Crédit Agricole Transitions & Énergies becomes a majority shareholder in COMWATT, a specialist in energy optimisation

Crédit Agricole Transitions & Énergies has announced the acquisition of a majority stake in COMWATT, an innovative company based in Montpellier, France, specialising in the production and optimisation of solar energy consumption for individual customers.

This transaction forms part of Crédit Agricole Transitions & Énergies' objective to accelerate the development of concrete solutions to support Crédit Agricole Group customers in their plans to decarbonise and manage their energy costs.

With COMWATT, Crédit Agricole Transitions & Énergies is strengthening its solar self-consumption offer. These new services will complement those already offered, such as the "J'écorénove mon logement" platform, which is dedicated to residential energy renovation.

The impact of the transaction on the CET1 ratio of Crédit Agricole S.A. is not significant.
