value of the chassis orders for ground-based platforms, including assembly kits, exceeded EUR 150 million. Deliveries will be completed by the end of 2029.

"The signing of these agreements marks the continuation and expansion of the CSG Group's strategic cooperation with the Polish defence industry. This cooperation provides significant support for increasing the defence capabilities of the Land Forces and enables the rapid delivery of top-quality products. Our technological cooperation with Huta Stalowa Wola already has a fairly long history, and CSG is ready to develop it further, including through the implementation of new business models," said Wojciech Grzonka, President of the Management Board of CSG Polska and Vice-President of Sales at CSG.

The Waran 4x4 and Heron 6x6 multipurpose vehicles produced by Huta Stalowa Wola are based on the Patriot II and Tadeas platforms offered by CSG Group. Through industrial cooperation and the transfer of technology and expertise from CSG companies, these vehicles are already in series production at HSW. The Polish Armed Forces have already received a total of several dozen Waran 4x4 vehicles in various configurations, including as platforms carrying components of the Gladius Unmanned Search and Strike System (BSP-U).

About CSG

CSG N.V. ("CSG") is a Dutch company and a leading European defence industrial group, with its top management headquartered in Prague, Czech Republic. CSG develops and delivers defence and industrial technologies that contribute to a safer and more stable future. The Group focuses on the development and manufacturing of strategically important products, systems and technologies in the fields of defence and ammunition, as well as in related sectors such as aerospace. CSG operates

key manufacturing facilities in the United States, the United Kingdom, Spain, Italy, Germany, Greece, the Czech Republic, Slovakia, Serbia and India, and exports its products worldwide. In Poland, CSG expanded its manufacturing activities in 2026 through an investment by CSG Polska in DOMAR MS, a manufacturer of military cable harnesses, electrical connectors and other components for military systems. The Group continues to invest in the growth of its portfolio companies and the expansion of its core business activities. Key companies within the Group include Excalibur Army (Czech Republic, land systems), Tatra Trucks (Czech Republic, vehicles), MSM Group (Slovakia, artillery ammunition) and The Kinetic Group (United States, small-calibre ammunition). CSG employs more than 14,000 people across its integrated and affiliated companies. In 2025, the Group reported annual revenues of EUR 6.7 billion. CSG shares are traded on Euronext Amsterdam under the ticker **CSG**.
