

Italeaf: the Board of Directors of TerniEnergia approves the new name and the transfer of the registered office

- **Proposal to the Shareholders' Meeting to change the company name to AlgoWatt S.p.A. and transfer the registered office to Milan. Following the merger by incorporation of Softeco Sismat Srl into TerniEnergia, the main operational headquarters will be located in Genova**
- **The new name linked to the reorganisation of the company into "One Smart Company" and to the new strategic positioning in the technological and digital sector**
- **Published the TerniEnergia corporate events calendar 2020**

The Board of Directors of TerniEnergia, smart company listed on MTA of Borsa Italiana and part of the Italeaf Group, met today, approved the proposal to be submitted to the Extraordinary Shareholders' Meeting to amend Articles 1 (company name) and 2 (registered office) of the Bylaws.

Specifically, the proposal requires the Company to adopt, as from the date of filing of the shareholders' resolution in the Companies' Register, the company name "**AlgoWatt S.p.A.**", with registered office in Milan, Corso Magenta 85. This proposal is in continuity with the recent extraordinary transactions undertaken and, in particular, with the merger by incorporation of Softeco Sismat Srl (company with over 40 years of history in the ICT sector) into TerniEnergia (listed since 15 years on the Italian Stock Exchange and a leading player in the renewable energy and green industry sectors) and the implementation of the Group's Recovery and Relaunch Plan. As part of the operational and industrial turnaround based on the "One Smart Company" model, the Company's Board of Directors has therefore considered it crucial to reconsider the corporate identity and the strategic positioning to encourage the creation of value for all the stakeholders.

With the name AlgoWatt, a synthesis between *algorithm*, computer calculation process, and *watt*, unit of measurement of electrical power, identifies a System Integrator, also with strong skills in software development, focused on GreenTech, no longer operating in the utility sector but in the technological and digital one.

The **transfer of the registered office to Milan** will have both a functional and qualifying impact, signaling the Company's willingness to strengthen its proximity to investors and involvement in the domestic market and to increase business opportunities in Italy, laying the bases for the wider international growth. The Company will have its main operational headquarters in Genova, where the core of its digital activities is located, as well as branches in Rome, Naples, Catania, Lecce and Narni (TR).

Finally, in order to facilitate the activity of financial market players, pursuant to art. 2.6.2 of the Regulation of Borsa Italiana S.p.A., TerniEnergia announces the dates scheduled in 2020 for the examination of economic and financial data by the Board of Directors and for the related disclosure, as well as the meetings and public events already scheduled:

Please note that the dates set out in this press release are purely indicative: any changes, which may be made to the same, will in any case be promptly disclosed to the market, in the same manner provided for the dissemination of this press release.

TERNIENERGIA (TER. MI), established in September 2005 and part of the Italeaf Group, is the first Italian global technological enabler, committed to bringing energy solutions and efficient recovery of integrated and sustainable resources to the world. Organized into two strategic business lines (Assets and Smart solutions and services), with about 300 employees and a geographical presence worldwide, with operative and commercial offices, TerniEnergia develops innovative solutions, products and services based on digital and industrial technologies for the energy supply chain, grids, smart mobility, industrial automation and the recovery of marginal resources. TerniEnergia, also through its subsidiaries (Softeco Sismat, Greenled Industry, GreenAsm, GreenAsm, Purify, Wisave, Ant Energy), pursues the objectives of increasing energy production from renewable sources, saving energy and reducing emissions and actively participates in the energy revolution of distributed power generation and smart grids, with innovative digital solutions. TerniEnergia is the ideal partner for large utilities, distribution operators and network operators, energy producers, public administrations, industrial customers and investors who intend to realize large projects for the production of renewable energy, modern systems and plants with high energy efficiency, solutions for the management and maintenance of infrastructure and electrical installations. TerniEnergia has completed its transformation from a leader in the international photovoltaic market into a smart energy company and technological enabler for the sustainable use of resources through a complete commercial offer of solutions, the development and supply of digital technologies and the creation of "intelligent" services and solutions aimed at public and private customers in emerging sectors.

TerniEnergia is listed on the MTA of Borsa Italiana.
