

Press Release

Atos and Intigriti launch new integrated Bug Bounty service

Paris and Lille, France – September 9, 2021 - [Atos](#) and [Intigriti](#), the European leading platform for bug bounty and ethical hacking, announce their collaboration to release an end-to-end bug bounty offering for organisations.

Bug bounty consists of using expert researchers and ethical hackers, selected according to a precise protocol, to search for vulnerabilities in an application or system. First introduced in 1995, this approach is the logical and complementary continuation of penetration testing to detect security flaws in an organisation on an ongoing basis.

By combining [Intigriti's platform](#) with [Atos' cybersecurity services](#), customers will have access to a simpler (one-stop shop, easy implementation) and more in-depth approach to vulnerability detection and remediation. Atos consultants will support the client organisation from start to finish in the creation and management of their bug bounty programs, by providing several key services such as audit, penetration testing, analysis of platform reports, vulnerability classification, monitoring, remediation, and managed detection and response services.

Atos and Intigriti – International Cybersecurity Forum, Lille, France – September 8, 2021.

The partnership extends Atos' expertise and services in vulnerability testing to private and public markets worldwide. It also allows Intigriti to expand its presence in a very competitive French market and to increase its international visibility by leveraging Atos' worldwide presence.

*"We are impressed by the excellent feedback from our customers regarding the quality of services and the maturity of the Intigriti platform. By integrating our cybersecurity services to the Intigriti platform, we can offer enterprises the best of ethical hacking, in addition to our existing cybersecurity solutions," said **Jean-Claude Tapia, Director, Cybersecurity Services, Atos France.***

*"Atos has extensive experience in managed bug bounty for enterprises, which is a true asset for our development in the French market. We are delighted to join forces and help more and more companies strengthen the security of their systems," said **Stijn Jans, CEO of Intigriti.***

About Atos

Atos is a global leader in digital transformation with 105,000 employees and annual revenue of over € 11 billion. European number one in cybersecurity, cloud and high-performance computing, the Group provides tailored end-to end solutions for all industries in 71 countries.
