

## Remarkable participation at 2022 Eurospine congress in Milan

***Spineway and Spine Innovations, the Group's latest acquisition, were present from 19 to 21 October 2022 in Milan at the Eurospine international congress to present the Group's product lines to the entire spinal implant industry.***

At the largest scientific and commercial European congress dedicated to spinal surgery, which this year brought together almost 2,000 surgeons from around the world, Spineway was able to present its flagship instruments and implants (Mont-Blanc, Mont-Blanc MIS and Twin Peaks), three new ranges of Group spinal implants : Kaphorn, Veos, Acifbox and the two models of cervical and lumbar ESP disc prosthesis from Spine Innovations.

The Group was thus able to show its know-how thanks to its extensive range of products. Many international distributors from the five continents, as well as new potential distributors (Canada, Argentina, Spain, Austria), expressed at this occasion their great interest in the Group's products.

Spineway also successfully hosted two specific events for distributors and surgeons :

- **A sales meeting attended by some 30 international distributors** from 12 different countries, to announce the integration of Spine Innovations and to present the new product lines,
- **A scientific meeting** organized by Spine Innovations **in front of an audience of fifty international surgeons** to present the work of two French and Swedish surgeons, key opinion leaders on prosthetic discs.

These fruitful meetings confirm the relevance of product and territory synergies between the two companies.

Based on this successful event, Spineway will continue its development in order to position itself as a European player of reference in the spine sector.
