Nicolas Namias, Chairman of the BPCE Management Board, said: "Against a backdrop of weak economic growth and persistently high inflation, the Banque Populaire and Caisse d'Epargne retail banking networks continued to expand in all their different customer segments, attracting 500,000 new customers, while the performance of our global business lines, Natixis CIB in particular, made it possible to diversify our sources of revenues. Our Group remained deeply committed to financing and supporting local and regional France, notably with the announcement of exceptional measures in support of its customers during the most recent periods of social unrest in France. While the financial results of our two retail banking networks remain impacted by the full effect of the rise interest rate paid on deposits, which began more than a year ago for regulated savings products, the higher rates of interest charged on loans is now beginning to show its effects. Our Group will consequently benefit from the new interest rate environment as of next year.

We are also continuing to prepare for the future by maintaining a strict control over our costs, which have declined over the quarter, and by pursuing a prudent risk management policy. Our capital adequacy ratios, which are already well above prudential requirements, improved still further in the 2nd quarter with a CET1 ratio of 15.2%.

Finally, with one year to go before the Olympic Games, Groupe BPCE, with all its brands, is accelerating its drive to realize its ambition to be the Bank of Sport in France by contributing actively to the operational success of Paris 2024."

1. Groupe BPCE

Unless specified to the contrary, the financial data and related comments refer to the reported results of the Group and business lines, changes express differences between Q2-23 and Q2-22 and between H1-23 and H1-22.

Groupe BPCE recorded a 9% decline in **net banking income** to 5,467 million euros in Q2-23 and a 7% drop to 11,281 million euros in H1-23 due, as anticipated, to the faster transmission of higher interest rates on regulated savings to the overall cost of customer deposits, while asset repricing is gradually bearing fruit.

Revenues from the Retail Banking & Insurance business unit (RB&I) stood at 3,665 million euros (-11%) in Q2-23 and at 7,546 million euros (-9%) in the first 6 months of 2023. Despite strong sales momentum enjoyed by the Banques Populaires and Caisses d'Epargne in H1-23, the net banking income generated by the **retail banking networks** was down 14%. The **Financial Solutions & Expertise** business unit saw 6% revenue growth in H1-2023, driven by financing activities. The Insurance business benefited from the very good momentum in Life Insurance and Personal Protection Insurance, although its revenues reflect a certain volatility triggered by the application of the new IFRS 17 and 9³ reporting requirements.

The **Global Financial Services** business unit reported a 2% increase in revenues in Q2-23 and H1-23, to 1,798 million euros and 3,620 million euros respectively. In H1-23, this increase can mainly be attributed to a 7% rise in the net banking income posted by the **Corporate & Investment Banking** business, buoyed up by an effective diversification strategy. The net banking income posted by **Asset & Wealth Management** was down 4% owing to lower management fees as a result of the 10% year-on-year drop in average assets under management at constant foreign exchange rates.

Commissions held steady at the good level of 5 billion euros in H1-23.

Against a backdrop of high inflation, **operating expenses** were kept under tight management in all business lines. They fell by 3% in Q2-23 to 3,799 million euros and declined by 1% in H1-23 to 8,386 million euros and, if contributions to the SRF (down by 23%) are excluded, they remain stable at 7,930 million euros.

The underlying cost/income ratio (excluding exceptional items and excluding contributions to the SRF) came to 72.1% in Q2-23, up 8.3pp, and stood at 69.9% in H1-23, up 6.2pp.

Gross operating income fell by 22% in Q2-23 and H1-23, to 1,667 million euros and 2,895 million euros respectively.

Groupe BPCE's **cost of risk** was down 23% in Q2-23 to 342 million euros, and down 22% in H1-23 to 669 million euros. This decrease, as anticipated, is chiefly due to the reversal of provisions on outstandings rated 'Stage 1' and 'Stage 2'.

For Groupe BPCE, the **quarterly amount of provisions for performing loans rated 'Stage 1' or 'Stage 2'** corresponds to a reversal of 229 million euros in Q2-23 vs. 199 million euros in Q2-22. Half-yearly provisions for performing loans rated as Stage 1 or Stage 2 correspond to a reversal of 159 million euros in H1-23 vs. a provision of 339 million euros in H1-22.

Provisions for proven risks **rated 'Stage 3'** amounted to 571 million euros in Q2-23, up on the figure reported in Q1-22 (246 million euros), and reached 828 million euros in H1-23 vs. 518 million euros in H1-22.

Provisions for loan outstandings rated 'Stage 3' increased by 310 million euros compared with H2-2022 owing to the prudent provisioning of a limited number of specific cases.

In Q2-23, the cost of risk came to **16bps** in relation to gross customer outstandings **for Groupe BPCE** (22bps in Q2-22). It includes a reversal of 11bps in Q2-23 (vs. an allocation to provisions of 10bps in Q2-22) rated 'Stage 1' or 'Stage 2' and the provisioning of loans with a proven risk of 27bps in Q2-23 (vs. an allocation to provisions of 12bps in Q2-22) rated 'Stage 3'.

The cost of risk came to **14bps** for the **Retail Banking & Insurance** business unit (22bps in Q2-22), including a reversal of 10bps for the provisioning of performing loans (vs. an allocation to provisions of 10bps in Q2-22) rated 'Stage 1' or 'Stage 2' and 24bps for the provisioning of loans with a proven risk (vs. an allocation to provisions of 13bps in Q2-22) rated 'Stage 3'.

The cost of risk of **Corporate & Investment Banking** in Q2-23 stood at **54bps** (44bps in Q1-22), including a reversal of 26bps related to the provisioning of performing loans (vs. vs. an allocation to provisions of 27bps in Q2-22) rated 'Stage 1' or 'Stage 2' and an allocation to provisions of 80bps related to the provisioning of loans with a proven risk (vs.17bps in Q2-22) rated in 'Stage 3'.

In H1-23, the cost of risk was also **16bps** for gross customer loans **for Groupe BPCE** (21bps in H1-22), including a reversal of 4bps in H1-23 (vs. an allocation to provisions of 8bps in H1-22) rated 'Stage 1' or 'Stage 2' and the provisioning of loans with a proven risk of 20bps in H1-23 (vs. an allocation to provisions of 13bps in H1-22) rated 'Stage 3'.

The cost of risk was **16bps** for the **Retail Banking & Insurance** business unit (21bps in H1-22), including reversal of 4bps for the provisioning of performing loans (vs. an allocation to provisions of 9bps in H1-22) rated 'Stage 1' or 'Stage 2' and provisions of 20bps for the provisioning of loans with a proven risk (vs an allocation to provisions of 12bps in H1-22) rated in 'Stage 3'.

The cost of risk came to **20bps** for **Corporate & Investment Banking** in H1-23 (50bps in H1-22), including reversals of 13bps for the provisioning of performing loans (vs. an allocation to provisions of 15bps in H1-22) rated 'Stage 1' or 'Stage 2' and 34bps for the provisioning of loans with a proven risk rated 'Stage 3', stable compared with H1-22.

The **ratio of non-performing loans** to gross loan outstandings stood at 2.4% at June 30, 2023, +0.1 pp on end-2022.

GFS revenues rose by 2% in Q2-23 and H1-23, to €1,798 million (+3% at constant exchange rates) and €3,620 million (+1% at constant exchange rates) respectively. These trends can be explained by our diversified business model and strong sales activity, despite the sluggish economic environment.

In H1-23, **Asset & Wealth Management revenues** fell by 4% year-on-year owing to the decline in the overall fee rate (excluding insurance management) compared with H1-22, mainly due to the increase in the share of fixed-income products in the product mix.

At the end of June 2023, **Global Markets revenues** were buoyed up by the good performance of the **Equity** business, including with the Groupe BPCE retail banking networks, which grew by 10% to 346 million euros.

FIC-T revenues fell by 1% to 662 million euros in Q2-23. Good momentum in **FI-Credit and FI-Rates** activities offset lower revenues in **FI-Currencies & Commodities** (owing to lower currency volatility and weaker customer demand).

In **Global finance**, revenues at end-June 2023 were down (-7%) at 719 million euros. The good performance achieved by **Trade finance** partially offset lower revenues from **Real Assets**. The decline in portfolio revenues can be explained by the lower level of outstandings.

Investment banking activities posted revenues of €117 million, up 5% in H1-23 driven, in particular, by strong activity in the Debt Capital Markets.

Despite the sluggish market environment, **M&A** continued to outperform with revenues of 121 million euros, up 37% in H1-23, thanks to sustained activity by the M&A boutiques (notably Fenchurch, Solomon Partners, Natixis Partner France, and Azure capital).

ANNEXES

Notes on methodology

Presentation of the pro-forma quarterly results

The main pro-forma restatement concerns the transition to IFRS 17. Data for 2022 has been recalculated under IFRS 17 to obtain a like-for-like basis of comparison.

New management standards adopted by Natixis (normative allocation of capital to the business lines) have led to a recalculation of the data for the 2022 quarterly series.

The tables showing the transition from reported 2022 to pro-forma 2022 are presented on annexes.

IFRS 17/IFRS 9

Groupe BPCE has applied the provisions of IFRS 17 pertaining to insurance contracts since January 1, 2023, as well as IFRS 9 for insurance entities.

IFRS 17 replaces IFRS 4 and is applicable retroactively, with the implementation of pro-forma financial statements for comparative data for the 2022 financial year (different profit recognition rates between the two standards).

IFRS 9 replaces IAS 39 by modifying the principles for the valuation of the financial assets of insurers using the same rules as those applied by banks since January 1, 2018. It applies in the same way considering the temporary exemption enjoyed by insurance entities. Groupe BPCE has elected to apply the provisions of IFRS 9 for the 2022 comparative data.

IFRS 17 provides for the estimation at inception of the Contractual Service Margin (CSM) of a group of insurance contracts recognized in the balance sheet and which is then amortized in the income statement (in Net Banking Income) as and when the service is rendered. This margin takes account, in particular, of the related overheads.

Insurance liabilities are recognized at present value.

Income and expenses relating to ceded insurance and reinsurance contracts are presented separately in Net Banking Income.

General expenses relating to insurance contracts are presented by destination as a deduction from Net Banking Income.

The cost of credit risk on financial investments in insurance activities is isolated on a separate line in the insurance aggregates in Net Banking Income.

Creation of the Digital & Payments sub-segment

The Payments and Oney business lines have been brought together within a single Digital & Payments sub-segment.

Segment information for previous quarters has been restated accordingly. These internal transactions have no impact on the Group's financial statements.

Internal transfer

Crédit Foncier's subsidiary, Banco Primus (Corporate center) was transferred to BPCE Financement (Financial Solutions & Expertise business unit within RB&I).

Segment information for previous quarters has been restated accordingly. These internal transactions have no impact on the Group's financial statements.

Exceptional items

Exceptional items and the reconciliation of the reported income statement to the underlying income statement of Groupe BPCE are detailed in the annexes.

Net banking income

Customer net interest income, excluding regulated home savings schemes, is computed on the basis of interest earned from transactions with customers, excluding net interest on centralized savings products (*Livret A*, *Livret Développement Durable*, *Livret Épargne Logement* passbook savings accounts) in addition to changes in provisions for regulated home purchase savings schemes. Net interest on centralized savings is assimilated to commissions.

Operating expenses

Operating expenses correspond to the aggregate total of the "Operating Expenses" (as presented in the Group's 2022 universal registration document, note 4.7 appended to the consolidated financial statements of Groupe BPCE) and "Depreciation, amortization and impairment for property, plant and equipment and intangible assets."

Cost/income ratio

Groupe BPCE's cost/income ratio is calculated on the basis of net banking income and operating expenses excluding exceptional items, the latter being restated to account for the Single Resolution Fund (SRF) booked in the Corporate center division. The calculations are detailed in the annexes. Business line cost/income ratios are calculated on the basis of underlying net banking income and operating expenses.

Cost of risk

The cost of risk is expressed in basis points and measures the level of risk per business line as a percentage of the volume of loan outstandings; it is calculated by comparing net provisions booked with respect to credit risks of the period to gross customer loan outstandings at the beginning of the period.

Loan outstandings and deposits & savings

Restatements regarding transitions from book outstandings to outstandings under management are as follows:

- Loan outstandings: the scope of outstandings under management does not include securities classified as customer loans and receivables and other securities classified as financial operations,
- Deposits & savings: the scope of outstandings under management does not include debt securities (certificates of deposit and savings bonds).

Capital adequacy

Common Equity Tier 1 is determined in accordance with the applicable CRR II/CRD V rules, after deductions.

Additional Tier-1 capital takes account of subordinated debt issues that have become non-eligible and subject to ceilings at the phase-out rate in force.

The leverage ratio is calculated in accordance with the applicable CRR II/CRD V rules. Centralized outstandings of regulated savings are excluded from the leverage exposures as are Central Bank exposures for a limited period of time (pursuant to ECB decision 2021/27 of June 18, 2021).

Total loss-absorbing capacity

The amount of liabilities eligible for inclusion in the numerator used to calculate the Total Loss-Absorbing Capacity (TLAC) ratio is determined by article 92a of CRR. Please note that a quantum of Senior Preferred securities has not been included in our calculation of TLAC.

This amount is consequently comprised of the 4 following items:

- Common Equity Tier 1 in accordance with the applicable CRR II/CRD IV rules,
- Additional Tier-1 capital in accordance with the applicable CRR II/CRD IV rules,
- Tier-2 capital in accordance with the applicable CRR II/CRD IV rules,
- Subordinated liabilities not recognized in the capital mentioned above and whose residual maturity is greater than 1 year, namely:
 - The share of additional Tier-1 capital instruments not recognized in common equity (i.e. included in the phase-out),
 - The share of the prudential discount on Tier-2 capital instruments whose residual maturity is greater than 1 year,
 - The nominal amount of Senior Non-Preferred securities maturing in more than 1 year.

Liquidity

Total liquidity reserves comprise the following:

- Central bank-eligible assets include: ECB-eligible securities not eligible for the LCR, taken for their ECB valuation (after ECB haircut), securities retained (securitization and covered bonds) that are available and ECB-eligible taken for their ECB valuation (after ECB haircut) and private receivables available and eligible for central bank funding (ECB and the Federal Reserve), net of central bank funding,
- LCR eligible assets comprising the Group's LCR reserve taken for their LCR valuation,
- Liquid assets placed with central banks (ECB and the Federal Reserve), net of US Money Market Funds deposits and to which fiduciary money is added.

Short-term funding corresponds to funding with an initial maturity of less than, or equal to, 1 year and the short-term maturities of medium-/long-term debt correspond to debt with an initial maturity date of more than 1 year maturing within the next 12 months.

Customer deposits are subject to the following adjustments:
