A year since the start of COVID-19, sleep issues loom large

Unsurprisingly, sleep worsened during the past year.

In recognition of World Sleep Day 2021, Philips commissioned its annual survey with KJT Group, interviewing more than 13,000 people across 13 countries to discuss sleep behaviors. COVID-19 has impacted every facet of daily life, and the survey found that sleep health is no exception.

People recognize they aren't sleeping enough:

Cell phone use in bed is more common

Many are seeking online, telehealth resources to solve sleep issues

There's also been an increase in the use of online resources and telehealth to address sleep issues.

🚔 🚔 🚔 🖏 🖒 🖒 🖒 🖒 🆒

More than one-third turned to online resources (specifically online search engines) to learn more about sleep/treatments to improve sleep, with

Sleep apnea patients are struggling.

Despite the prevalence of sleep apnea and the variety of solutions to treat this condition, sleep apnea patients struggled to adhere to CPAP therapy over the past year, and previous negative attitudes around the condition are more common.

Compared to 2020¹, people who say sleep apnea impacts their sleep are significantly:

Among those who do not suffer from sleep apnea, consumers are more likely to agree:

These shifts in negative attitudes towards sleep apnea are concerning, especially for an already stigmatized condition. This is why Philips is committed to raising awareness around the importance of treatment, and creating solutions that offer:
