Voltalia awarded by Sustainalytics “Top-Rated Industry” distinction for its ESG performance

Voltalia, (Euronext Paris, ISIN code: FR0011995588), an international player in renewable energy, ranks among the best-rated companies in its sector for its management of ESG (environmental, social and governance) risks and its contribution to sustainable development.

With an ESG score of **15**, Voltalia ranks among the top **6%** of companies in the Utilities industry, occupying **34th place out of 644 companies**. In the renewable energies sub-sector, Voltalia ranks **14th out of 88**, confirming its leadership in ESG risk management. Sustainalytics' methodology is based on an analysis of the ESG risks to which a company is exposed and its ability to manage them effectively. The lower the score, the better the company's performance in managing these risks.

This result is due in particular to Voltalia's Mission-driven company status, which places social and environmental responsibility at the heart of its business model. This structural commitment enables the company to integrate ESG issues into all its strategic and operational decisions, thereby strengthening the resilience and sustainability of its activities.

“This distinction from Sustainalytics confirms the relevance of our commitments to social and environmental responsibility. It rewards the efforts of our teams to integrate ESG at the heart of our business model and growth strategy”, says Robert Klein, CEO of Voltalia.

Voltaia confirms its commitment to ESG through other ratings

Voltaia's commitment to its employees is reflected in its ranking in the Humpact¹ ranking, where the company came 16th out of nearly 300 companies, testifying to its attention to well-being and its responsible management of human resources.

With an AA rating from MSCI², Voltaia ranks among the top 34% of companies in the utilities sector (community services), underlining its ability to effectively manage ESG risks from a financial perspective.

Voltaia reaffirms its ambitions and Mission 2027 and 2030 objectives

Since May 2021, Voltaia has adopted the status of Mission-driven company within the meaning of Article L. 210- 10 of the French Commercial Code, bringing its activity into line with its articles of association based on three Mission objectives. Demonstrating its determination to pursue its action in favor of the global environment and local development, Voltaia has set ambitious targets:

- In 2027, more than 4 million tonnes of CO₂ avoided
- In 2027, 100% of capacity under construction with a Stakeholder Engagement Plan (SEP) aligned with IFC (World Bank Group) standards
- In 2027, 50% of solar capacity held in operation located on land that is co-used and upgraded soil, i.e. land combining solar and another human activity (such as buildings, parking lots, agriculture and grazing) or located on land with low biodiversity, agricultural or economic potential (such as deserts, industrial wastelands and disused quarries)
- In 2030, -35% carbon intensity in kgCO₂/MW (Scope 3) of solar power plants owned compared with 2022, by prioritizing the acquisition of low-carbon solar panels

Next on the agenda: **2024 results**, March 13, 2025 (before market opening)

¹ Humpact is a non-financial performance rating agency that focuses on the human resources aspects of companies.

² MSCI (Morgan Stanley Capital International) ESG ratings aim to measure a company's management of financially relevant ESG risks and opportunities. Ratings range from CCC to AAA.
