Sdiptech strengthens business area - recruits Johan Lahiri

Sdiptech is a technology group focusing on infrastructure that acquires and develops companies with a focus on creating more sustainable, efficient and safe societies. The Special Infrastructure Solutions (SIS) business area includes the three sub-segments Air & Climate Control, Safety & Security and Transportation. Since 2019, Sdiptech has acquired six companies within SIS which today have 13 units. Johan Lahiri has been recruited as Business Unit Manager to strengthen the growing business area.

Johan Lahiri most recently come from Seco Tools, where he has worked since 2007 in a number of different positions in Sweden, India and the Netherlands, including Director Mergers & Acquisitions and Global Product Line Manager. Johan will work closely with existing companies within the business area, as well as new acquisitions.

"We are very happy to welcome Johan to Sdiptech. The underlying market for our sub-segments within Special Infrastructure Solutions is in a strong upward trend where the need for niche technical products and services is increasing. Johan has strong experiences in management and control as well as acquisitions. His expertise will be very valuable to us", says **Anders Mattson, Business Area Manager for SIS at Sdiptech.**

"Sdiptech's business model is well-proven, but their internal acquisition team and focus on sustainable niche companies in infrastructure make them even more interesting. In recent years, the company has grown strongly in the market and I am very much looking forward to being involved in developing Sdiptech and the business area further", says **Johan Lahiri.**

Johan will start at Sdiptech in January 2021 and the goal for the business area is to grow in the long term through both organic growth and continued acquisitions on Sdiptech's focus markets in Western Europe.
