long

Over 170,000
vehicules/day

2x2 lines
or **2x4 lines**

Objective:

Contribute to the
upgrade of the CANAMEX corridor,
the infrastructure linking Canada to Mexico

Rueil Malmaison, 28 February 2019

Eurovia wins maintenance contract for the main urban motorway in Calgary, Canada

- Maintenance of 46 km of motorway
- A seven-year contract with an option for a three-year renewal
- Total value of more than €80 million (around C\$120 million)

Carmacks, a subsidiary of Eurovia, one of the world’s leading players in transport infrastructure construction and urban development, has won the maintenance contract for the Deerfoot Trail in Calgary, Alberta.

Worth more than €80 million (around C\$120 million), the contract calls for the daily maintenance of Deerfoot Trail. It includes winter maintenance, maintenance and upkeep of infrastructure (bridges, roads and drains) and equipment (crash barriers, signage and lighting), as well as green spaces.

With an initial term of seven years, the contract includes an option for a three-year renewal and will come into force on 1 August 2019.

The Deerfoot Trail is a two- or four-lane dual carriageway extending from the north to the south of Calgary, a city with a population of over 1 million. The motorway was named in 1974 after Deerfoot, an exceptionally fast long-distance runner of the Siksika North American Indian Nation. It is part of the CANAMEX corridor, a transport infrastructure linking Canada to Mexico via the United States, and is the busiest urban motorway in Alberta, with daily traffic of over 170,000 vehicles.

This new contract strengthens Eurovia’s position in maintenance services, with over 60,000 km of road managed worldwide. In Alberta, Carmacks is also in charge of maintaining two other important urban motorways: North Stoney Trail in Calgary (until 2039) and Northwest Anthony Henday Drive in Edmonton (until 2041).

About Eurovia

Eurovia is a VINCI Group subsidiary and global leader in transport infrastructure and urban development. It builds and maintains transport infrastructure – roads, motorways, railways, airports and tramways – and develops industrial, commercial and urban facilities. It also delivers all the related services, including demolition, deconstruction, drainage, earthworks, utility networks, signage, bridges, tunnels and noise barriers. Eurovia’s network of industrial plants producing aggregates and other supplies for road and rail construction spans the entire supply chain. The company is operating in 16 countries, employs 43,500 people and generated €8.9 billion in revenue in 2018.
