Achievements

With a 20.7% increase in organic growth in the 2nd quarter, growth for the first six months of the year was + 12.7% compared to the same period in 2020 (on a like for like basis).

Compared to the 1st half of 2019, growth was up + 14%.

The accelerating effect of the pandemic on the digital transformation of organizations seems to be more pronounced than expected, with a strong demand for digital, cloud and cyber security.

Thanks to the increase in volumes and the cyclical limitation of fixed costs, the operating profit for the first half of the year amounted to 10.5% of revenues ⁽¹⁾, compared to 8.7% for the first half of 2020 and 9.1% for the first half of 2019 ⁽²⁾.

⁽¹⁾ Unaudited and after inclusion of 0.3% expenses related to bonus shares.

⁽²⁾ Excluding capital gains on disposals.

Outlook

Given the good performance of these first six months, both in terms of growth and profitability, NEURONES is raising its forecasts and now expects the following for the whole year:

- revenues of at least €570 million,
- an operating profit close to 10%.
