

## PRESS RELEASE

Nanterre, 16 July 2024

---

### VINCI Airports – Traffic at 30 June 2024

- **Passenger traffic rose 8.2% in the second quarter compared with 2023 (7.5% excluding Edinburgh and Budapest)**
- **Passenger traffic rose sharply in Edinburgh and Budapest, the two airports that joined the VINCI Airports network in June**

*In the paragraphs below, except where otherwise indicated, variations refer to traffic levels in the second quarter of 2024 compared with the second quarter of 2023.*

**Almost 81 million passengers travelled through airports in the VINCI Airports network this quarter**, rising 8.2% compared to 2023 (1.8% higher than in 2019). After April figures slightly lower than the 2019 level, passenger traffic rebounded in May and June, outpacing 2019 levels.

**This very good Q2 performance is due in particular to sustained traffic growth in the network's European airports.** The high proportion of bank holidays in May this year boosted flights to holiday destinations in southern Europe, which attracted large numbers of passengers, served by capacity increases among low-cost airline companies. In **Portugal**, passenger numbers continued to grow at a rapid pace for the great majority of airports and for all flight-length segments. Funchal airport (Madeira) even recorded historic passenger numbers for a month of May (up 52 % vs 2019). In France, traffic rose to record levels for May at **Nantes**, thanks to routes with Spain, the United Kingdom and Portugal. **Belgrade** airport benefitted in Q2 from the increase in services (Air Serbia up 6%, Lufthansa 9%, Swiss 12% vs 2023) notably to the big European cities (Frankfurt, London, Amsterdam, Paris). Traffic volumes at **London Gatwick** airport were boosted by strong demand for flights to the Mediterranean but even more by long-haul connections with the United States and China (Air China, China Eastern, Norse Atlantic). The airports in **Cabo Verde**, where traffic volumes are growing sharply, posted record passenger numbers in May, benefitting from the good performance of the European market (Portugal, United Kingdom, France).

**Traffic volumes also rose appreciably at Edinburgh and Budapest, the two airports that joined the VINCI Airport network in June.** At **Edinburgh**, traffic levels rose fast during the quarter thanks to an appreciable rise in capacity on the part of both low-cost (easyJet, Jet2) and traditional airlines (KLM, Lufthansa, SAS, British). Demand for routes with North America is growing sharply, supported by the historic operators (United, Air Canada) and new services launched by Westjet and JetBlue. **Budapest** airport benefitted this quarter from the addition of two new aircraft based there by the historic operator Wizz Air for the summer season, plus an increase in the Ryanair service offer. In addition, it has strengthened its connections to Asian destinations, with, in particular four airline companies now offering 20 weekly routes to China.

**Elsewhere, trends in traffic remained very brisk, mostly thanks to international routes.** The **Dominican Republic** airports benefitted fully from the good performance of long-haul flights to Europe and Brazil. **Santiago du Chili** airport saw record passenger numbers in June, fuelled notably by dynamic trends in international lines (Brazil up 74%, Peru 19%). In **Japan**, passenger numbers on some regional routes (Seoul, Hong-Kong, Taipei, Shanghai) continue to remain much higher than pre-crisis trends. In a positive signal of gradual restoration of traffic with China, several Chinese airlines (e.g. Spring Airlines, China Eastern, Shangdong Airlines) have recently announced the reopening of routes for the coming summer season.

#### **About VINCI Airports**

The world's leading private airport operator, VINCI Airports operates more than 70 airports in 14 countries. Thanks to its expertise as a global integrator, VINCI Airports develops, finances, builds and manages airports by providing its investment capacity and its know-how in optimizing operational performance, modernizing infrastructure and managing their operations and environmental transition. VINCI Airports is the first airport operator to have committed to an international environmental strategy in 2016, to achieve the goal of net zero emissions across its entire network by 2050. [www.vinci-airports.com](http://www.vinci-airports.com)

#### **About VINCI**

VINCI is a global player in concessions, energy and construction, employing 280,000 people in more than 120 countries. We design, finance, build and operate infrastructure and facilities that help improve daily life and mobility for all. Because we believe in all-round performance, we are committed to operating in an environmentally, socially responsible and ethical manner. And because our projects are in the public interest, we consider that reaching out to all our stakeholders and engaging in dialogue with them is essential in the conduct of our business activities. Based on that approach, VINCI's ambition is to create long-term value for its customers, shareholders, employees, partners and society in general. [www.vinci.com](http://www.vinci.com)
