## Order for a research MBE machine in Asia

**Bezons, December 10, 2019 - 8:00am - RIBER, a global market leader for semiconductor industry equipment, is announcing an order for a research system in Asia.**

An Asian research center has just ordered an MBE 412 research machine for the study of high-frequency lasers, whose main application will be the biomedical field.

This machine will be delivered during the year 2020.

### **About RIBER:**

RIBER is a global market leader for semiconductor industry equipment. It designs and produces molecular beam epitaxy (MBE) systems as well as evaporation sources and cells for the semiconductor industry. It also provides technical and scientific support for its clients, maintaining their equipment and optimizing their performance and output levels. Through its high-tech equipment, RIBER performs an essential role in the development of advanced semiconductor systems that are used in numerous consumer applications, from information technologies to OLED flat screens and next-generation solar cells.

RIBER is listed on the regulated market Euronext Paris (Compartment "C") and is part of the CAC Small, CAC Technology and CAC T. HARD. & EQ indices. RIBER is eligible for SME share-based savings schemes (PEA-PME) and is a BPI France-approved innovative company.
