Main events in 2022

- **Inspire**
As of 31 December 2022, Trifork’s Inspire sub-segment reached more than 40 million total views through the GOTO YouTube channel, and more than 6,800 people attended our in-person conferences in Copenhagen, Aarhus, London, Amsterdam, Palo Alto, Sydney, Melbourne, and Brisbane.

The growth in the Inspire sub-segment was supported by Trifork taking over the YOW! conference brand to strengthen our global position in software conferences which inspire our colleagues as well as existing and future customers. Trifork has extensive experience in operating and running our GOTO conferences, and adding YOW! to the offering means that Trifork now is in an even better position to facilitate the newest technology trends shaping the future of our work.

- **Build**
Trifork’s Build sub-segment, where we develop innovative software solutions for customers, grew revenue by 16.5% organically. This was driven by strong demand especially in Digital Health, where Trifork delivered e.g., the Danish pregnancy record app and the Quality Reporting Platform for RKKP (Regionernes Kliniske Kvalitetsudviklingsprogram) in Denmark. The growth in Digital Health was supported by Trifork entering into an agreement with the Swiss company BlueSpace Ventures to build a new digital platform (Compassana) combining Swiss health insurance and healthcare providers in a patient-centric way. Becoming the lead technology partner was a milestone in Trifork’s effort to bring digital health products and services to more markets outside of Denmark.

In 2022, 77% of the total revenue in Build came from strategic customers that have conducted business with Trifork for at least two years.

- **Run**
Trifork's Run sub-segment, where we operate and maintain internally or externally developed products for our customers, grew by 18.9% driven by strong demand in Cyber Protection and Cloud Operations. Most revenue in this sub-segment is recurring in its nature.

In December, Trifork agreed to acquire 60% in the Zurich-based company Institut für Bildungsevaluation Zürich AG ("IBE"). The acquisition was completed on 6 January 2023 and will be included in the group consolidation for 2023. IBE has for many years worked within the area of educational measurement and methods of item response theory. Trifork has for several years been an active partner in the development of IBE's software which is used for computer-based adaptive testing and learning. The acquisition is aligned with Trifork's strategy to digitalize education, and it strengthens the position for both companies in the Swiss market. The inorganic growth from this acquisition is expected to account for 2.0-2.4% of total revenue growth in 2023.

- **Trifork Labs**
Trifork Labs, the R&D investment arm of Trifork Group, invested in Promon AS (cyber protection for apps), Feats ApS (professional network), TSBThree ApS (smart building), and Fauna (digital health for pets) and participated in follow-on investments in Arkyn Studios ApS (app suite for SAP enterprises), DRYP A/S (water infrastructure IoT), Kashet Ltd. (mobile first banking), Visikon ApS (healthcare communication), &Money ApS (fintech app), and Edia B.V. (AI solutions).
