Note 2

Financial assets and liabilities

NAXS's financial instruments consist of fund investments, cash and cash equivalents and accounts payable. Level 3 investments includes only the Company's publicly traded share of the fund holdings / securities of unlisted companies (in some cases, also listed companies). When observable prices are not available for these securities, the fund manager uses one or more valuation techniques (e.g. yield methods or income-based methods), or a combination of techniques, for which sufficient and reliable data are available. Within Level 3, the market approach generally uses earnings multiples of comparable companies, while the income-based approach generally uses the present value of estimated future cash flows, adjusted for liquidity, credit, market and/or other risk factors.

For NAXS, the book value of all financial assets and liabilities corresponds to fair value. All amounts are shown in the reported balance sheets.

Definitions and Alternative performance measures

NAXS applies the guidelines issued by the European Securities and Markets Authority (ESMA) for alternative key ratios. Alternative key figures are financial measures of historical or future earnings trend, financial position, financial results or cash flows that are not defined or specified in the applicable rules for financial reporting

Alternative key ratios are stated when, in their context, they provide clearer or more in-depth information than the measures defined in applicable financial reporting rules. The alternative key figures are derived from the consolidated financial statements. Alternative key ratios are stated when, in their context, they supplement the measures defined in IFRS. The starting point for the provided alternative key figures is that they are used by management to assess the financial development and are thus considered to provide valuable information to analysts and other stakeholders. NAXS regularly uses alternative key ratios as a complement to those key ratios that generally constitute good accounting practice.

Below are definitions and all the alternative key figures used.

Buyout fund

A private equity fund, whose strategy is to acquire a controlling interest in the targeted companies

Cash & cash equivalents

Cash, bank and short-term investments

*Cash per share**

Cash & cash equivalents in relation to the number of outstanding shares at the end of the period

Commitment

The maximum amount that a limited partner agrees to invest in a fund

Current commitments

Acquisition cost for private equity fund investments, plus remaining commitments to private equity funds

*Equity ratio**

Equity in relation to total assets.
