## EDF revises upwards its nuclear output estimate for 2020

The EDF Group is revising upwards its nuclear output estimate in France for 2020, to around 315-325 TWh, compared with the 300 TWh estimated on April 16.

This revision reflects the adjustment of the duration of planned outages for 2020, taking into account the conditions observed on sites for resuming activities.

The output estimate for 2021 and 2022 remains unchanged at this stage.

A key player in energy transition, the EDF Group is an integrated electricity company, active in all areas of the business: generation, transmission, distribution, energy supply and trading, energy services. A global leader in low-carbon energies, the Group has developed a diversified generation mix based on nuclear power, hydropower, new renewable energies and thermal energy. The Group is involved in supplying energy and services to approximately 38.9 million customers<sup>(1)</sup>, 28.8 million of which are in France. It generated consolidated sales of €71 billion in 2019. EDF is listed on the Paris Stock Exchange.

(1) The customers were counted at the end of 2019 per delivery site; a customer can have two delivery points: one for electricity and another for gas.
