Agidens expands European footprint with strategic acquisition of Spanish industry peer AUGI

- Agidens completed the acquisition of AUGI (Automatismes Girona), an industry leading system integrator in Spain.
- This acquisition will expand Agidens' geographic positioning and strengthen its automation offering, notably for discrete manufacturing[1].

Zwijndrecht (Belgium), 28 October 2024 (07:00 h CET) – Agidens, a leading provider of industrial automation solutions, is excited to announce the successful acquisition of Automatismes Girona (AUGI), a prominent Spanish system integrator specializing in turnkey automation solutions for both discrete and process applications.

This strategic move marks a significant milestone in Agidens' growth strategy, expanding its presence in Europe and diversifying its industrial automation offering. It aligns with Agidens' commitment to delivering high-quality, comprehensive services to its global customer base. AUGI is based in Girona (Catalonia) with clients across Europe and Latin America. The acquisition of AUGI opens new frontiers for Agidens to deploy its innovative solutions and extensive market expertise into new geographies and industries, incl. paper, metal and other discrete manufacturing.

Hedwig Maes, CEO of Agidens International: "We are thrilled to welcome AUGI to the Agidens group. This acquisition not only strengthens our position in Europe, but also broadens our capabilities in discrete automation, allowing us to offer an even greater value proposition to our customers. Together, we are well-positioned to drive growth and innovation in these dynamic markets."

Miquel Bech, General Manager AUGI: "We are excited to join the Agidens family. This partnership marks an exciting new chapter for our business, enabling us to leverage Agidens' strengths to enhance our offerings and deliver even greater value to our customers. We look forward to what the future holds as we combine our expertise to create even more success for our clients, partners, and employees."

AUGI has a strong track record of success and is well known for its expertise in complex control systems, motion control and panel building for both discrete and process automation

---

[1] Discrete manufacturing refers to the production of distinct items (e.g. parts, devices, …) as opposed to process manufacturing which refers to the production of undifferentiated products like oil, gas, …

applications. AUGI also shares Agidens' dedication to operational excellence and customer satisfaction. The integration of AUGI's talented team and advanced technology, will enhance Agidens' ability to meet the evolving needs of its clients worldwide.

The acquisition is effective immediately, and integration measures are scheduled to ensure a seamless transition for both companies' clients and employees.
