CHAIRMAN'S STATEMENT

Despite the logistical challenges arising from the pandemic in 2021, CBM is now in a stronger position for transformative growth in the coming years. In 2021, CBM's subsidiary company Diamond Wood China Limited (DWC) was able to progress on its strategy to build an Accoya® acetylated wood (Accoya® Wood) factory in China, with its Joint Venture (JV) partner, Nantong Acetic Acid Company (NTAAC). NTAAC is amongst China's top speciality chemical companies, serving global multinational food and beverage producers in the US and Europe. NTAAC is listed on the Shanghai Stock Exchange with a market capitalisation of €515 million. As reported in the 2020 Report & Accounts on 31 March 2021, DWC and NTAAC signed the investment agreement constituting the JV.

Since then, and through consultation with local government officials in Jiangsu province, DWC and NTAAC have established the timing and key milestones of the Accoya® Wood factory project. There is a schedule for the construction of the Accoya® Wood factory and the corresponding financing. The factory will be built in the Jiangsu Rudong Yangkou Port Economic Development Zone.

Under the investment agreement between the two parties, DWC is the majority shareholder in the JV company, Jiangsu Dragon Wood Limited (JDW). Additionally, DWC will receive a royalty on profits from JDW. DWC's equity investments into JDW is being financed through CBM, which previously entered into a subscription agreement for €15m euros with a private family office. During 2021, the family office subscribed for CBM shares under the subscription agreement related to the achievement of milestones in the Accoya® Wood factory project.

The following is a brief update of the JDW Accoya® Wood factory developments in China:

- The Accoya® technology licensor, Titan Wood, transferred the Accoya® Basic Engineering Design information to DWC during 2020 and 2021.
- During 2021 Accsys' subsidiary, Titan Wood, provided technical assistance to DWC for the preparation of the Nantong Accoya® Wood factory engineering and equipment selection.
- An LOI with a leading Chinese bank was signed with JDW on 29 April 2021 regarding a €26m debt financing to JDW.
- Registration of JDW was completed and the business license issued on 18 May 2021.
- JDW completed the signing of the Project Investment Agreement with local Chinese government authority regarding land, utilities and taxes on 18 May 2021.
- Milestone 1 and Milestone 2 capital injections into JDW were completed by both shareholders, NTAAC and DWC, in year 2021.
- All DWC's wholesaler agreements have been officially transferred to JDW during September 2021. The DWC sales staff have also been transferred to JDW.
- The Feasibility Study Report approval was granted to JDW on 15 November 2021 by the Chinese government, and the Registration Certificate of Investment Project of Jiangsu Province obtained. The JDW Project is now officially posted on the government web site (http://222.190.131.17:8075).
- The approval of Social Stability Assessment Report was granted for the JDW project on 30 November 2021 by the Chinese government.
- JDW finalized the Front-End Engineering Design with an engineering, procurement and construction (EPC) firm, LBT Shanghai in November 2021.
- The Energy Conservation Assessment application was approved on 24 February 2022 by the Chinese government.
- The Environmental Impact Assessment report has been submitted for final approval

These are the material developments towards the construction of the Accoya® Wood Factory. The key JDW activities are being undertaken by the Group's people in the region, so international travel restrictions have had minimal impact on the progress of the project.

Accoya® Wood is produced using a cutting-edge patented technology, enabling it to resist rot, defy the elements and stay strong for decades. Guaranteed for 50 years above ground and 25 years in ground or freshwater, the performance and properties associated with the Accoya® brand are sought by joinery manufacturers, architects and builders worldwide.

CHAIRMAN'S STATEMENT (continued)

In 2021 the Group invested in the development of its marketing and sales operations in China and the ASEAN countries, which resulted in a new offtake agreement being added to the growing list of manufacturers and wholesalers in the region committing to purchase significant volumes of Accoya® Wood. These agreements, and the ongoing business with the Company's existing base of distribution partners, attest to a strong and increasing demand for Accoya® Wood in the region.

The Group increased revenues in 2021 of €1,014,000 (2020: €857,000). The Group increased its loss for the 12 months ended 31 December 2021 to €4,891,000 (€4,116,000 in 2020). The increased loss is largely due to the additional loss from the group's share of the JV, and higher share-based payment charge.

I would like to take this opportunity to again express my sincere gratitude to my fellow Directors and staff for their hard work and commitment over the past year.

I look forward to providing you with further updates at our next Annual General Meeting in June 2022.

Paul Richards
Chairman
30 May 2022

Cleantech Building Materials plc

STRATEGIC REPORT

Strategy and Objectives

The Group's primary strategic objectives for 2022 are:

1. To engage a leading engineering, procurement and construction firm to lead the building of an Accoya® Wood manufacturing facility in China.
2. Together with the Group's chemical industry joint venture partner, NTAAC, to ensure that the Accoya® Wood manufacturing facility is constructed on time and on budget, and operated efficiently.
3. To build relationships with large-volume wood product manufacturers through testing and trials in anticipation of Accoya® Wood being produced in the Group's own factory.
4. To develop the Group's marketing and sales initiatives to further expand market channels and offtake agreements.

Financial Review of the Business

The Group's revenues for the year ended 31 December 2021 increased to €1,014,000 (2020: €857,000) and consisted mainly of Accoya® Wood sales to customers in China, Thailand, Vietnam, Singapore, Indonesia, and Malaysia.

The Group realised a net loss of €4,891,000 for the year to 31 December 2021 (2020: €4,116,000). As at 31 December 2021, the Group had cash and cash equivalents of €158,000 (2020: €25,000) as well as an available facility of approximately €3.4m (Loan Facility), and an equity commitment to finance the JV. The Company has net current liabilities of €207,000 (2020: €797,000).

Once the Group is producing its own Accoya® Wood, the Board believes the financial performance of the Group will be radically transformed.

Principal Risks and Uncertainties

The principal risks associated with the Group are its ability to:

1. Receive sufficient imported supply of Accoya® Wood to satisfy current demand until the Group's own factory is operational;
2. Construct and operate an Accoya® Wood manufacturing facility in line with its business plan; and
3. Grow sales of Accoya® Wood in line with its business plan.

The Group's current business is the importing and marketing of Accoya® Wood, which the Group has done since 2008. The Group has sufficient financing available to operate this existing import business on a going concern basis. The Group's Directors are of a view that an opportunity exists for the Group to build and operate its own Accoya® factory in China.

In order to fund its operations and the construction of the new factory, the Group has a loan facility available from a third party, the financing commitments by NTAAC and a leading Chinese bank, and the 10 July 2019 subscription agreement for €15m. However, the provision of the funds is inherently uncertain, as they are conditional on the achievement of project milestones related to the construction of the Accoya® Wood factory in China; these milestones including certain government approvals, project execution, and general country risk. Several key milestones have already been achieved, and the Company has received equity funds in relation to these milestones. In summary, the validity and success of our business plan is dependent on many factors, some outside of the direct control of the Group's management.

Despite these uncertainties, the Directors are confident that the Group has sufficient financing in place to build an Accoya® Wood factory and to execute the Group's business plan and to fully realise the carrying amount of the non-current assets.

To deal with the above-mentioned risks and uncertainties, the Group is working closely with its technology licensing partner in Europe, Titan Wood, and our local Chinese partners, NTAAC and a leading Chinese bank, to closely manage the execution risks associated with this type of project.

Directors' statement of responsibilities under section 172 Companies Act 2006

The Directors are fully appraised of their responsibilities under section 172 of the Companies Act 2006 and are so advised and updated on a regular basis by CBM's Group General Counsel and where appropriate by the Group's external legal advisers in London and China.

CBM – A sustainable and responsible business

Cleantech Building Materials (CBM or the Company) was founded in 2015 on the principle that operating in a sustainable and responsible manner is key to the growth and success of a modern business. The Company has a number of policies in place that underpin its day-to-day operations, ensuring the safeguarding of both the environment and its stakeholders.

This highlights CBM's fundamental commitment to delivering responsible business growth and development, whilst being at the forefront of providing a more sustainable option for developing the built environment.

The nature of the Group's environmentally sustainable business evidences the Directors' aim that the Group be and remain a contributing and good "corporate citizen".

Our business is about sustainability. We want to help to ensure that our planet's precious resources are used appropriately for the benefit of current and future generations. The Board considers that the business and strategic decisions which it takes now in furtherance of the Group's business objectives are of long-term benefit for the global environment, reducing the need for hardwood deforestation and maintaining the hardwood habitat for wildlife.

Environmental

The Group is currently focused on the sale and ultimately the production of Accoya® Wood. The Group has begun the process of building the first Accoya® Wood factory in China to serve the megatrend of urbanisation sweeping across Asia, and to enable the manufacture of wooden products destined for the US and European markets.

Accoya® Wood is a high-performance solid wood, which is both sustainable and non-toxic to the environment. It is produced through the enhancement of sustainably grown Radiata Pine into the ideal material for windows, doors, shutters, decking, cladding and much more.

Architects and manufacturers have traditionally chosen Accoya® Wood foremost for its guaranteed durability of over 50 years, its dimensional stability, and its excellent insulation qualities. However, in recent times there is an increased awareness that the alternative materials with which Accoya® Wood competes (aluminium, steel, uPVC, tropical hardwoods) are intensely resource depleting and/or highly carbon-polluting. Accoya® Wood 'locks in' carbon for the 50+ years of its life cycle. For every cubic meter of Accoya® Wood produced, 944kg of CO2 is sequestered, compared with 88kg of CO2 emitted. For this reason, Accoya® Wood is the only structural building material to have received Cradle to Cradle™ Gold certification.

The Group's main operating business in Asia, DWC, has been FSC® certified since 2008, and this certification covers the entire business. The Accoya® Wood manufacturing process has been awarded the "Sustainable Production Technology Award" in the Netherlands, in part due to how the key outputs are recycled. The CBM Group's Accoya® Wood factory in China will similarly make sustainable production the overriding criteria of its mission. The Chinese government is a strong supporter of this approach.

Social

CBM's stakeholders are an integral part of the business, they consist of customers, suppliers, employees, shareholders, advisors and the local communities within which the Group operates.

The Group's business has existed since 2008. During that time it has built and maintained relationships with key investors, advisers and suppliers including the licensor of the Accoya® Wood product, Titan Wood. The Directors recognise the importance of these relationships and take active steps to develop and strengthen them through dialogue and engagement. These relationships are regularly monitored at Board level.

As part of CBM's mission to shape a more sustainable future, every step the Group takes is taken with ethics and integrity in mind. The Group's senior management seeks to regularly engage with all stakeholders to understand their views and respond to any concerns they have.

Employees

The Group was founded on the principle of diversity as a source of differentiated competitive strength, with employees located across Europe and Asia. Opportunities are given to the most appropriate current and prospective employees irrespective of age, gender and disability. The Group ensures adherence to the most current legislation with all local labour laws and apply what the Directors believe are appropriate standards and systems to monitor and to ensure the welfare of those employees.

The Group recognises that consistent, transparent and timely communication is key to employee engagement and uses a number of channels and platforms to communicate with its people at all levels of the business. The priority is to ensure that employees understand the Group's vision, the priorities of the Group, as well as the strategy and objectives. Moreover, there is regular communication with employees about the values of the business and the behaviours expected of everyone, ensuring an appropriate business culture is maintained.

Customers

Transparent communication to our customers and channel partners is critical to the success of the Group's business. We work closely with industry pioneers, who share CBM's vision of addressing the challenges of rapid urbanisation with high-performance, sustainable building materials. The Group has a collaborative approach with our customers and channel partners, aiming to become their long-term partners.

Supply Chain

The Group selects suppliers and subcontractors that align with its business vision and values and actively engages with its supply chain to promote the Group's principles and practices. Key amongst these are the FSC-certified suppliers of Radiata Pine, providing the Group with a long-term source of sustainable wood with which to produce Accoya® Wood. Many of the Group's relationships are managed at a local level to support local communities.

Shareholders

As a quoted company, we ensure there is clear, accurate and transparent communication between the Board and shareholders, and the Company provides updates on our strategy and progress towards our objectives. We carry this out through news announcements, the CBM website, the annual report and at Annual General Meetings. Additional, periodic meetings are held with shareholders.

The Chairman ensures that he is available to discuss issues with key shareholders outside of the shareholder meetings which are held. The Company complies with its disclosure obligations under the rules of Nasdaq First North Growth Market to ensure that shareholders are updated on key developments on a timely basis.

Governance

Good corporate governance is one of CBM's core values and, as a quoted entity, it is something that the Group takes very seriously. Although the UK Corporate Governance Code is not compulsory for companies whose shares are admitted to trading on Nasdaq First North Growth Market, the Board applies the principles of the UK Corporate Governance Code as far as practicable and appropriate for a relatively small public company.

Each Board meeting addresses compliance by the Company with its corporate governance codes and reinforces the Board's requirement that its business be conducted to all due ethical standards and with integrity.

ON BEHALF OF THE BOARD

Paul Richards
Chairman
30 May 2022

REPORT OF THE DIRECTORS

The Directors present their report and the audited financial statements for the year ended 31 December 2021.

PRINCIPAL ACTIVITIES

The principal activities of the Group are the sale of specialist wood products, technology licensing, sourcing and procurement, business development and investment holding.

RESULTS

The loss for the year amounted to €4,891,000 (2020: loss of €4,116,000). The Directors do not propose the payment of a dividend (2020: €nil).

DIRECTORS

The Directors set out below held office throughout the year except where stated:

Syed Jeff Erik Jaffrey (Resigned on 31 December 2021)
Adrian Wyn-Griffiths
Andrew Paul Richards
Jason Hung-Wen Wang
Dwight Wei Zou
Simon Allocca
Briony Mathieson (Appointed 10 November 2021)

DIRECTORS' REMUNERATION

	Year to 31 Dec 2021 €'000	Year to 31 Dec 2020 €'000
Directors' fees	128	48
Salaries and allowances	719	636
Share based payments	258	212
Employer pension contributions	21	20
	1,126	916

GOING CONCERN

The Directors have considered the future liquidity of the Group in light of the net loss of €4,891,000 (2020: loss of €4,116,000) during the current year and the net current liabilities as of 31 December 2021 of €207,000 (2020: €797,000) and the material uncertainty regarding the Group's ability to execute the Group's business plan.

The Directors have reviewed the Group's cash flow projections prepared by management covering a period of twelve months from the date of the approval of the consolidated financial statements. Management's projections make key assumptions with regard to (i) the anticipated cash flows from the Group's operations, (ii) the availability of future funding from the Loan Facility, and (iii) the financing from the Investor, NTAAC and a leading Chinese bank. Covid-19 contributed to the delay in finalising the joint venture agreement with NTAAC, but this was finally signed in March 2021. In April 2021 the Joint Venture received a LOI from a leading Chinese bank of NTAAC regarding €26m debt financing. During the year progress on a range of matters has been made, including local government approval of project registration, social stability assessment and feasibility study. The factory site is also currently being cleared in preparation for construction in 2022. Since year end there has also been approval of the energy conservation assessment. In November 2021, the Group obtained an additional loan facility of €3m to support the Group's operations (Loan Facility).

Based on these cash flow projections, the Group will have sufficient financial resources in the twelve months period from the date of approval of the consolidated financial statements to meet its financial obligations as and when they fall due. Accordingly, the Directors consider that it is appropriate to prepare the consolidated financial statements on a going concern basis.

Should the Group be unable to continue as a going concern, adjustments would have to be made to restate the value of assets to their recoverable amounts, to provide for further liabilities that might arise and to reclassify non-current assets and non-current liabilities as current assets and current liabilities. The effect of these potential adjustments has not been reflected in the consolidated financial statements.

FUTURE DEVELOPMENTS

The Group expects to commence construction of its own Accoya® Wood manufacturing facility during 2022.

FINANCIAL RISK MANAGEMENT

Information relating to the Group's financial risk management is detailed in note 23 to the financial statements.

EVENTS AFTER THE REPORTING DATE

No subsequent events to note.

DIRECTORS' RESPONSIBILITIES STATEMENT

The Directors are responsible for preparing the Strategic Report, Directors' Report, any other supporting information and the group and parent company financial statements in accordance with applicable law and regulations. Company law requires the Directors to prepare group and parent company financial statements for each financial year. Under that law, they are required to prepare the group financial statements in accordance with UK adopted International Accounting Standards (UK IFRS) and applicable law and have elected to prepare the parent company financial statements in accordance with UK Accounting Standards and applicable law (UK Generally Accepted Accounting Practice).

Under Company law, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the group and parent company and of their profit or loss for that year. In preparing each of the group and parent company financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the group and the parent company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the group and the parent company's transactions and disclose with reasonable accuracy at any time the financial position of the group and the parent company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the group and the parent company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Under applicable law and regulations, the Directors are also responsible for preparing a Directors' Report and Strategic Report that comply with that law and those regulations.

The Directors are responsible for the maintenance and integrity of the website. Legislation in the United Kingdom concerning the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Provision of information to auditors

Each of the persons who are directors at the time when this Directors' Report is approved has confirmed that:

- so far as that director is aware, there is no relevant audit information of which the Company's auditors are unaware; and
- that director has taken all the steps that ought to have been taken as a director in order to be aware of any information needed by the Company's auditors in connection with preparing their report and to establish that the Company's auditors are aware of the information.

AUDITOR

In accordance with section 489(4) of the Companies Act 2006, a resolution proposing the reappointment of Crowe U.K. LLP will be put to the members at the forthcoming Annual General Meeting.

ON BEHALF OF THE BOARD

Paul Richards
Chairman
30 May 2022

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF CLEANTECH BUILDING MATERIALS PLC

Qualified Opinion

We have audited the financial statements of Cleantech Building Materials plc (Parent Company) and its subsidiaries (Group) for the year ended 31 December 2021, which comprise:

- the Group income statement and statement of other comprehensive income for the year ended 31 December 2021;
- the Group and parent company statements of financial position as at 31 December 2021;
- the Group and parent company statements of changes in equity for the year then ended;
- the Group statement of cash flows for the year then ended; and
- the notes to the financial statements, including significant accounting policies.

The financial reporting framework that has been applied in the preparation of the Group financial statements is applicable law and UK adopted International Accounting Standards (UK IFRS). The financial reporting framework that has been applied in the preparation of the Parent Company financial statements is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland (United Kingdom Generally Accepted Accounting Practice).

In our opinion, except for the possible effects of the matter described in the basis for qualified opinion section of our report:

- the financial statements give a true and fair view of the state of the Group’s and of the Parent Company's affairs as at 31 December 2021 and of the Group’s loss for the year then ended;
- the Group financial statements have been properly prepared in accordance with UK IFRS;
- the Parent Company financial statements have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice;
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for qualified opinion

Limitation of scope in respect of the interest in joint venture

As a consequence of the unprecedented Covid-19 pandemic restrictions in China, we were unable to obtain sufficient and appropriate audit evidence to support the carrying value of Group’s interest in joint venture at the reporting date and its share of loss in joint venture for the period then ended, as described in note 15. We were unable to satisfy ourselves by alternative means concerning the carrying amount of the interest in joint venture of €244,000 at 31 December 2021 and the share of losses in the joint venture of €332,000 for the year then ended, which are included in the Group statement of financial position and income statements respectively, by using other audit procedures. Consequently, we were unable to determine whether any adjustment to these amounts were necessary. In addition, were any adjustment to these amounts to be required, the strategic report would also need to be amended.

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor’s responsibilities for the audit of the financial statements section of our report. We are independent of the Group in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC’s Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified opinion.

Material uncertainty relating to going concern

We draw attention to note 2 in the financial statements, which indicates that the Group and the Parent Company still requires additional funds to execute its business plan, construct the planned manufacturing facility and recover the carrying value of its intangible assets. The execution of the business plan and the timing of the above matters are inherently uncertain. Changes in these factors could result in an impairment to the carrying value of the licence asset. We identified the carrying value of the licence asset and the potential for its impairment as a key audit matter and the associated risks are described in the ‘Key Audit Matters’ section of the audit report. Note 5 of the financial statements provides additional information on the critical accounting judgements and significant estimation uncertainty in relation to the carrying value of the licence, the use of which is inherently linked to the going concern assumption. As stated in note 2, these events or conditions, along with the other matters as set forth in note 2, indicates that a material uncertainty exists that may cast significant doubt on the Group and the Parent Company’s ability to continue as a going concern. Our opinion is not modified in respect of this matter

In auditing the financial statements, we have concluded that the directors’ use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the directors’ assessment of the Group and the Parent Company’s ability to continue to adopt the going concern basis of accounting included. An explanation of how we evaluated management’s assessment and the key observations arising with respect to the evaluation is detailed below.

The Board is responsible for ensuring that it is appropriate to prepare the financial statements using the going concern basis and that it has sufficient resources to remain in operational existence for a period of at least 12 months from the date of approving these financial statements.

We have obtained and reviewed the Board's paper setting out the going concern assessment and examined supporting working capital forecasts. Our audit procedures were as follows:

- Tested accuracy of the models used by management in their assessment;
- Challenged with management whether the assumptions are realistic, achievable and consistent when compare to past performance and other forecast information used during the audit;
- Discussed the going concern assumption with management and evaluated their assessment of the Group and the Parent Company's liquidity requirements; and
- Assessed the reasonableness of management's budget/forecasts, including comparison to actual results achieved in the year and the evaluation of downside sensitivities.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant section of this report.

Overview of our audit approach

Materiality

In planning and performing our audit we applied the concept of materiality. An item is considered material if it could reasonably be expected to change the economic decisions of a user of the financial statements. We used the concept of materiality to both focus our testing and to evaluate the impact of misstatements identified.

Based on our professional judgement, we determined overall materiality for the Group financial statements as a whole to be €200,000 (2020: €230,000), based on a measure of 2% of total assets. Materiality for the Parent Company financial statements as a whole was set at €60,000 (2020: €60,000).

We use a different level of materiality ('performance materiality') to determine the extent of our testing for the audit of the financial statements. Performance materiality is set based on the audit materiality as adjusted for the judgements made as to the entity risk and our evaluation of the specific risk of each audit area having regard to the internal control environment. We determined Group's performance materiality to be €140,000 (2020: €161,000) and the Parent Company's performance materiality to be €42,000 (2020: €42,000).

Where considered appropriate performance materiality may be reduced to a lower level, such as, for related party transactions and directors' remuneration. We agreed with the Audit Committee to report to it all identified errors in excess of €6,000 (2020: €6,000). Errors below that threshold would also be reported to it if, in our opinion as auditor, disclosure was required on qualitative grounds.

Overview of the scope of our audit

The Group's accounting function is headquartered in Hong Kong. The accounting records for the parent company are maintained by a service organisation in the UK which reports directly to the Chief Financial Officer in Hong Kong. In establishing the overall approach to the group audit, we determined the work that needed to be performed by us, as the group engagement team, and the component auditors, a member firm of the Crowe Global network operating under our instruction. Where the work was performed by component auditors, we determined the level of involvement we needed to have in the audit to be able to conclude whether sufficient appropriate audit evidence had been obtained as a basis for our opinion on the financial statements as a whole. Senior members of the group engagement team reviewed the work of the component auditors and communicated with the audit teams and local management on a regular basis, including the matter described in the basis of qualified opinion of our report.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current year and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified. These matters included those which had the greatest effect on the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In addition to the matter described in the basis for qualified opinion section and the material uncertainty in relation to going concern section, we have determined the matters described below to be the key audit matters to be communicated in our report. This is not a complete list of all risks identified by our audit.

Key audit matter	*How the scope of our audit addressed the key audit matter*
Valuation of intangible assets *The carrying value of the license asset at 31 December 2021 was €10.1 million (2020: €11.2 million). There is a risk that the Group may not be able to exploit the value of the Accoya® licence or that the conditions of the Accoya® licence may not be met which could mean the value of the asset is impaired.* *There are significant accounting judgements and estimates in relation to the carrying value of the licence, which management has disclosed in note 5 to the financial statements.* *The key judgements are:* *a) that the manufacturing plant is funded and commences construction in H2 2022; and* *b) construction of the manufacturing plant is reliant on approval from local government, which is considered by management to be received in line with the expected commencement date of construction.* *The execution of the business plan and the timing of the above matters are inherently uncertain. Changes in these factors could result in an impairment to the carrying value of the licence asset.*	*We held discussions with management to understand the progress on the execution of the Business Plan on which certain future committed funding arrangements are predicated. Over the course of the factory build out project, there are a number of additional key milestones still pending completion, including completion of all necessary construction permits and engineering works. We reviewed evidence and documentation to demonstrate the progress of these matters. We also reviewed management's assessment of the recoverable amount of the licence asset. This included an assessment of licence conditions, particularly progress on obtaining the funding and commencing construction of the manufacturing facility and obtaining the appropriate legal and regulatory permissions. It also included a consideration of the appropriateness and methodology of the value in use calculation, the assumptions and judgements applied. We considered management's sensitivity analysis and also performed an additional range of sensitivities to assess whether a reasonably likely change to a key input would result in an impairment charge. We also tested to ensure the accuracy of the valuation model presented.*

For the Parent Company we identified one key audit matter:

Key audit matter	*How the scope of our audit addressed the key audit matter*
Carrying value of investments and intercompany receivables – Parent Company *The carrying value of investments in subsidiaries in the parent company financial statements at 31 December 2021 was €32.2 million (2020: €22.5 million), as well as an intercompany balance of €2.07 million (2020: €9.6 million). The valuation of these investments and the recovery of the intercompany balance are almost entirely dependent on the successful execution of the business plan. Changes in the carrying value of the licence asset, or a failure to execute the business plan would likely result in an impairment to the carrying value of the investments in and loans to subsidiaries.*	*We considered with management whether any indications of impairment existed. This includes considering the existence of any indication of discontinued operating activities, management's future plans for the business, the ability of the business to continue to raise new investment and the market capitalisation of the Group.*

Our audit procedures in relation to these matters were designed in the context of our audit opinion as a whole. They were not designed to enable us to express an opinion on these matters individually and we express no such opinion.

Other information

The directors are responsible for the other information contained within the annual report. The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

As described in the basis for qualified opinion section of our report, we were unable to satisfy ourselves concerning the carrying value of interest in joint venture and Group's share of loss in the joint venture. We have concluded that where the other information refers to the interest in joint venture carrying value or share of loss, or related amounts such as group loss for the year, it may be materially misstated for the same reason.

Opinion on other matter prescribed by the Companies Act 2006

Except for the possible effects of the matter described in the basis for qualified opinion section of our report, in our opinion based on the work undertaken in the course of our audit

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the strategic report and the directors' report have been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

Except for the possible effects of the matter described in the basis for qualified opinion section of our report, in light of the knowledge and understanding of the group and the parent company and their environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or the directors' report.

Arising solely from the limitation on the scope of our work relating to interest in joint venture, referred to above:

- We have not obtained all the information and explanations that we considered necessary for the purpose of our audit.

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made.

Responsibilities of the directors for the financial statements

As explained more fully in the directors' responsibilities statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the group's and parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the group or the Parent Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below:

We obtained an understanding of the legal and regulatory frameworks within which the company operates, focusing on those laws and regulations that have a direct effect on the determination of material amounts and disclosures in the financial statements. The laws and regulations we considered in this context were the Companies Act 2006 and UK and overseas taxation legislation.

We identified the greatest risk of material impact on the financial statements from irregularities, including fraud, to be the override of controls by management. Our audit procedures to respond to these risks included enquiries of management about their own identification and assessment of the risks of irregularities, sample testing on the appropriateness of journals and reviewing accounting estimates for evidence of bias.

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. We are not responsible for preventing non-compliance and cannot be expected to detect non-compliance with all laws and regulations.

These inherent limitations are particularly significant in the case of misstatement resulting from fraud as this may involve sophisticated schemes designed to avoid detection, including deliberate failure to record transactions, collusion or the provision of intentional misrepresentations.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

NOTES TO THE CONSOLIDATED FINANCIAL INFORMATION

1. REPORTING ENTITY

Cleantech Building Materials plc is a public limited liability company (Company) which is quoted on the Nasdaq First North Growth Market, Copenhagen and is incorporated and domiciled in the UK. The address of the registered office is Floor 6, International House, 4 Maddox Street, London, W1S 1QP and the registered number of the company is 09357256.

The consolidated financial information comprises Cleantech Building Materials plc and its subsidiaries (Group).

The principal activities of the Group are the sale of specialist wood products, technology licensing, sourcing and procurement, business development and investment holding.

2. BASIS OF PREPARATION

The consolidated financial statements have been prepared in compliance with UK adopted International Accounting Standards (UK IFRS) and the requirements of Companies Act 2006.

The consolidated financial statements have been prepared under the historical cost convention and are presented in Euros rounded to the nearest thousand (€'000) except where indicated otherwise. The Euro has been chosen as the presentation currency of the Group because the Group is quoted in Euro on the Nasdaq First North Growth Market, Denmark in Copenhagen. In addition, the Euro represents a stable and strong currency and the Eurozone a significant potential source of funding in the future.

Going concern

The Group's current business is the importing and marketing of Accoya® Wood, which the Group has done since 2008. The Group has sufficient financing available to operate this existing import business on a going concern basis. The Group's Directors are of a view that there is an investment opportunity for the Group to build and operate its own Accoya® Wood factory in China. By virtue of the investment agreement signed with Nantong Acetic Acid Chemical Company Ltd (NTAAC) on March 31, 2021, the LOI signed with a leading Chinese bank, and the subscription agreement entered into between the Company and the Investor, the Directors believe there is now sufficient funding available to build the first Accoya® Wood factory in China.

The execution of the business plan is inherently uncertain. The business plan is dependent on the standard milestones in such a project, including the approval of the permits by local government officials, and the successful construction and operation of a manufacturing plant. Changes in these factors could also result in an impairment to the carrying value of the licence assets. These conditions indicate the existence of a material uncertainty which may cast significant doubt about the Group and the Company's ability to continue as a going concern.

Despite the uncertainty as to the outcome of the business plan, the Directors are confident that the Group will be able to obtain sufficient funds and to execute the Group's business plan to fully realise the carrying value of the non-current assets.

The Directors have considered the future liquidity of the Group in light of the net loss of €4,891,000 (2020: loss of €4,116,000) during the current year and the net current liabilities as at 31 December 2021 of €207,000 (2020: €797,000). In November 2021, the Group obtained an additional loan facility of €3 million to support the Group's operations. Subsequent to the year, the loan agreement has been extended to 31 March 2024 and facility headroom increased by a further €1 million.

The Directors have reviewed the Group's cash flow projections prepared by management covering a period of twelve months from the date of the approval of the consolidated financial statements. Management's projections make key assumptions with regard to (i) the anticipated cash flows from the Group's operations, (ii) the availability of future funding from the Loan Facility, (iii) the financing from the Investor, NTAAC and a leading Chinese bank, and (iv) the commitment to contribute further equity financing to JDW for the construction of the Accoya® Wood factory. Covid-19 contributed to the delay in finalising the joint venture agreement with NTAAC, but this was signed in March 2021. In April 2021 the Joint Venture received a LOI from a leading Chinese bank regarding €26m debt financing. During the year progress on a range of matters has been made, including Chinese government approval of project registration, social stability assessment and feasibility study. Since year end, there has also been approval of the energy conservation assessment by the Chinese government.

Based on these cash flow projections, the Group will have sufficient financial resources in the twelve months period from the date of approval of the consolidated financial statements to meet its financial obligations as and when they fall due. Accordingly, the Directors consider that it is appropriate to prepare the consolidated financial statements on a going concern basis.

Should the Group be unable to continue as a going concern, adjustments would have to be made to restate the value of assets to their recoverable amounts, to provide for further liabilities that might arise and to reclassify non-current assets and non-current liabilities as current assets and current liabilities. The effect of these potential adjustments has not been reflected in the consolidated financial statements.

3. APPLICATION OF NEW AND REVISED STANDARDS

Standards and amendments to existing standards adopted in these accounts
The amendments to the existing standards were not applicable to the Company and hence these standards were not adopted.

Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the Company in the 31 December 2021 financial statements:

There are a number of standards, amendments to standards, and interpretations which have been issued and are being subject to endorsement by UK Endorsement Board that are effective in future accounting periods that the group has decided not to adopt early. The following amendments are effective for the period beginning 1 January 2022:

- Onerous Contracts – Cost of Fulfilling a Contract (Amendments to IAS 37);
- Property, Plant and Equipment: Proceeds before Intended Use (Amendments to IAS 16);
- Annual Improvements to IFRS Standards 2018-2020 (Amendments to IFRS 1, IFRS 9, IFRS 16 and IAS 41);
- References to Conceptual Framework (Amendments to IFRS 3).
- Classification of Liabilities as Current or Non-current (Amendments to IAS 1)
- IFRS17 Insurance contracts and amendments to IFRS 17 Insurance Contracts
- Disclosure of Accounting Policies (Amendments to IAS 2 and IFRS Practice Statement 2)
- Definition of Accounting Estimates (Amendments to IAS 8)
- Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12)

The Directors do not expect that their adoption will have a material impact on the financial statements of the Company in future years.

The Directors continue to monitor the impact of future changes to the reporting requirements but do not believe the proposed changes will significantly impact the financial statements.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently in the preparation of the consolidated financial information.

4.1 Subsidiaries, associates or joint venture and non-controlling interests

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. When assessing whether the Group has power, only substantive rights (held by the Group and other parties) are considered.

An investment in a subsidiary is consolidated into the consolidated financial statements from the date that control commences until the date that control ceases. Intra-group balances, transactions and cash flows and any unrealised profits arising from intra-group transactions are eliminated in full in preparing the consolidated financial statements. Unrealised losses resulting from intra-group transactions are eliminated in the same way as unrealised gains but only to the extent that there is no evidence of impairment.

Associates or joint ventures are all entities over which the group has significant influence but not control or joint control. This is generally the case where the group holds between 20% and 50% of the voting rights. Investments in associates or joint ventures are accounted for using the equity method of accounting. Investments are initially recognised at cost and adjusted thereafter to recognise the group's share of the post-acquisition profits or losses of the investee in profit or loss, and the group's share of movements in other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates and joint ventures are recognised as a reduction in the carrying amount of the investment.

Where the group's share of losses in an equity-accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the other entity.

Unrealised gains on transactions between the group and its associates and joint ventures are eliminated to the extent of the group's interest in these entities. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

4.2 Property, plant and equipment

Property, plant and equipment are stated in the consolidated statement of financial position at cost less accumulated depreciation and any accumulated impairment losses (see note 4.5):

Depreciation is calculated to write off the cost of each item of property, plant and equipment, using the straight-line method over their estimated useful lives as follows:

Leasehold improvements	3 years or over the lease term, whichever is shorter
Furniture and fixtures	2-5 years
Computer equipment	3 years

Where parts of an item of property, plant and equipment have different useful lives, the cost or valuation of that item is allocated on a reasonable basis between the parts and each part is depreciated separately. Both the useful life of an asset and its residual value, if any, are reviewed annually.

4.3 Leased assets

At the lease commencement date, the Group recognises a right-of-use asset and a lease liability, except for short-term leases that have a lease term of 12 months or less and leases of low-value assets. When the Group enters into a lease in respect of a low-value asset, the Group decides whether to capitalise the lease on a lease-by-lease basis. The lease payments associated with those leases which are not capitalised are recognised as an expense on a systematic basis over the lease term.

The Group has chosen not to recognise lease assets and liabilities associated with the current office lease. Instead, the Group has chosen to take the short-term lease exemption available under IFRS 16 due to the short term nature of the rental agreement and the uncertainty over renewal.

4.4 Intangible asset

The Group is licenced to have the right to use certain intellectual property rights to manufacture and sell Accoya® Wood. This licence has a finite useful life and is carried at cost less accumulated amortisation and impairment, if any. The cost of the licence represents the discounted value of the minimum fees payable over the licence period and the directly attributable costs of preparing the asset for its intended use. It is recorded together with the related obligations.

Amortisation is calculated using the straight-line method to allocate the cost of the licence over the estimated useful economic life of the licence of 20 years. Interest accreted on the discounted value of the minimum fees payable is charged to the consolidated statement of profit or loss within “finance costs”.

Diamond Wood China entered an Accoya® Technology License Agreement on 12 August 2010 with Titan Wood Limited. In accordance with UK IFRS, the valuation of this intangible asset was recognised at its initial book value of €19.4million and has been amortised since then to its net book value of €10.1million at the reporting date. The Directors believe that the commercial value of the Accoya® Technology License is potentially higher than this book value, given the terms of the 31 March 2021 Joint Venture Contract (the “Agreement") with NTAAC. Under that Agreement, the CBM Group has a 51% share of all future dividends from the China Accoya® factory and an additional Asset Royalty payment of 30% of the pre-tax profit of the Joint Venture up to €180million.

4.5 Impairment of non-financial assets other than goodwill

At the end of the reporting period, the Group reviews the carrying amounts of all non-financial assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any).

The recoverable amount is the greater of its fair value less costs of disposal and value in use. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

4.6 Inventories

Inventories are carried at the lower of cost and net realisable value.

Cost comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the period in which the related revenue is recognised. The amount of any write down of inventories to net realisable value and all losses of inventories are recognised as an expense in the period the write down or loss occurs. The amount of any reversal of any write down of inventories is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

4.7 Financial assets and liabilities

Financial assets and financial liabilities are recognised in the Group's statement of financial position when the Group becomes a party to the contractual provisions of the instrument. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Financial assets
All recognised financial assets are measured subsequently in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Trade receivables
The Group's trade receivables without a significant financing component are initially measured at the transaction price. The Group recognises a loss allowance for lifetime Expected Credit Losses for trade receivables. The expected credit losses on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in the income statement within administrative expenses. When a trade receivable is uncollectible it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against administrative expenses in the income statement.

Financial liabilities
The Group's financial liabilities include borrowings, trade and other payables.

Financial liabilities are recognised when the Group becomes a party to the contractual agreements of the instrument. All interest related charges are recognised as an expense in the income statement.

Trade payables are recognised initially at their fair value and measured subsequently at amortised cost using the effective interest method.

Convertible loans
The Liability components of convertible loan notes are described further in Note 19.

4.8 Income tax

Income tax for the year comprises current tax and movements in deferred tax assets and liabilities. Current tax and movements in deferred tax assets and liabilities are recognised in profit or loss except to the extent that they relate to items recognised in other comprehensive income or directly in equity, in which case the relevant amounts of tax are recognised in other comprehensive income or directly in equity, respectively.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the end of the reporting period, and any adjustment to tax payable in respect of previous years.

Deferred tax assets and liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases. Deferred tax assets also arise from unused tax losses and unused tax credits.

Current tax balances and deferred tax balances, and movements therein, are presented separately from each other and are not offset. Current tax assets are offset against current tax liabilities, and deferred tax assets against deferred tax liabilities, if the Company or the Group has the legally enforceable right to set off current tax assets against current tax liabilities and the following additional conditions are met:

- in the case of current tax assets and liabilities, the Company or the Group intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously; or
- in the case of deferred tax assets and liabilities, if they relate to income taxes levied by the same taxation authority on either:
- the same taxable entity; or
- different taxable entities which, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered intend to realise the current tax assets and settle the current tax liabilities on a net basis or realise and settle simultaneously.

4.9 Revenue recognition

Revenue is measured based on the consideration to which the Group expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties. The Group recognises revenue when it transfers control of a product or service to a customer.

Sale of goods
Revenue from sales of goods is recognised when control of the goods has been transferred to the customer, usually at delivery. A receivable is recognised by the Group when the goods are delivered to the customer as this represents the point in time at which the right to consideration becomes unconditional, as only the passage of time is required before payment is due.

4.10 Employee benefits

Pension schemes
The employees of the Group who are employed in the People's Republic of China are required to participate in a central pension scheme operated by the local municipal government. The Group is required to contribute certain amounts for the employees in the People's Republic of China, pursuant to the local municipal government regulations. The contributions are charged to profit or loss as they become payable in accordance with the rules of the central pension scheme.

Short-term employee benefits
Employee entitlements to annual leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the reporting date.

Employee entitlements to sick leave and maternity leave are not recognised until the time of leave.

4.11 Share-based payments

Share options
The Group operates an equity-settled, share-based compensation plan. The fair value of the employee services received in exchange for the grant of the options is recognised as an expense. The total amount to be expensed over the vesting period is determined by reference to the fair value of the options granted, calculated using the Binomial Option Pricing Model, excluding the impact of any non-market vesting conditions (for example, profitability and sales growth targets). Non-market vesting conditions are included in assumptions about the number of options that are expected to vest. At each reporting date, the entity revises its estimates of the number of options that are expected to vest. It recognises the impact of the revision of original estimates, if any, in the consolidated statement of profit or loss with a corresponding adjustment to equity.

The proceeds received net of any directly attributable transaction costs are credited to share capital when the options are exercised.

Share warrants
The Group has issued warrants to subscribe for ordinary shares in return for services rendered. The fair value of the service provided is determined using the Binomial Option Pricing Model and recognised as an expense in the period in which the service is performed, in a similar way to share options above.

The Group has also issued warrants to subscribe for ordinary shares as part of a funding arrangement agreed in connection with the investment framework for planned development of the Accoya® Wood manufacturing facility (Funding Warrants). The Investor will subscribe for shares in cash by exercising the Funding Warrants, and that cash is to be used in accordance with the investment framework and for the ongoing working capital requirements of the Group. As such the Funding Warrants in themselves have no intrinsic fair value, over and above facilitating the funding arrangement, and therefore no charge to the consolidated profit or loss is recorded in respect of these.

4.12 Translation of foreign currencies

Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Foreign currency transactions recorded by the entities in the Group are initially recorded using their respective foreign exchange rates ruling at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are retranslated at the foreign exchange rates ruling at the end of the reporting period. All differences are taken to profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured.

The functional currency of the members of the Group is a currency other than the Euro (€). As at the end of the reporting period, the assets and liabilities of the Group are translated into Euros which is the presentation currency of the Group, at the exchange rates ruling at the end of the reporting period and its statement of profit or loss is translated into Euros at the rates on the dates of the transactions. The resulting exchange differences are recognised in other comprehensive income and accumulated in the exchange reserve (attributed to non-controlling interest as appropriate). On disposal of a foreign operation, the component of other comprehensive income relating to that particular foreign operation is recognised in profit or loss.

For the purpose of the consolidated statement of cash flows, the cash flows are translated into € at the exchange rates ruling at the dates of the cash flows. Frequently recurring cash flows which arise throughout the period are translated into € at the weighted average exchange rate for the period.

4.13 Borrowing costs

Borrowing costs are capitalised as part of the cost of a qualifying asset when expenditure for the asset is being incurred, borrowing costs are being incurred and activities that are necessary to prepare the asset for its intended use or sale are being undertaken. Borrowing costs applicable to borrowings made specifically for the purpose of obtaining a qualifying asset are excluded from the calculation borrowing costs until substantially all the activities necessary to prepare that asset for its intended use or sale are complete.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

4.14 Equity

The reserves which form the constituents of shareholders' equity are as follows:

Share capital:
Financial instruments issued by the Group are classified as equity only to the extent that they do not meet the definition of a financial liability or financial asset. The Group's ordinary shares are classified as equity instruments.

The proceeds from the issue of shares in the Company at par value.

Share based payments:
The consideration for equity instruments issued by the Company in exchange for services provided.

Merger reserve:
The fair value of the consideration given that exceeds the nominal value of the ordinary shares issued by the Company for the acquisition of DWC.

Exchange reserve:
The translation of the Group's financial results into the reporting currency of the Company.

Retained losses:
The accumulated net losses retained by the Company at the end of the reporting periods.

Non-controlling interest
The portion of equity ownership in DWC that is not attributable to the Company.

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of the Group's consolidated financial information requires management to make estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and certain disclosures. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities in the future.

In the process of applying the Group's accounting policies which are described in note 4, management has made certain key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that may have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities within the next financial year, as described below.

Key sources of estimation uncertainty and judgement

Impairment of non-current assets

The Group evaluates whether the non-current assets have suffered any impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. The recoverable amount of cash-generating unit (CGU) has been determined based on a value in use calculation assuming that the Group will obtain sufficient funds to finance the construction of manufacturing plant to realise the economic benefits of the non-current assets. These calculations require the use of estimates and the going concern assumption.

The value in use calculation as of 31 December 2021 applied a discounted free cash flow model using cash flow projections of future expenditure on the plant, together with the expected revenue generated from the manufacturing plant through to the expiry of the rights of the intangible asset. These projections reflect management's best estimate of the future results of the CGU based on past experience and future outlook, having undertaken various market studies on the prospects of this industry in Asia. Based on the value in use calculation, the recoverable amount of the CGU exceeds its carrying amount as at 31 December 2021.

The key accounting judgements in relation to the value of the licence are:

- The construction project commencing in H2 2022. Given the previous delays in the project and the local operating environment, this is a critical assumption. Management have considered a scenario where the commencement of the project is delayed by six months, being the likely timeframe of any possible delay. In this scenario, no impairment is required to the carrying value of the licence asset. If further significant delays are experienced, an impairment may be required to the carrying value,

- The construction, and subsequent operation, of the manufacturing plant is reliant on the approval from local government which management consider will be in line with the expected commencement date of the construction project.

The key accounting estimates in relation to the assumptions used for the value in use calculation included the following:

- The manufacturing plant will be constructed in Jiangsu Province, China and be operational during 2023. The gross contribution will improve significantly following the construction of the manufacturing plant as a result of lower production costs whilst gradually increasing the sales volume of Accoya® Wood.
- Sales volume prior to operation of the Group's own manufacturing facilities will reflect the volume of supply it can secure from the Licensor. Once the Group's manufacturing plant is operational, production capacity is forecast to progressively increase.
- The selling price of Accoya® Wood is forecast to increase year on year.
- The purchase cost of Accoya® Wood directly from the Licensor is expected to increase year on year.
- Operating overheads are forecast to increase year on year throughout the projections.
- A discount rate of 26.95% has been applied in the value in use calculation for the period from 1 January 2021 to 31 December 2043 for the joint venture.

Accounting treatment for joint venture

As described in note 15, the Group has 51% equity interest in the newly incorporated joint venture company, Jiangsu Dragon Wood Company Limited. Under the Joint Venture agreement, any decisions or resolutions by the board of the joint venture company would require at least 75% affirmative votes from joint venture board and shareholders. Therefore the directors considered that the Group does not have control of the joint venture, and therefore it should be accounted for as interest in joint venture under the equity accounting method.

Share based payments

The fair value of share based compensation is calculated using the Binomial Option Pricing Model. The inputs to this model include a business valuation based on discounted free cashflows using cash flow projections of future expenditure on the plant, together with the expected revenue generated from the manufacturing plant, discounted at a weighted average cost of capital rate calculated at point of issue. The key inputs to this calculation are therefore similar to the value in use calculation above. There are also other inputs such as:

- Volatility rate: calculated with reference to the median of the historical price volatilities of comparable companies that have similar business nature to the Group
- Risk Free Rate: based on the yields of Euro area central government bonds sourced from European Central Bank.
- Expected Dividend Yield: as expected by management

6. SEGMENTAL REPORT

The Directors identify operating segments based upon the information which is regularly reviewed by the chief operating decision maker. The Group considers that the chief operating decision makers are the executive members of the Board of Directors. The Group has identified a single reportable segment which is sale of Accoya® Wood. The Group generates revenue from one geographical region, ASEAN, based on the location of its customers. All of the group's non-current assets are held in the PRC.

7. REVENUE

	Year to 31 December 2021 €'000	Year to 31 December 2020 €'000
Revenue		
Sale of goods	1,014	857
	1,014	857

The Group has three customers in 2021 (2020: four) that exceed 10% of total revenues from sale of goods. COVID restrictions were mostly responsible for the change in key customer mix:

	Year to 31 December 2021 €'000	Year to 31 December 2020 €'000
Revenue from external customers over 10%		
Customer A	352	-
Customer B	239	70
Customer C	142	-
Customer D	63	179
Customer E	-	162
Customer F	-	128
Customer G	-	126

8. LOSS BEFORE TAXATION

The Group's loss before taxation is arrived at after charging the following:

	Year to 31 December 2021 €'000	Year to 31 December 2020 €'000
a) Staff costs		
Wages and salaries (including directors' remuneration)	948	899
Social security contributions incurred by the Group	23	22
Contribution to defined contribution retirement plans	56	36
	1,027	957

Average staff number in the year for the Group were as follows:

	Year to 31 December 2021 Number	Year to 31 December 2020 Number
Management	9	9
Administrative	2	1
	11	10

	Year to 31 December 2021 €'000	Year to 31 December 2020 €'000
b) Other items		
Business travel expense	118	91
Cost of inventories	916	788
Short term lease rentals in respect of office space	33	33
Share based payment expense	573	376
Amortisation of:		
- intangible assets	1,140	1,140

9. AUDITOR'S REMUNERATION

	Year to 31 December 2021 €'000	Year to 31 December 2020 €'000
Fees payable to the Groups auditor and its associates for the audit of the Group's annual financial statements	125	120

Audit remuneration payable to Crowe U.K. LLP in respect of the Company and consolidated financial statements was €31,000 (2020: €26,000). The remainder was payable to Crowe (HK) CPA Ltd in respect of the audit of subsidiaries.

10. FINANCE COSTS

	Year to 31 December 2021 €'000	Year to 31 December 2020 €'000
Interest on borrowings wholly repayable within five years	160	272
Investment finance fees	61	-
Bank charges	8	6
Total interest expense on financial liabilities	229	278

The Group's convertible loans carry an interest charge of 15%.

11. INCOME TAX

(a) Income tax in the consolidated statement of profit or loss represents:

No provision has been made for Corporation Tax as the Group did not earn any assessable profit subject to tax for the year ended 31 December 2021 (2020: €Nil). No provision has been made for tax in the subsidiaries of the group in their own countries for the same reason. There is no liability in the consolidated statement of financial position.

(b) Reconciliation between tax expense and accounting loss at the applicable tax rates:

	Year to 31 December 2021 €'000	Year to 31 December 2020 €'000
Loss before taxation	(4,891)	(4,116)
Notional tax on loss before taxation, calculated at the rates applicable to profits in the tax jurisdictions concerned	(750)	(583)
Tax effect of unused tax losses not recognised	370	349
Tax effect of non-deductible expenses	380	234
Tax charge	-	-

(c) Deferred tax assets:

At 31 December 2021, in accordance with the accounting policy the Group has not recognised deferred tax assets in respect of unused tax losses available for offsetting against future profits that may be carried forward for up to five years for EIT purpose, there are no material unrecognised deferred tax liabilities arising from temporary differences (2020: €Nil).

The Group has not recognised deferred tax assets arising from the accumulated tax losses. Subject to the agreement by the Hong Kong Inland Revenue Department and the PRC local tax authority, these tax losses can be carried forward against future taxable income and amount to €25,937,000 (2020: €24,713,000).

Pursuant to the PRC Corporate Income Tax Law, a 10% withholding tax is levied on dividends declared to foreign investors from the foreign investment enterprises established in the PRC. The requirement is effective from 1 January 2008 and applies to earnings after 31 December 2007. A lower withholding tax rate of 5% is possibly applied to DWC as there is a tax treaty between the PRC and Hong Kong.

The Group is therefore liable to withholding taxes on dividends distributed by the subsidiaries established in the PRC in respect of earnings generated from 1 January 2008.

12. DIRECTORS' REMUNERATION

	Year to 31 December 2021 €'000	Year to 31 December 2020 €'000
Directors' fees	128	48
Salaries and allowances	719	636
Share based payments	258	212
Employers pension contributions	21	20
	1,126	916

All Directors' remuneration is classified as a short-term employee benefit. The highest paid Director received remuneration of €252,000 (2020: €208,000).

13. LOSS PER SHARE

a) Basic loss per share
The calculation of basic loss per share is based on the loss attributable to shareholders of the Company of approximately €4,857,000 (2020: €4,058,000) and the weighted average number of 76,216,236 ordinary shares (2020: 67,966,107 ordinary shares) in issue during the year.

b) Diluted loss per share
In accordance with IAS 33 *"Earnings per share"*, where an entity has reported a loss for the year, the share options are not dilutive.

14. INTANGIBLE ASSET AND LICENCE FEE PAYABLE

a) Intangible asset

	Year to 31 December 2021 €'000	Year to 31 December 2020 €'000
Cost		
As at 31 December 2021 and 2020	19,383	19,383
Accumulated amortisation		
Beginning of the year	8,160	7,020
Amortisation charge for the year	1,140	1,140
End of the year	9,300	8,160
Net book value		
As at 31 December	10,083	11,223

On 12 August 2010, DWC and TW entered into a technology licence agreement (Licence Agreement) in order to replace previous licence agreements between the parties signed in prior years.

The key terms of the Licence Agreement are summarised as follows:

DWC has acquired the rights to manufacture, market, distribute and sell Accoya® Wood into China and the ASEAN countries. These rights continue for as long as TW's patents are valid related to the acetylation of wood or so long as the related know how remains confidential, whichever is the later.

In China, this right is exclusive for as long as TW's patents related to the acetylation of wood are valid, or the know how remains confidential. Patents generally expire 20 years after their application or priority date. The most recent patent was applied for by TW in 2021, so the soonest date of exclusivity in China might end would be at least 2041. However, TW continues to generate new patents and know how, and the exclusivity date may be extended for many more years including the date from when new patent applications falling under the Licence Agreement are filed.

DWC has the right to manufacture, market, distribute and sell Accoya® wood into the ASEAN countries until at least 2041, or beyond.

	China Market	ASEAN Markets
Accoya® Rights - **Manufacture** - **Market, Distribute and Sell**	Exclusive right while Accoya® patents are valid, or know how remains confidential (year 2041+).	Non-exclusive right while Accoya® patents are valid, or know how remains confidential (year 2041+).

Additional key terms of the Licence Agreement are:

i) a right of first refusal to enter into exclusive licensing arrangements for Tricoya Wood Elements technology in the PRC.

ii) DWC may sub-licence the Intellectual Property Rights to its subsidiaries or any affiliate of the Company without obtaining consent from TW.

iii) Titan Wood Technology B.V. (TWTBV) will provide advice and technical services to support the Group to construct facilities and commission the licenced capacity. Service fees will be charged by TWTBV to the Group at a per diem charge per person, plus all associated expenses. During the year 2021, TWTBV provided services to the Group in preparation for the construction of the Accoya® Wood factory in Jiangsu Province, China.

Please refer to Note 5 for more details of the estimate of uncertainty.

b) Licence fee payable

The Group has a licence fee payable as follows:

	Present value of the minimum fee payable €'000	Total minimum fee payable €'000
As at 31 December 2021 and 31 December 2020		
Repayable		
- over one year but not exceeding five years	545	571

As at 31 December 2021, the licence fee payable on future capacity expansion was €545,000 (2020: €545,000), which will be settled nine months after the increased capacity construction commences according to the Licence Agreement. According to the Licence Agreement, DWC shall also pay TW a royalty fee of €25 per m^3 of Accoya® Wood sold for the first 20 years following commissioning of the respective production project ("Royalty Fee") and thereafter, an amount equal to 25% of the royalty payable during the last year of payments. Movements on the license fee were as follows:

	2021 €'000	2020 €'000
License fee payable		
Brought forward	545	545
Cash flows	-	-
Share conversion	-	-
Interest	-	-
As at 31 December	545	545

15. INTEREST IN JOINT VENTURES

In March 2021 the Company entered into a joint venture agreement with NTAAC to build the first Accoya® Wood factory in China. Under the terms of the agreement, a new company was formed between CBM's subsidiary DWC and NTAAC, called Jiangsu Dragon Wood Company Limited (JDW). The principal place of business of JDW is PRC. DWC and NTAAC have agreed specific factory-related milestones and equity contributions by each party. DWC has a 51% equity stake in JDW. The joint venture is measured using the equity method.

	31 December 2021 €'000
Share of equity accounted joint venture	
At 1 January 2021	-
Investment in joint venture	561
Share of loss of joint venture	(332)
Foreign exchange	15
At 31 December 2021	244

Under the JV agreement, the Company has a commitment to contribute further equity financing to JDW for the construction of the Accoya® Wood factory as future milestones are met.

	31 December 2021 €'000
Financial information of joint venture – Balance sheet	
Non-current assets	17
Cash and cash equivalents	576
Other current assets	225
Current assets	801
Trade and other payables	(304)
Other current liabilities	(36)
Current liabilities	(340)
At 31 December 2021	478
51% share of the joint venture included in the Group accounts	244

	31 December 2021 €'000
Financial information of joint venture – Result for the year	
Revenue	161
Profit or loss from continuing operations	(812)
Other comprehensive income	-
Total comprehensive income for the year	(651)
51% share of the joint venture included in the Group accounts	(332)

16. TRADE AND OTHER RECEIVABLES

	31 December 2021 €'000	31 December 2020 €'000
Trade receivables	161	152
Less: allowance for impairment loss	(161)	(152)
	-	-
Other receivables	30	74
Prepayment and deposits	208	189
	238	263

Movements in the allowance for doubtful debts

	31 December 2021 €'000	31 December 2020 €'000
Beginning of the year	152	152
Exchange difference	9	-
End of the year	161	152

As of 31 December 2021, trade receivables amounting to €161,000 (2020: €152,000) were individually determined to be impaired. The individually impaired receivables were outstanding for over 60 days at the end of the reporting year or were due from customers with financial difficulties.

Trade receivables that are overdue but not impaired

All trade receivables are impaired. Any trade receivables are due within 60 days from the date of billing. Receivables that are over 60 days relate to a number of independent customers that have a good track record with the Group.

17. CASH AND CASH EQUIVALENTS

	31 December 2021 €'000	31 December 2020 €'000
Cash and cash equivalents in the consolidated statement of financial position and the consolidated statement of cash flows	158	25

Bank balances carried interest rates of 0.001% annum (2020: 0% to 0.35% per annum). The bank balances were deposited with banks and financial institutions.

At 31 December 2021, the Group held bank balances of €158,000 (2020: €25,000). Of these amounts only €490 (2020: €612) were deposited in bank accounts within the Peoples Republic of China (PRC) which can only be remitted outside the PRC by means of the approval of an application of remittance of foreign exchange by the State Administration for Exchange Control.

18. TRADE AND OTHER PAYABLES

	31 December 2021 €'000	31 December 2020 €'000
Trade payables	422	367
Other payables	26	304
Accruals	261	414
	709	1,085

19. INTEREST BEARING BORROWINGS

Convertible loan

The loan is unsecured and subject to an interest rate of 15%. As part of the existing loan arrangement the Loan Facility has a maturity date of 31 March 2024. During 2021, conversions of loan principal, interest and fees were made for €2,950,000, in exchange for 7,078,935 shares. Both the loan holder and the Company have the right to convert any amount owing under the facility into Ordinary Shares prior to the maturity date. The loan amounts to €nil at 31 December 2021 (2020: €nil). A reconciliation of the movements is shown below:

	2021 €'000	2020 €'000
Interest bearing borrowings – convertible loan		
Brought forward	-	250
Cash flows of advance loans	2,790	1,325
Share conversion	(2,950)	(1,847)
Interest and fees	160	272
As at 31 December	-	-

The quantum of any possible equity component relating to conversion rights is considered to be immaterial to the fair value of the convertible loans, equity in the statement of financial position and potential consequent impact on the finance charge on the instruments and therefore no equity component was recognised.

Bounce Back loan

On 17 February 2021 the Company agreed a fixed rate loan of £50,000 with RBS under the UK Government's Bounce Back Loan Scheme (BBLS). The loan does not attract interest or require repayment for the first 12 months, but interest accrues thereafter at a rate of 2.5%. The loan has a term of 6 years.

	2021 €'000
Interest bearing borrowings – bounce back loan	
Brought forward	-
Cash flows of advance loans	58
Interest and fees	-
As at 31 December	58

At 31 December, €9,000 of the balance of the loan was repayable in less than one year, and €49,000 of the loan was repayable in more than one year.

20. SHARE CAPITAL

	Number of shares	€'000
Issued and fully paid		
1 January 2020	66,296,736	7,818
Issued April 2020	2,069,424	239
Issued December 2020	4,496,425	492
31 December 2020	72,862,585	8,549
Issued May 2021	4,123,188	480
Issued June 2021	394,960	46
Issued November 2021	3,304,345	391
Issued December 2021	739,893	88
At 31 December 2021	81,424,971	9,554

During the year 360,000 shares were issued for cash following exercise of employee share options at €0.35 per share. A further 394,960 shares were issued for cash in accordance with the subscription agreement between the family office and the Company dated 10 July 2019 (Agreement) at a price of €1.25.

There were also non-cash share issues, which included 7,078,935 shares issued following conversion of €2,949,557 debt owing under the Loan Facility, and 728,491 shares were issued in satisfaction of debts totalling €303,538.

The number of shares in issue at 31 December 2021 was 81,424,971 with a par value of £0.10 giving a quoted capitalisation of £9,553,751. Conversion to Euro is at the historical rate.

21. SHARE OPTIONS & WARRANTS

2021 scheme

During 2021 there was a grant of share options to directors under a new scheme (2021 scheme). On 1 May 2021 a total of 6,866,250 options were granted to directors. The majority of these options (6,562,574) replaced options granted under the 2019 and 2017 schemes. Of the issued options, 303,676 were a new issue to a director of the DWC board. The options will vest in three tranches of 33.3% per year on condition of continued service. Expiry will be 7 years from the grant date.

2019 scheme

During 2019 there was a grant of share options to employees and consultants (2019 scheme). On 17 September 2019 a total of 3,947,793 options were granted to employees and 303,676 to third parties with an exercise price of €1.25 per share. The options will vest in four tranches of 25% per year on condition of continued employment. Expiry will be 10 years from the grant date.

During 2020 there was a further grant of share options to employees and consultants under the 2019 scheme. On 1 January 2020 a total of 303,676 options were granted to an employee with an exercise price of €1.25 per share. The options will vest in four tranches of 25% per year on condition of continued employment. Expiry will be 10 years from the grant date.

2017 scheme

During 2017 there were two grants of share options to employees (2017 scheme):

- 7 July 2017 a total of 1,277,455 options with an exercise price of €1.25 per share. Of the options 50% vested on 23 December 2017 and the remainder will vest in two tranches of 25% each on condition of continued employment. Expiry will be 5 years from the grant date.
- 20 October 2017 a total of 729,974 options to a newly joined director with an exercise price of €1.25 per share. Of the options 25% vested on the first anniversary of their joining and the remainder will vest in three tranches of 25% each on condition of continued employment. Expiry will be 5 years from the grant date.

2016 scheme

Employee Share Option Scheme
On 7 December 2016 and as a result of the closure of the 2013 Scheme and as part of the remuneration package moving forwards, CBM entered into option agreements with the affected option holders granting them 1,381,850 share options in total (2016 scheme), which entitle the option holders to subscribe for shares of CBM for €0.35 per share. The options have a 5 year exercise period from the admission date and ending on the expiration of the fifth anniversary of the admission date. Expense relating to this scheme was recognised in previous periods. During the year 1,021,850 of these options were exercised.

Share options granted to third party
On 7 December 2016, 242,400 share options were granted to a third party by CBM for the fund-raising services rendered to the Company, which entitles the option holder to subscribe for shares of CBM for €0.35 per share. The options have a 5 year exercise period from the admission date and ending on the expiration of the fifth anniversary of the admission date. Expense relating to this scheme was recognised in previous periods.

Share warrants
On 7 December 2016, 475,000 share warrants were granted to Keswick Global AG for services rendered to the Company, which entitle the holder to subscribe for shares of CBM for €0.93 per share. The warrants have a 7 year exercise period commencing on 23 December 2016. Expense relating to this scheme was recognised in previous periods.

On 27 December 2019, 13,250,000 share warrants were granted to the Investor (Investor Warrants) relating to the entering into of the Agreement. The Investor is entitled to subscribe for shares of CBM for €1.25 per share, which is the same price the Investor will subscribe for shares in the Company under the Agreement. The warrants have a 5 year exercise period commencing on 27 December 2019.

The unexpired share options and warrants (excluding Investor Warrants) at the end of the year had exercise prices between €0.35 and €1.25 with a remaining weighted average contractual life of 6.56 years (2020: 5.77 years). The number and weighted average exercise prices of share options and warrants are as follows:

2021	**Weighted average exercise price €**	**Number of options**
Outstanding/unexercised at beginning of the year	1.16	7,639,974
Granted during the year – options	0.42	6,866,250
Exercised during the year	0.35	(360,000)
2017, 2019 & 2020 scheme cancellation (due to replacement)	1.25	(6,562,574)
Expiry of 2016 scheme options	0.35	(242,400)
Outstanding/unexercised at the end of the year	0.45	7,341,250
Exercisable at end of year	0.93	475,000

2020	**Weighted average exercise price €**	**Number of options**
Outstanding/unexercised at beginning of the year	1.06	8,358,148
Granted during the year – options	1.25	303,676
Exercised during the year	0.35	(1,021,850)
Outstanding/unexercised at the end of the year	1.16	7,639,974
Exercisable at end of year	1.07	3,965,204

The fair value of services received in return for share options and warrants granted were measured by reference to the fair value of share options and warrants granted and was approximately €523,000 (2020: €377,000). The estimate of the fair value of the share options and warrants granted is measured based on the Binomial Option Pricing Model. The contractual life of the share options is used as an input into this model.

Fair value of share options and warrants and assumptions:

CBM 2021 Scheme	Grant 1 January 2021
Fair value of share options at the measurement date	€0.32
Share price	€0.642
Exercise price	€0.42
Expected volatility	49.134%
Option life	10 years
Expected dividends	0.00%
Risk-free interest rate	-0.411%

CBM 2020 Scheme	Grant 1 January 2020
Fair value of share options at the measurement date	€0.23
Share price	€0.71
Exercise price	€1.25
Expected volatility	47.081%
Option life	10 years
Expected dividends	0.00%
Risk-free interest rate	-0.174%

Expected volatility is based on the historic volatility (calculated based on the weighted average remaining life of the share options) of listed companies operating in similar industries to that of the Group. Expected dividends are based on historical dividends. Changes in the subjective input assumptions could materially affect the fair value estimates.

22. RELATED PARTY TRANSACTIONS

The Group had the following significant transactions with its related parties including shareholders.

(a) Key management personnel of the Group are the directors. Details of their remuneration are as follows:

	31 December 2021 €'000	31 December 2020 €'000
Directors' fees	128	48
Salaries and allowances	719	636
Share based payment	258	212
Employer pension contributions	21	20
	1,126	916

All of the transactions were carried out in the normal course of the Group's business and on terms as agreed between the transacting parties. They were summarised as follows:

	31 December 2021 €'000	31 December 2020 €'000
Corporate advice fees charged by a related party (Note (i))	480	480
Interest charged by a shareholder (Note (ii))	160	267
Observation, commitment and monitoring fees charged by a shareholder (Note (iii))	339	331

Notes:

(i) In 2021, corporate advisory fees of approximately €480,000 (2020: €480,000) were charged by Morinaka S.L., for the provision of services in relation to liaison with shareholders, government officials, business partners and potential investors. The director of Morinaka S.L. is one of the directors of DWC.

(ii) Interest of €160,000 was charged for the year ended 31 December 2021 (2020: €267,000) at an interest rate of 15% (2020: 15%) per annum on the Loan Facility drawdown amount. The Loan Facility provider is a minor shareholder in the Company, holding less than 5%.

(iii) Observation, commitment & monitoring fees were charged by a family office investor and shareholder of approximately €339,000 (2020: €331,000)

23. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's principal financial instruments comprise trade and other receivables, cash and cash equivalents, trade and other payables and interest-bearing borrowings.

The main risks arising from the Group's financial instruments are credit risk, liquidity risk, interest rates risk and foreign currency risk.

a) Credit risk

The Group's credit risk is primarily attributable to trade and other receivables and the deposits with banks and other current financial assets.

In respect of trade and other receivables, individual credit evaluations are performed on all customers requiring credit over a certain amount. These take into account the customer's past payment history, financial position and other factors. Trade receivables are due within 60 days of the date of billing. There is no concentration of credit risk due to the customer base being large and unrelated. The Group does not hold any collateral over these balances.

The Group mitigates its exposure to credit risk on bank deposits by placing deposits with financial institutions with established credit ratings. Management does not expect any counterparty to fail to meet its obligations.

At 31 December 2021, the Group has certain concentration of credit risk as 100% (2020: 98%) of total bank balances were deposited at three financial institutions with good credit ratings.

b) Liquidity risk

The Group monitors its risk of a shortage of funds using a recurring liquidity planning tool. This tool considers the maturity of both its financial liabilities and financial assets (e.g. trade receivables) and projected cash flows from operations.

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of its own operating cash reserve and interest-bearing borrowings. The Group maintains good business relations and ensures compliance with covenants as stipulated in the facility agreements.

The maturity profile of the Group's financial liabilities at the end of the year, based on the contractual undiscounted cash flows, is as follows:

As at 31 December 2021

	Within 1 year or on demand	More than 1 year but less than 2 years	More than 2 years but less than 5 years	More than 5 years	Total contractual undiscounted cash flows	Carrying amount
	€'000	€'000	€'000	€'000	€'000	€'000
Interest bearing loans	11	13	38	1	63	59
Other payables and accruals	709	-	-	-	709	709
Licence fee payable	-	571	-	-	571	545
	720	584	38	1	1,343	1,313

As at 31 December 2020

	Within 1 year or on demand	More than 1 year but less than 2 years	More than 2 years but less than 5 years	More than 5 years	Total contractual undiscounted cash flows	Carrying amount
	€'000	€'000	€'000	€'000	€'000	€'000
Interest bearing loans	-	-	-	-	-	-
Other payables and accruals	1,085	-	-	-	1,085	1,085
Licence fee payable	-	571	-	-	571	545
	1,085	571	-	-	1,656	1,630

c) Foreign currency risk

The Group's exposure to foreign currency risk related primarily to cash and cash equivalents, trade and other receivables, trade and other payables that are denominated in currencies other than the functional currency of the relevant group entities.

i) *Exposure to currency risk*

The following table details the Group's exposure at the end of the year to currency risk arising from recognised assets or liabilities denominated in a currency other than the functional currency of the entity to which they relate. Differences resulting from the translation of the financial statements of the entity within the Group into the Group's presentation currency are excluded.

	31 December 2021			
	Hong Kong Dollars	British Pounds Sterling	Euro	United States Dollars & other
	€'000	€'000	€'000	€'000
Cash and cash equivalents	-	-	-	-
Other payables and accruals	(85)	-	(13)	(52)
Interest bearing borrowings	-	-	-	-
Overall exposure to currency risk	(85)	-	(13)	(52)

	31 December 2020			
	Hong Kong Dollars	**British Pounds Sterling**	**Euro**	**United States Dollars**
	€'000	**€'000**	**€'000**	**€'000**
Cash and cash equivalents	-	-	-	13
Other payables and accruals	-	(87)	(111)	(70)
Overall exposure to currency risk	-	(87)	(111)	(57)

ii) *Sensitivity analysis*
The following table indicates the instantaneous change in the Group's loss for the year and accumulated losses that would arise if foreign exchange rates to which the Group has significant exposure at the end of the year had changed at that date, assuming all other risk variables remained constant.

	31 December 2021		**31 December 2020**	
	Increase/ decrease in foreign exchange rates	**Effect on loss after tax and accumulated losses €'000**	**Increase/ decrease in foreign exchange rates**	**Effect on loss after tax and accumulated losses €'000**
Hong Kong Dollars	5%	(4)	5%	-
	(5)%	4	(5)%	-
British Pound Sterling	5%	-	5%	(4)
	(5)%	-	(5)%	4
Euro	5%	(1)	5%	(6)
	(5)%	1	(5)%	6
United States Dollars	5%	(3)	5%	(3)
	(5)%	3	(5)%	3

Results of the analysis as presented in the above table represent an aggregation of the instantaneous effects on the Group's loss and equity measured in the respective functional currencies, translated into Euro and Hong Kong Dollar respectively at the exchange rate ruling at the end of the year for presentation purposes.

The sensitivity analysis assumes that the change in foreign exchange rates had been applied to re-measure those financial instruments held by the Group which expose the Group to foreign currency risk at the end of the year. The analysis excluded differences that would result from the translation of the financial statements of the entities within the Group into the Group's presentation currency. The analysis is performed on the same basis for the year from 1 January 2020 to 31 December 2021.

d) Fair values

All financial instruments are carried at amounts not materially different from their fair values as at 31 December 2021 and 31 December 2020.

e) Interest rate risk

During the year, the Group had not entered into any interest swap contracts. The Group's interest rate profile, as monitored by the management, is set out below:

	31 December 2021		**31 December 2020**	
	Effective interest rates	€'000	Effective interest rates	€'000
Fixed rate borrowings:				
Interest-bearing borrowings	2.5%	58	-	-

All of the interest bearing loans of the company which are fixed rate instruments are insensitive to any change in interest rates. A change in interest rates at the end of the reporting year would affect neither profit nor loss.

24. EVENTS AFTER THE REPORTING DATE

No subsequent events to note after reporting date.

Cleantech Building Materials plc

1. GENERAL INFORMATION

The Company was incorporated in England and Wales on 16 December 2014 as a public company with limited liability under the UK Companies Act. The registered office of the Company is Floor 6 International House, 4 Maddox Street, London, England, W1S 1QP. The Company did not trade during either the current year or prior year.

2. ACCOUNTING POLICIES

Basis of preparing the financial statements
These financial statements have been prepared in accordance with Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and the Companies Act 2006. The financial statements have been prepared under the historical cost convention.

Going concern
The Group's current business is the importing and marketing of Accoya® Wood, which the Group has done since 2008. The Group has sufficient financing available to operate this existing import business on a going concern basis. The Group's directors are of a view that there is an investment opportunity for the Group to build and operate its own Accoya® Wood factory in China. By virtue of the investment agreement signed with Nantong Acetic Acid Chemical Company Ltd (NTAAC) on 31 March 2021, the LOI with its partner bank, and the subscription agreement entered into between a private family office, the directors believe there is now sufficient funding available to build the first Accoya® Wood factory in China.

The execution of the business plan and the availability of additional funds are inherently uncertain. The business plan is dependent on the standard milestones in such a project, including the approval of the joint venture by local government officials, and the successful construction and operation of a manufacturing plant.

Despite the uncertainty as to the outcome of the business plan and whether additional funds may be raised, the directors are confident that the Group will be able to obtain sufficient funds and to execute the Group's business plan to fully realise the carrying amount of the non-current assets.

The parent company's financial statements are prepared on the going concern basis.

Foreign currencies
The company's functional currency is Pound Sterling (£) and the presentational currency is Euro (€).

Parent company disclosure exemptions
In preparing the separate financial statements of the parent company, advantage has been taken of the following disclosure exemptions available in FRS 102:

• Only one reconciliation of the number of shares outstanding at the beginning and end of the year has been presented as the reconciliations for the group (see note 20 in the notes to the group accounts) and the parent company would be identical. Hence, the parent company has not disclosed this reconciliation in its notes to the accounts;
• Disclosures in respect of the parent company's financial instruments and share-based payment arrangements have not been presented as equivalent disclosures have been provided in respect of the group as a whole;
• No disclosure has been given for the aggregate remuneration of the key management personnel of the parent company as their remuneration is included in the totals for the group as a whole; and
• No cash flow statement has been presented for the parent company.

Parent company loss for the year
The company has taken advantage of the exemption allowed under section 408 of the Companies Act 2006 and has not presented its own statement of comprehensive loss in these financial statements.

Investments in subsidiaries
The Company's investment in its subsidiaries is carried at cost less provision for any impairment. The carrying value is tested for impairment when there is an indication that the value of the investment might be impaired. When carrying out impairment tests these would be based upon future cash flow forecasts and these forecasts would be based upon management judgement. The Board review the subsidiary forecasts to determine whether any provision impairment is required and where the forecasts indicate future profitability, no impairment provision is made

Critical accounting estimates and judgements
The Directors apply the critical accounting estimates and judgements used in the Group's assessment of the recoverability of non-current assets in determining the carrying value of investments in subsidiaries and recoverability of amounts owed by DWC.

3. **STAFF COSTS**

Key management personnel were engaged by the company. The average number of staff in 2021 was 6 (2020: 6).

	Year to 31 December 2021 €'000	Year to 31 December 2020 €'000
Wages and salaries	719	636
Social security contributions incurred by the Company	23	22
Contribution to defined contribution retirement plans	21	20
	763	678

4. **OPERATING LOSS**

The operating loss is stated after (crediting)/charging:

	31 December 2021 €'000	31 December 2020 €'000
Foreign exchange differences	430	(460)

5. **AUDITOR'S REMUNERATION**

	Year to 31 December 2021 €'000	Year to 31 December 2020 €'000
Fees payable to the Groups auditor and its associates for the audit of the Group's annual financial statements	31	26

6. **TAXATION**

No liability to UK corporation tax arose on ordinary activities for the year as the Company did not generate any assessable profit during the reporting period.

The Company has incurred available tax losses of approximately €1,643,000 to carry forward against future taxable profit. No deferred tax asset has been recognised in respect to these accumulated tax losses as there is insufficient evidence that the amount will be recovered in future years.

7. INVESTMENT

	Group Undertakings €'000
Cost	
At 1 January 2021	22,512
Additions	9,661
At 31 December 2021	32,173

The addition in the year was due to capitalisation of a portion of DWC's intercompany loan in May 2021, in exchange for 966,149,653 shares. This has resulted in an increase in the proportion of the Company's holding to 98.74%.

The principal undertakings in which the company's interest at the year-end is 20% or more are as follows:

Name	Country of incorporation or registration	Proportion of voting rights and ordinary share capital held	Nature of business
Diamond Wood China Limited	Hong Kong	98.74%	Trading in the wood business
Diamond Wood Nanjing Manufacturing Company Ltd*	PRC	98.74%	Trading in the wood business
Diamond Wood (Shanghai) Trading Company Ltd*	PRC	98.74%	Trading in the wood business
Jiangsu Dragon Wood Company Limited*	PRC	51.00%	Manufacturing and trading in the wood business

*Held indirectly through Diamond Wood China Limited

Registered offices:
Diamond Wood China Limited – 12/F Henley Building, Suite No. 8783, 5 Queen's Road Central, Central, Hong Kong.

Diamond Wood Nanjing Manufacturing Company Ltd - 168-080, Fang Shui Road, Nanjing Chemical and Industrial Park 2B3-1, Liu He District, Nanjing, Jiangsu Province, China

Diamond Wood (Shanghai) Trading Company Ltd - Room 2007-2008, No. 300 Xi Kang Road, Jing An District, Shanghai, China

Jiangsu Dragon Wood Company Limited - Jiangsu Dragon Wood Company Limited – Room 1005,Yangkou Port Commercial Building,No.9 Group, Gangcheng village, Changsha town, Rudong，Jiangsu Province, China

8. DEBTORS

	31 December 2021 €'000	31 December 2020 €'000
Amounts owed by group undertakings	2,074	9,661
Prepayments	38	12
Other debtors	5	2
Amount due from directors	-	1
	2,117	9,676

Amounts owed by group undertakings comprise an unsecured non-interest bearing intercompany balance which is repayable on demand.

All amounts shown under debtors fall due for payment within one year except for the amounts owed by group undertakings.

9. CREDITORS: AMOUNTS FALLING DUE WITHIN ONE YEAR

	31 December 2021 €'000	31 December 2020 €'000
Trade creditors	62	66
Other creditors	9	97
Accruals	77	173
Interest bearing borrowings	9	-
	157	336

10. INTEREST BEARING BORROWINGS

Diamond Wood - loan facility

Following CBM becoming the holding company of DWC on 31 December 2016, an intergroup facility was made available. The terms of the intergroup facility were such that the amount is unsecured, interest free and repayable on demand. This intercompany loan between CBM and DWC has been eliminated on consolidation at 31 December 2021 and 31 December 2020.

Convertible loan

The loan is unsecured and subject to an interest rate of 15%. As part of the existing loan arrangement the Loan Facility has a maturity date of 31 March 2024. During 2021, conversions of loan principal, interest and fees were made for €2,950,000, in exchange for 7,078,935 shares. Both the loan holder and the Company have the right to convert any amount owing under the facility into Ordinary Shares prior to the maturity date. The Company's share of the loan amounted to €nil (2020: € nil) A reconciliation of the movements is shown below:

	2021 €'000	2020 €'000
Interest bearing borrowings		
Brought forward	-	250
Cash flows	2,790	1,332
Share conversion	(2,950)	(1,846)
Interest	160	264
As at 31 December	-	-

Bounce Back loan

On 17 February 2021 the Company agreed a fixed rate loan of £50,000 with RBS under the UK Government's Bounce Back Loan Scheme ("BBLS"). The loan does not attract interest or require repayment for the first 12 months, but interest accrues thereafter at a rate of 2.5%. The loan has a term of 6 years.

	2021 €'000
Interest bearing borrowings – bounce back loan	
Brought forward	-
Cash flows of advance loans	58
Interest and fees	-
As at 31 December	58

At 31 December, €9,000 of the balance of the loan was repayable in less than one year, and €49,000 of the loan was repayable in more than one year.

11. RELATED PARTY DISCLOSURE

Other than the Directors' remuneration disclosed in the Group accounts, the Company has outstanding balances due from DWC, its subsidiary. See note 10 for more details of this intercompany balance.

During the year, the Company entered into the following transactions with DWC:

	31 December 2021 €'000	31 December 2020 €'000
Opening balance	9,661	8,526
Loan advanced/settled	2,896	1,496
Conversion of loan to Company shares	(9,661)	-
Management fee income	84	81
Other costs recharged to (from) subsidiaries	(906)	(442)
Balance owing as at 31 December	2,074	9,661

12. EVENTS AFTER THE REPORTING DATE

Please refer to Note 24 of the Group Financial Statements.

Perivan 263489
